

# Abstract

## **GIS Across Campus: A Research Tool for Anthropology to Zoology**

**Track:** Infusing GIS Throughout Campus

**Author(s):** Julie Sweetkind-Singer, Meredith Williams

Branner Earth Sciences Library and Map Collections at Stanford University manages the GIS services for the campus. One of the primary roles of the GIS & Map Librarian and the GIS Manager, key staff supporting these services, is to increase awareness of GIS as a research tool in all departments across campus. This talk will discuss the history of GIS use at Stanford, the design of our workshops and in-class presentations used to introduce new users to GIS software and data, statistics on which departments are using GIS, and future outreach strategies.
