Geocom in a Nutshell

1995	Spin-Off of an engineering Company
2001	Change to ESRI ArcGIS technology
2010	Member of the Esri Deutschland Group
2010	Establishing Geocom Informatik GmbH for the German market
2013	Esri Platinum partner

- Currently around 100 employees
- 6 Geocom offices in Switzerland and Germany
- Present with partners in more than 20 countries on all continents

Market segments

Energy

Plant Management

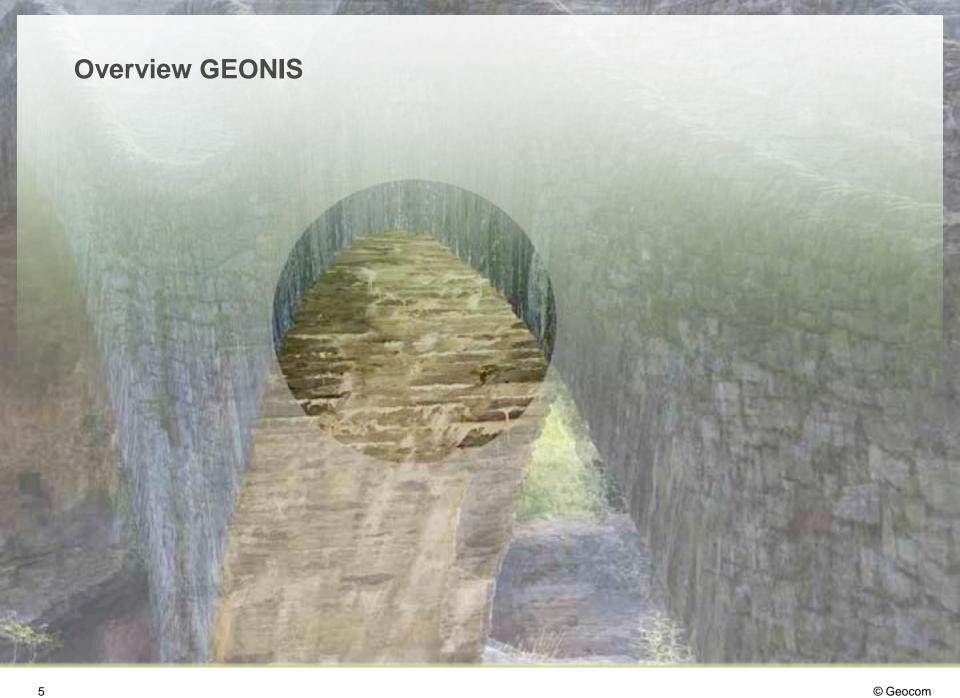

Cadastral Survey

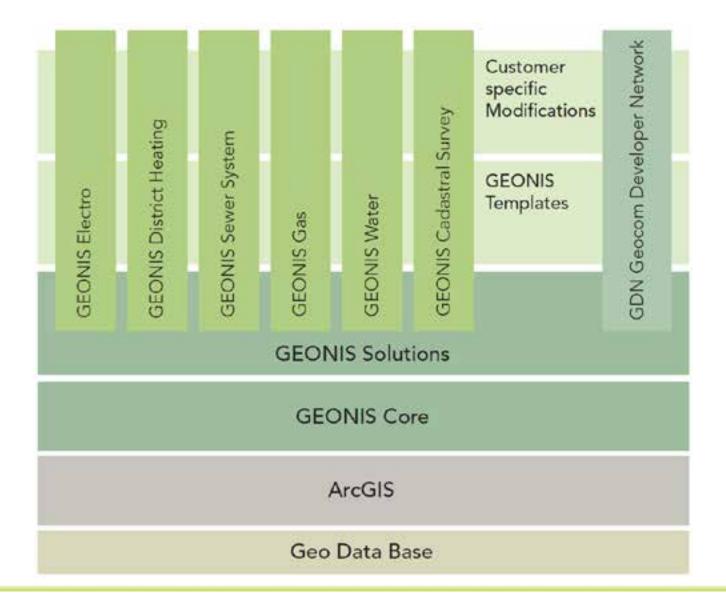

Public Infrastructure

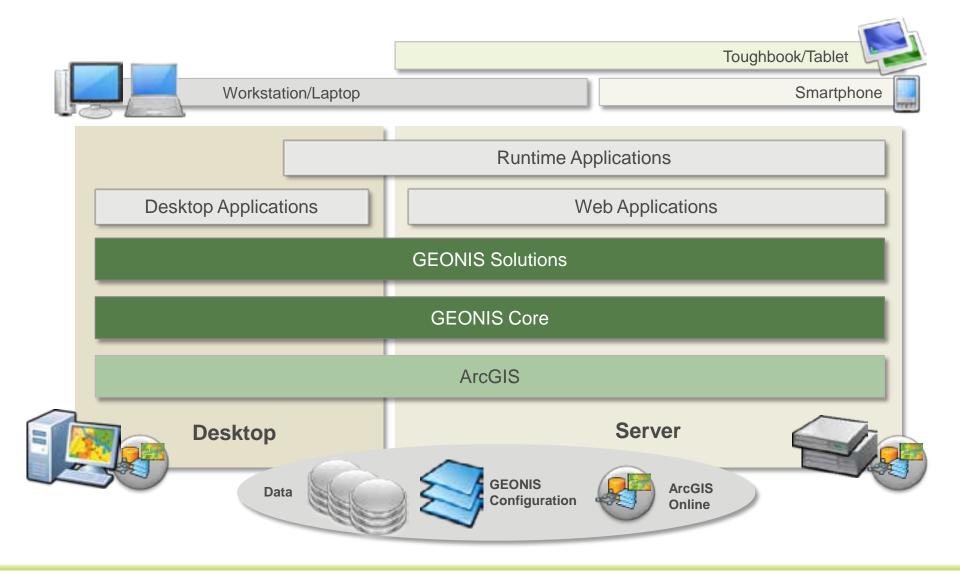

Transportation and Logistic

GEONIS Core & Solutions

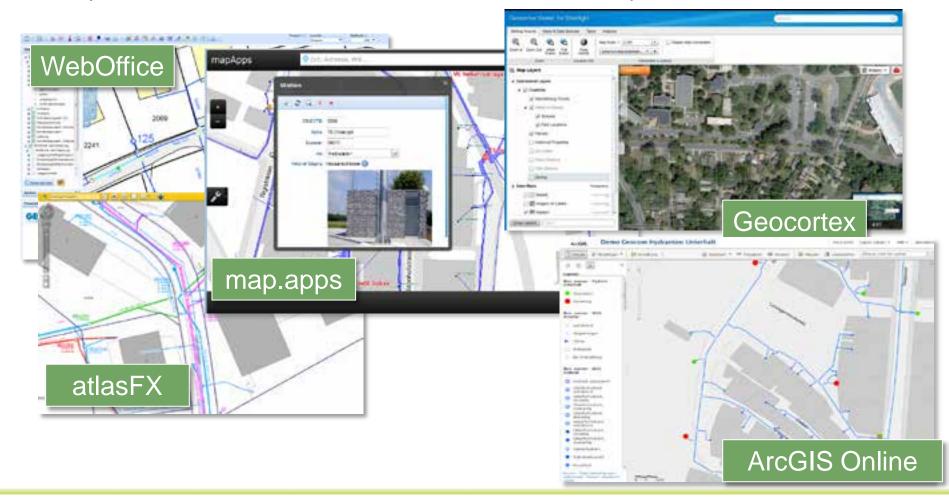

