What are Story Maps?
Introduction

https://arcg.is/1miOK8
Story Maps are simple web apps that combine interactive maps,
Story Maps are simple web apps that combine interactive maps, multimedia content,
Story Maps are simple web apps that combine interactive maps, multimedia content, and user experiences.
Story Maps are simple web apps that combine interactive maps, multimedia content, and user experiences to tell stories about the world.
Story Maps include an array of apps that provide different ways of interacting with maps.
Story Maps are responsive and work on PCs, laptops, tablets, and smartphones.
Story Maps have **builders** that enable you to build an engaging story with no GIS or web development skills, but...
Story Maps are open source. Developers are free to download and customize them.
Story Maps are hosted by Esri in the cloud... or you can download and host them yourself.
How can story maps be used?

- Communication
  - Analysis/data science, annual reports, marketing, …

- Presentations or teaching tools

- At tradeshows and events

- Operations centers and lobby displays

- For fun!!
  - Share you vacation photos, wedding story, hobbies, …

Tell any type of story with a story map!

How to build a story...
Building stories demonstration
How to customize a story
Ways to customize

1. Add HTML/CSS in builder
   - Journal only, but *coming soon to Series!*

2. Edit the story JSON using ArcGIS Online Assistant

3. Add CSS to index.html

4. Add JavaScript using the app’s API in custom-scripts.js

5. Modify the source code and build

3, 4, and 5 require downloading and hosting the app

The 21 Newest UNESCO World Heritage Sites

The United Nations Educational, Scientific and Cultural Organization (UNESCO) is an international body charged with preserving some of the world’s most unique places—places deemed to be of outstanding value to humanity because of their cultural or natural significance. This is done, in part, through UNESCO’s list of World Heritage Sites.

The list provides protection to its inscribed sites under international law. While places like the Great Barrier Reef in Australia, the Acropolis in Greece, and India’s Taj Mahal are some of its most famous properties, UNESCO’s list covers more than 1,000 locations across the globe.
