2013 Esri Europe, Middle East and Africa User Conference

October 23-25, 2013 | Munich, Germany

Management of Building Restricted Areas

Claus Hüttermann, con terra GmbH

Business Process

for Air Navigation Services (BAF)

- Ask for specialist engineering analysis from each CNS operator.
- Send all necessary Files.

Local Building Authority

Engineering Authority

Engineering Authority

German Federal Supervisory Authority for Air Navigation Services (BAF)

Regional Aviation Authority

Business Process

Send back rejection or approval for every CNS facility (or approval with some requirements)

Regional Aviation Authority

- Only for german government?
- No, have a look at the european guidance material on managing Building Restricted Areas (ICAO DOC 015 from Sep 2009)

The Benefits

The Benefits

tion Services (BAF)

BRA infringed according to ICAO DOC 015?

- Self-service Webtool
- No-Infringement stops process!
- About 2.000 requests less every year!

Local Building Authority

Engineering Authority

Engineering Authority

The Benefits

- Workflowmanagement for all requests saves time
- Advanced GIS-Tools help to understand complex situations
- Full 3D modelling allow more precise statements

Engineering Authority

German Federal Supervisory Authority for Air Navigation Services (BAF)

Local Building Authority

Regional Aviation Authority

- Requirements
 - > Complete database of active CNS facilities

- CNS operators have to maintain the database via Webtool
 - >Manual input or
 - >CVS interface

Maintenance of CNS Facilities

- Only a few attributes are necessary
 - GeoLocation (WGS84 coordinates)
 - Height above NHN (Amsterdam)
 - Type of CNS facility

Some type-specific attributes

- Antenna Height
- Distance to runway

- ...

- What's happening "behind the scene"?
 - System stores CNS facility as 3D Point in Enterprise Geodatabase
 - System computes Building Restricted Area (BRA) as real 3D objects in Enterprise Geodatabase (as multipatch)

Management of Building Applications

Let me show an example with the help of a flipbook

Let's start here at the Regional Aviation

Management of Building Applications

- What's happening "behind the scene"?
 - Much GIS J
 - Construction of the building (3D-Multipatch)
 - Prefilter BRAs within a distance of 25km around the building (2D)
 - Calculate intersections with BRAs and according distances from Pre-Filter (3D)

Ergebnis der Prüfung der Stufe 1 gemäß ICAO EUR DOC 015 / AU 51:

Das Ergebnis der Prüfung gemäß ICAO EUR DOC 15 /AU 51 ist rechtlich nicht verbindlich, die L Detail-Report (PDF) eigenständigen Validierung der Ergebnisse verpflichtet!

Anlagenschutzbereich betroffen (Status rot)

Zusammenfassung

)		
CNS-Betreiber	ES-Anlagen	des Anlagenschutzbereiches	Anzahl FS-Anlagen mit Distanz des Anlagenschutzbereiches zum Bauwerk > 0,5 <= 20 km
DFS	1	3	15

Situation im Umkreis von 20 km um das Bauwerk:

The Future

The Future

- A public WebApp for visualisation of BRA in Germany
 - based on con terra's product map.apps
 - Already Released !!!
 - (http://www.anlagenschutz.baf.bund.de/mapapps/resources/apps/anlagenschutz_v2/index.html)
- A big enlargement of the coverage of the Business Process
 - Includes document management
 - Automatic creation of documents (with digital signature)

The End

- More Info
 - Case Study