One Solution, Many Options

Enrichment WebGIS with GEONIS Core Functionality

Any solution can be enriched with GEONIS Core functionality

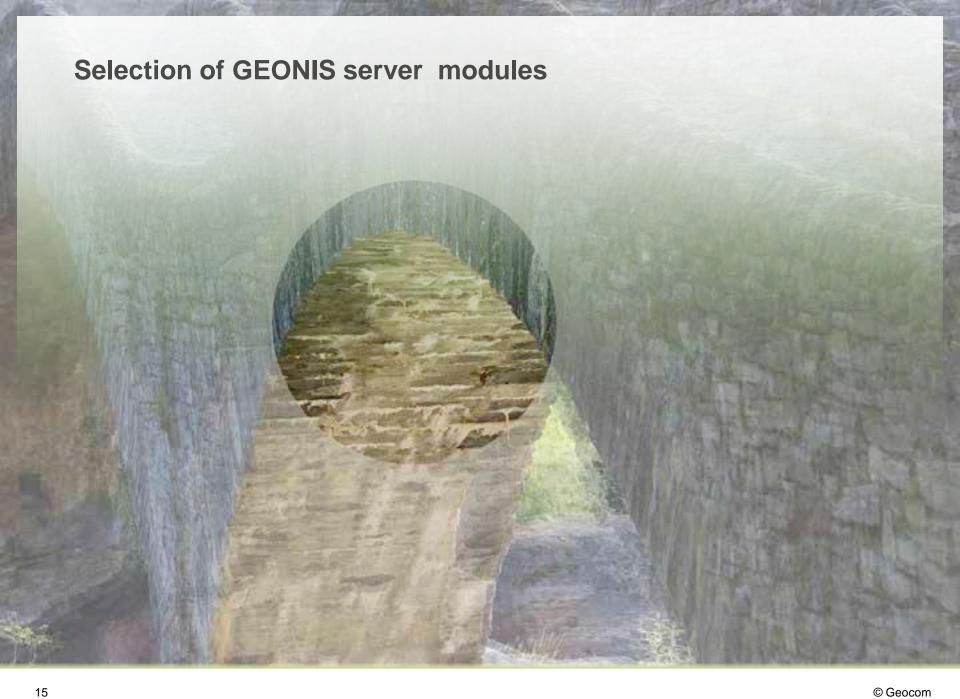

GEONIS server 6

- Enrich any system with GEONIS capability
- Leverage information across the enterprise
- Implement projects faster and more elegant
- Choose your desired device and technology
- Extend GEONIS server with your own functionality

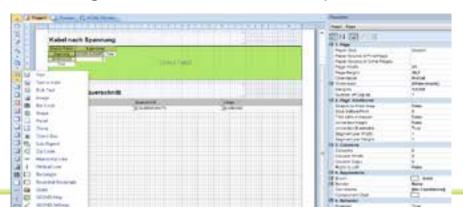

- Complete Services architecture (REST/SOAP), cloud-ready
- Compatible with ArcGIS for Server 10.2

GEONIS Reporting

- Delivers GEONIS report as pdf, word, excel, html etc.
