# Children's National Health System, Washington, DC

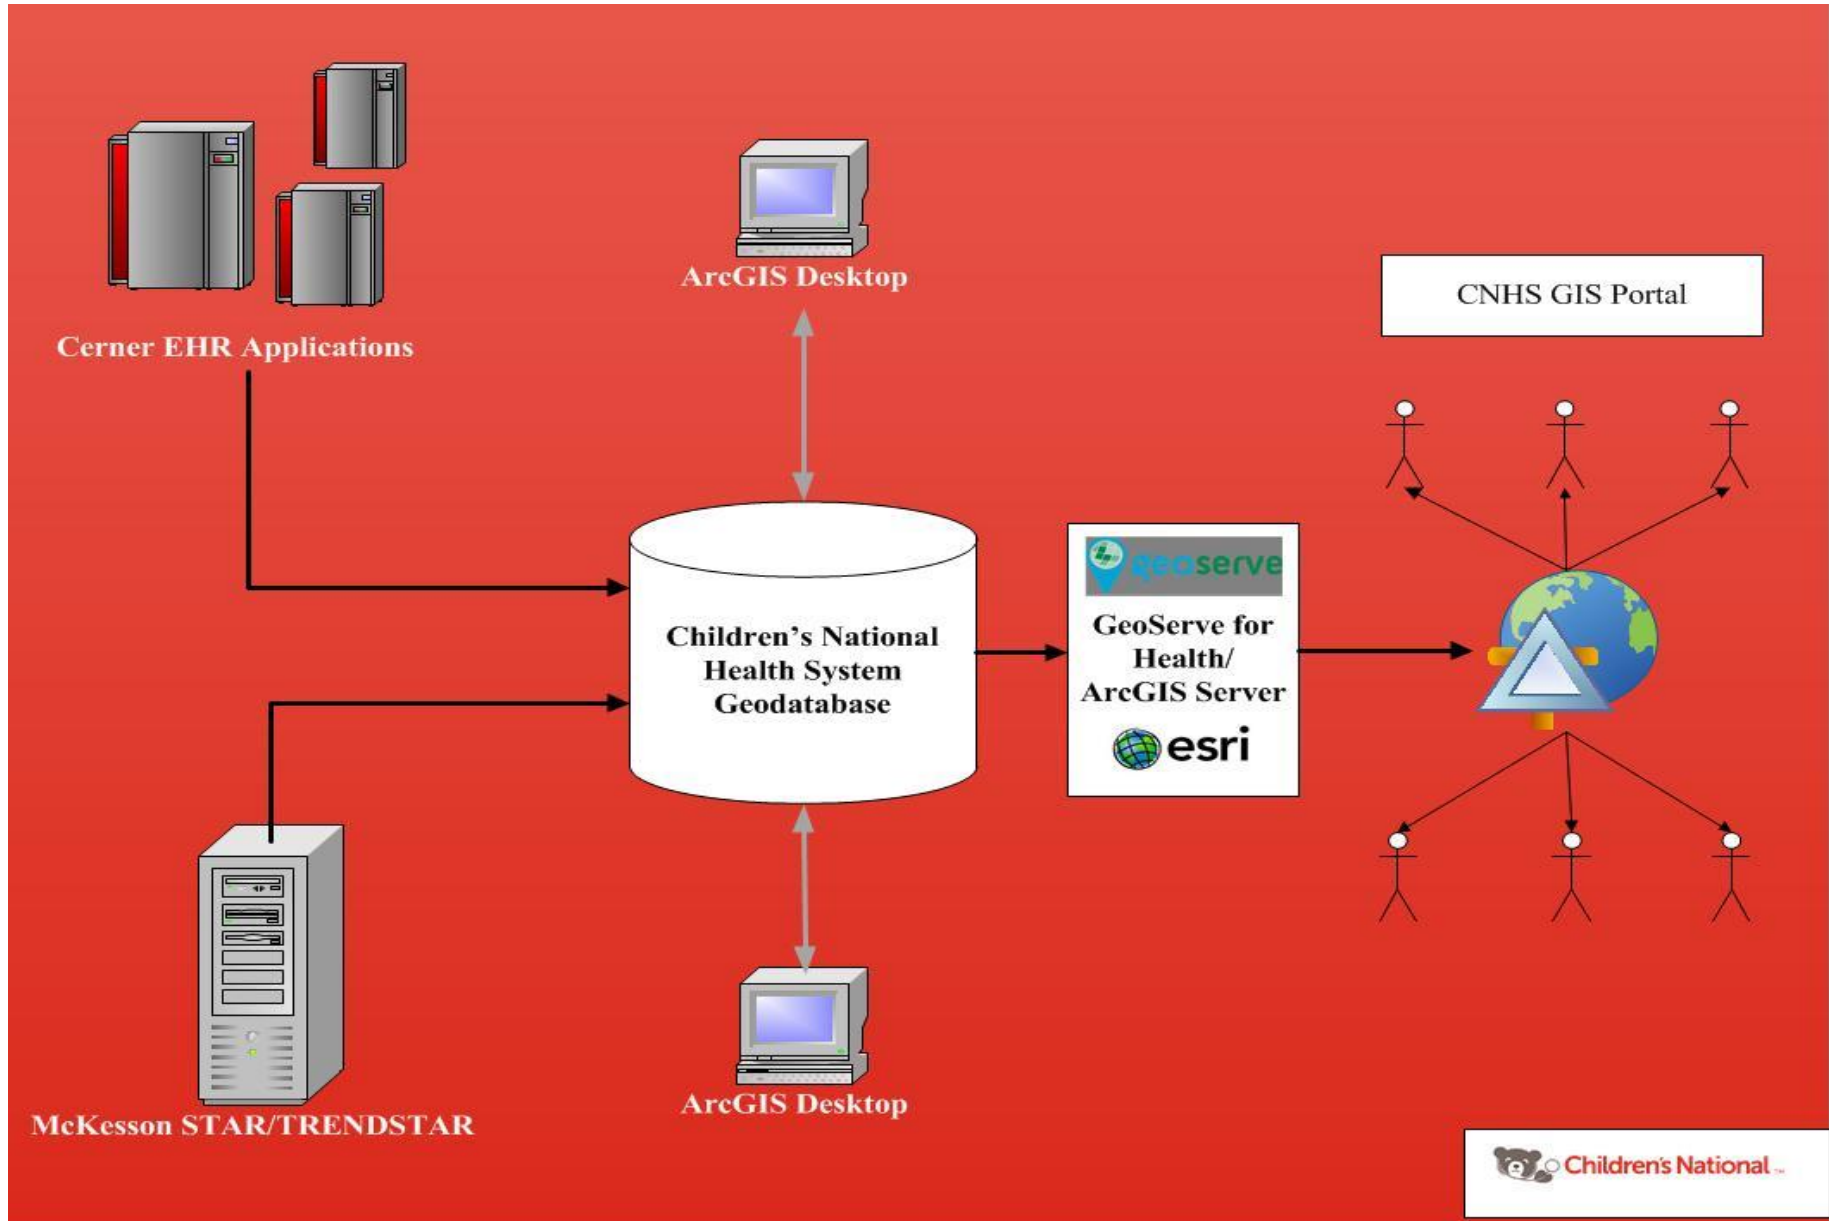

## Legend

### Children's National Locations

- Children's Pediatricians and Associates
- Goldberg Center
- ◆ Pediatric Specialists of Virginia
- ◆ Regional Outpatient Center
- H Sheikh Zayed Campus

