

A Louisiana State Story - Utilizing Story Maps to Teach State History

Use your ConnectEd school subscription and ArcGIS Online to its full potential. With Louisiana as the spotlight state, we'll explore how Esri Story Maps can wrangle all the key benchmarks in a state history curriculum. By including research, map making, historic maps, primary documents and analysis, students working with GIS can change how we teach and students experience local history. Get local and teach your state history with a combination of engaging map adventures!