- Uses GEONIS data provider to access one ore more Esri Geodatabases
- Includes maps, based on several map services (base map, operational layers)
- Configuration with GEONIS report editor

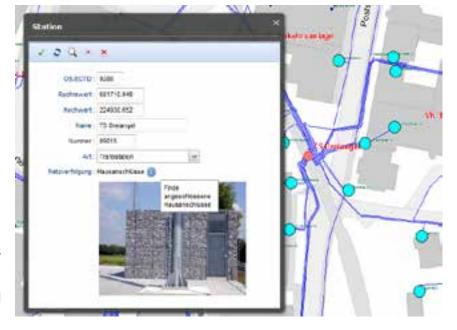

GEONIS Nettrace

- Runs nettrace on geometric networks
- Result:
 - Delivers resulting objects as JSON
 - Including geometry
- XML configuration

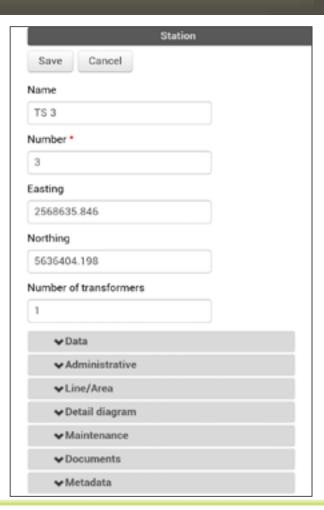

http://demo.geonisserver.com/GNS/latestStable/GEONIS.Server/nettrace/ele/ELE_DE_OWNER/query?where=networkid=finde_hausanschluesse_von_station%20and%20start_ids=2893%20and%20start_table=ele_station%20and%20result_table=ele_hausanschluss&returnGeometry=true

