

The Development of a Track System for GIS Certificate Programs

R. B. Schultz and Judy Bock

GIS Programs at Colleges and Universities

- 3,500 colleges & universities in US and 4,000 world wide (Phoenix, 2007)
 - Over 315 programs are listed on the Searchable Database on the Higher Ed web page of ESRI's site
 - 50,000 students a year learning GIS in US schools
- GIS is taught or used in over 70 disciplines and departments
 - **geography, geology, sociology, archeology, computer science, forestry, agriculture, engineering, environmental science, business, drafting, economics, political science, history, etc.**
 - **College and university administration**

Who Takes GIS Certificate and Distance Ed Courses?

- 75% of Students in Adult-Oriented Programs are Working Professionals
 - Upgrading and Retraining in technology
 - Need for Knowledge in Related Fields
 - Business, Marketing, Economics, Commerce
- Educators
 - K-12, College and University Personnel
- Recent University Graduates
 - Jobs Require Knowledge of Spatial Concepts
- The Elmhurst College GIS Certificate Program is designed with these student needs and time/location restrictions in mind

Elmhurst College's GIS Certificate Program

- Original organization of Program had all students in one classroom
- Challenges:
 - Introductory students were “lost”
 - Advanced students were not challenged
 - Limited market around local area
- Positives:
 - Beginners learned from experts
 - Collaborative learning environment

Advancements to the Elmhurst College GIS Certificate Program Began Fall 2006

- Three specific tracks:
 - **Introductory** (leading to Professional Track admission)
 - **Professional Track**
 - **Educator Track**
- Each with specific coursework tailored to goals of students
- Either track can be completed in less than one calendar year

```

The diagram is a hierarchical flowchart. At the top is a blue rounded rectangle containing the text 'Elmhurst College GIS Certificate Program'. A vertical line descends from this box and splits into three horizontal lines. The leftmost horizontal line connects to a red rounded rectangle containing the text 'Summer Introductory Track'. The middle horizontal line connects to a blue rounded rectangle containing the text 'Fall-Spring Professional Track'. The rightmost horizontal line connects to a blue rounded rectangle containing the text 'Fall-Spring Educator Track'. The background of the slide is a dark red gradient with a faint world map visible in the bottom left corner.

Introductory Track

Fall-Spring
Professional Track

Fall-Spring
Educator Track

GIS Certificate Program

Introductory Track

- Cohort-based; can even be “company-based”
- *Hybrid* format which meets weekly on Wednesday evenings; remainder of course material is presented online so that students may work at their own convenience and pace.
- Coursework:
 - Summer Session: June-July
 - **GIS 100 Fundamentals of GIS**
- **Successful completion of Introductory Track course meets requirements for acceptance into Professional Track.**

Fall-Spring
Professional Track

Fall-Spring
Educator Track

GIS Certificate Program Professional Track

- Entirely online; can even be “company-based”
- All course materials presented online via a course management system so that students may work at their own convenience and pace.
- Coursework:
 - **Session 1: Fall (August-December)**
 - **GIS 200 Advanced Remote Sensing Techniques**
 - **ISG 100 Programming with ArcObjects**
 - **Session 2: Spring (February-May)**
 - **GIS 300 Capstone: Practical GIS Applications**
 - **ISG 200 Implementing Geodatabases**
- All courses facilitated by ESRI Certified Instructors and working professionals in GIS
- Capstone course taught by ESRI employee.

GIS Certificate Program Educator Track

- Cohort-based; can even be “institution-based”
- *Hybrid* format which meets bi-weekly on Wednesday evenings; remainder of course material is presented online via a course management system so that students may work at their own convenience and pace.
- Coursework:
 - **Session 1: Fall (August-December)**
 - **GIS 100 Fundamentals of GIS**
 - **Session 2: Spring (February-May)**
 - **GIS 300 Capstone: GIS in Society: Teaching Methods**

Tuition and Software

- Tuition
 - The cost per course is somewhat less than the traditional College credit offerings. Consult with the School for Advanced Learning (SAL) for more information: (630) 617-3300
 - All classes are “for” college credit; tuition reimbursements are available for most organizations
 - Scholarships are available
- Software:
 - Depending on the track students enroll in, they will receive one or more of the following software packages as part of the registration fees:
 - ArcGIS 9.x including all extensions (ArcMap level)
 - Google Earth Pro (Educator Track only)

Contacts

- Coordinators:
 - **Dr. Rich Schultz, GIS Coordinator**
 - Phone: (630) 617-3128
 - E-Mail: richs@elmhurst.edu
 - **Ms. Linda Krause, IS Coordinator**
 - Phone: (630) 617-3224
 - E-Mail: lindak@elmhurst.edu
