MapKit 2 ArcGIS
Krishna Jagadish & Al Pascual
Agenda

- Overview
- When you need more from an SDK
- How to migrate from MapKit to ArcGIS
- Demo (Simple Map)
- Demo (Call out)
- How to get involved?
- Questions.
Agenda

- **Overview**
- When you need more from an SDK
- How to migrate from MapKit to ArcGIS
- Demo (Simple Map)
- Demo (Call out)
- How to get involved?
- Questions.
Overview

- What is MapKit 2 ArcGIS?
  - Code frame that helps you migrate from Apple Mapkit framework to using ArcGIS Runtime iOS SDK
  - Minimal code change required
  - Be able to use all the features of ArcGIS iOS SDK
What’s the difference?

- Geometry Engine
- Point, lines and polygons
- Dynamic Map Services
- Tiled Map packages
What do you need?

• ArcGIS Runtime SDK for iOS 10.1.1
• XCode 4.4 +
• OS X 10.6 +
Agenda

- Overview
- When you need more from an SDK
- **How to migrate from MapKit to ArcGIS**
- Demo (Simple Map)
- Demo (Call out)
- How to get involved?
- Questions.
3 Simple Steps

• Remove MapKit.framework
• Fork the code from GitHub and add it to the project
• Add the ArcGIS Runtime SDK for iOS into the project