GEONIS Forms

Configure forms with xml

```
cedit title "Name" width "160">
   cfieldmanec/field
 cedit nitle="Number" required="true" signh="70" left="190">
   <field>item number</field>
  </edita
 <edit title="Easting" width="85" readonly="true">
   <freedsbbboords/fields
   clata format format type="float" format="0.000" />
  <edit title="Northing" width="85" left="$5" readonly="trus">
   cfielsygoogde/field>
   clata format format type="float" format="0.000" />
 cedit title="Humber of transformers" width="80" left="190">
   <fisid>cfisid>cfisid>manuformersc/fisid>
   spasts object source field="number transformers" source table="ele station" />
 </4845>
<eection title="Data" name="data I">
  Coombebox fittle" Telephone" width "filter "ide is not mull" order field "ide">
   <fi><fi>distance
   clookup tablebeles yesnoc/lookup tableb
   <lookup key>dode</lookup key>
   <lookip description e(/lookup desc)</pre>
   "pasts object source field" phone" source table "ele station" />
  </authobox>
 compabor title="Nonitoring" width="110" left="120" filtor="idg is not null" order field="idg">
   <field>monitoring</field>
   clookup_tablereles_yeenec/lookup_tabler
   <lookup key>code</lookup key>
   clockup description ec/lookup description
   «paste object source field="monitoring" source table="ele station" />
  c/ousbabeas
  <combobox title="Wey box" width="110" filter="idx is not mull" order field="idx">
```

GEONIS Forms

- Based on REST service "attributeeditor"
- Generic User interfaces for Browsers as part of the product
- Responsive design to be used on clients with different form factors

Anybody can build his own Interface based on the service

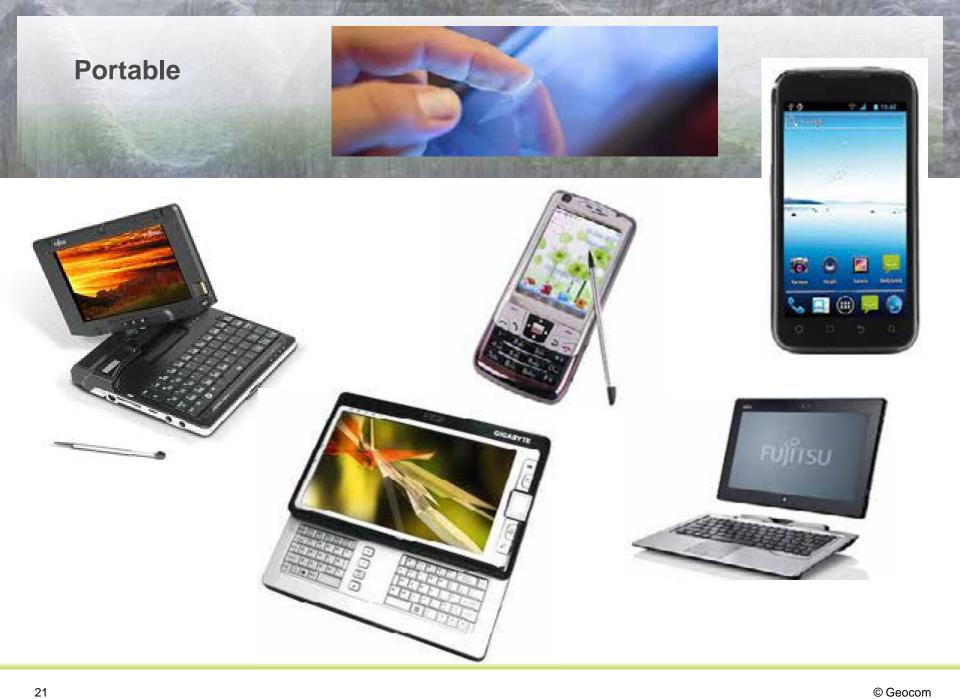

```
title: "Hausanschluss",
components: [
         title: "Name / Nummer",
         width: 160,
        height: 63,
         ismultiline: false,
         refId: "95f8f0c9-98fb-91ab-59f5-1fd0297e236d",
        controlType: "GEditBoxUI"
         title: "Bestimmung Lage",
         width: 110,
         refId: "ce8cc445-2d2e-bd7f-eala-fc51c7c6ad26",
        controlType: "GComboBoxUI"
         title: "Status",
         width: 110,
         refId: "6844d9d3-a402-5942-755d-38e6d163e820",
         controlType: "GComboBoxUI"
```

