

Celebrate Environment Day With a Colloquium For Students By Students

Marco Painho (painho@isegi.unl.pt)

Madalena Mota (madalenamota@gmail.com)

The ConTIG Project

Context:

AGÊNCIA NACIONAL
PARA A CULTURA
CIENTÍFICA E TECNOLÓGICA

Ciência Viva VI – Portuguese
funding program from the
National Agency for Scientific
and Technologic Culture

Participating institutions:

Lead Institution

Associate institutions

The ConTIG Project

Main goal:

To promote the use of Geographical Information Technologies (GIT) in schools

Promote experimental teaching by creating learning experiences in different disciplines, using GIT – spatial dimension being the common ground that enables spatial analysis in a multidisciplinary context.

June 5th 2009

ISEGI-UNL hosted a colloquium where all the students that participated on the project came to present their work. Over one hundred students from five different schools attended. Besides the students, in the audience there were high school teachers, university teachers and representatives of all the entities that supported the Colloquium

June 5th 2009 – ISEGI-UNL

June 5th 2009 – Winning posters:

PROJETO GUTIS - Introdução de Tecnologias de Informação Geográfica no Ensino

ESRI NOVA

Escola Secundária com 3.º Ciclo do Ensino Básico

Um mundo policêntrico

Do tradicional centro de poder a a nova ordem global

2009-2010, 10.º Ano, 10.º Ano, 10.º Ano

The poster features several world maps with different color schemes and a central flowchart. The flowchart shows a hierarchy of nodes, likely representing different levels of global organization or power. Text boxes provide context for the maps and the concept of a polycentric world.

PROJETO GUTIS - Introdução de Tecnologias de Informação Geográfica no Ensino

ESRI NOVA

Escola Secundária com 3.º Ciclo do Ensino Básico

Visita de Estudo ao Maciço Calcário Estremenho

2009-2010, 10.º Ano, 10.º Ano, 10.º Ano

The poster includes a map of the limestone massifs in Estremoz, Portugal, and several photographs of students participating in the field study. A central flowchart outlines the structure of the study visit, including objectives, activities, and conclusions.

PROJETO GUTIS - Introdução de Tecnologias de Informação Geográfica no Ensino

ESRI NOVA

ESCOLA PROFISSIONAL DE CIÊNCIAS GEOMÁTICAS

Participação Pública em Ambiente e Ordenamento do Território

Localização do Novo Aeroporto de Lisboa e Terceira Travessa do Tejo

2009-2010, 10.º Ano, 10.º Ano, 10.º Ano

The poster displays a flowchart detailing the process of public participation in the planning of a new airport and a crossing over the Tejo river. It includes several maps showing the geographical context and a bar chart at the bottom left.