GEONIS rules engine

Define rules that will be executed during editing your data
 => On edit, on delete, on add

- Calculate values inside one or across multiple tables/featureclasses:
 - <volume>=<length>*<width>*<height>
 - <Featureclass1.name> = <featureclass2.objectname>
 - Etc.
- Manipulate objects depending on other objects:
 - Deleted related object if main object is deleted
 - Automatically create Annotations
 - Etc.

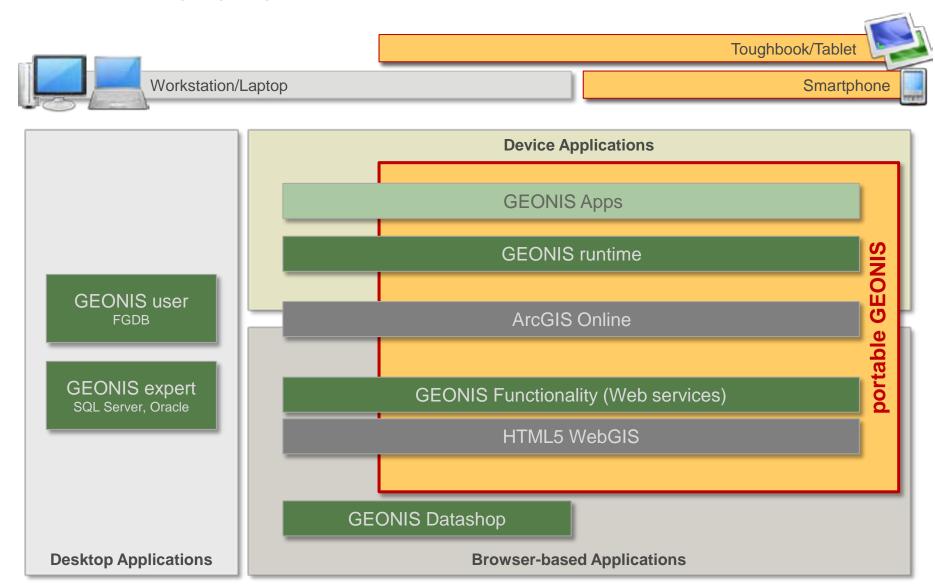

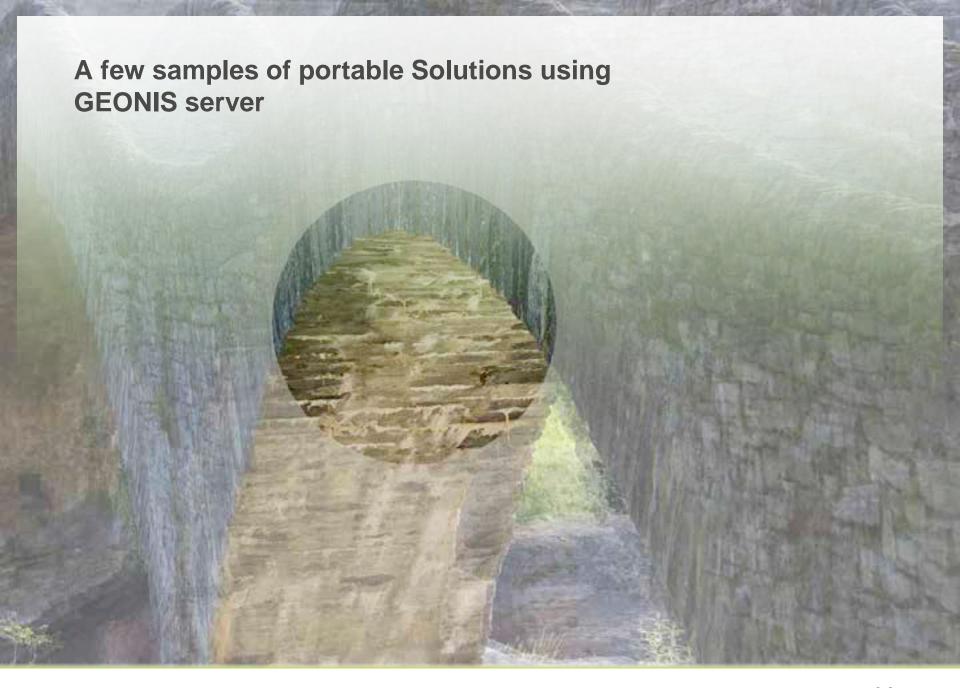

What does «portable» mean?

- Applications for mobile devices (Notebook, Toughbook, Tablet, Smartphone)
- Optimized user interface for small screens (4" 11")
- Interactions with touch screen
- Online and/or offline usage

Portable GEONIS

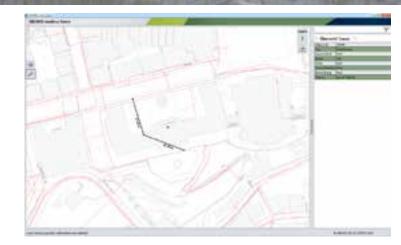

GEONIS runtime – offline solution

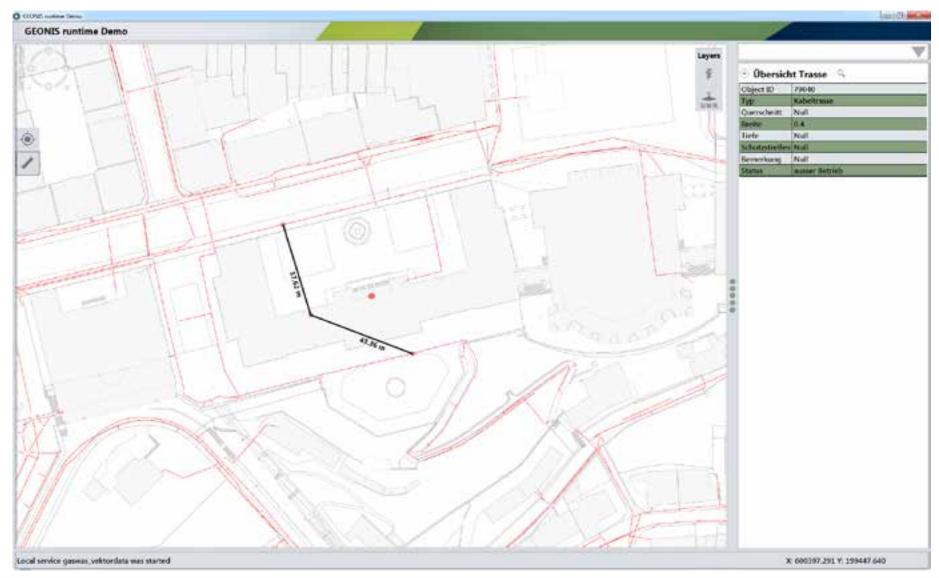

- Windows Application (.NET WPF)
- Optimized for portable devices (Windows 7/8 Tablets)
- Offline (no server required)
- Data preparation: Export Map Packages and Tile Packages

Example: Replacement of printed maps

=> Save many 10'000Euros per year

Example

map.apps

con terra

map.apps (by conterra, Esri Deutschland Gruppe)

- Advanced HTML5 WebGIS Solution
- Framework to build simple and smart html5-apps based on bundles
- Map.apps Builder for simple configuration
- GEONIS server bundle to integrate GEONS functionality

map.apps

Responsive design

WebOffice

WebOffice

- Advanced HTML5 WebGIS Solution
- Different GUI options for desktop or mobile browsers
- Fully configurable
- GEONIS server delivers advanced functionality:
 - Forms
 - GEONIS behaviours
 - GEONIS Reports
 - nettrace
 - and more