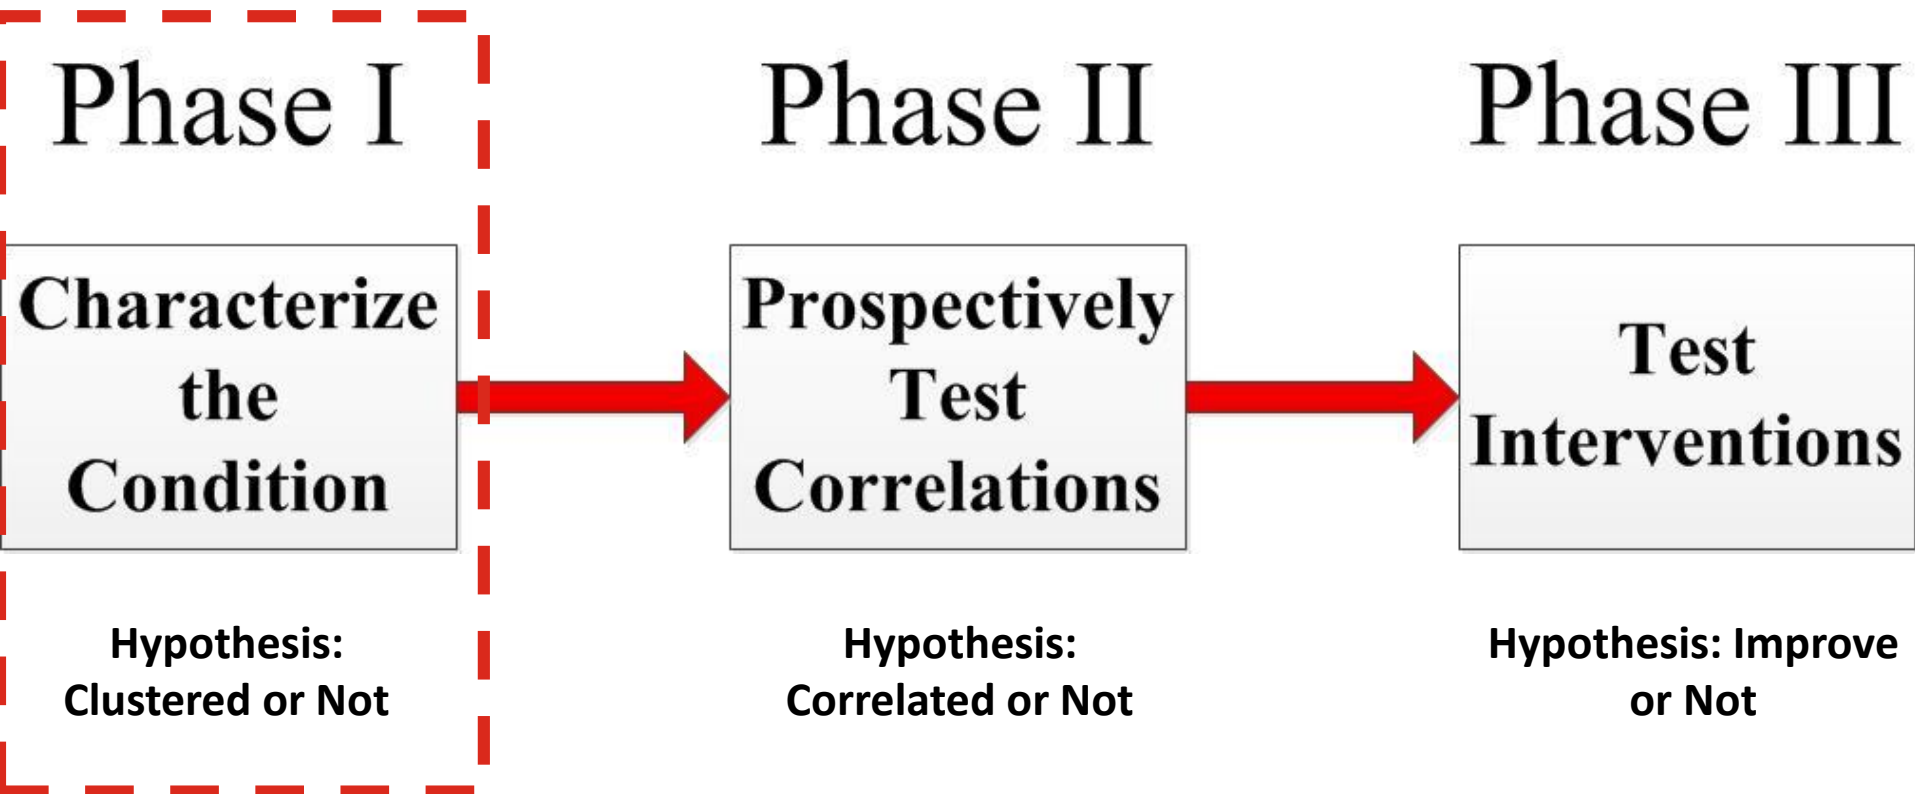

# CNHS Enterprise GIS

# Methodological Hurdles

# Geospatial Research Process

## Integrated Team Approach

# Rooftop Geocoding

## CNHS Rounding Method

## CNHS Rounding Method

## Person vs. Visit Level Readmissions

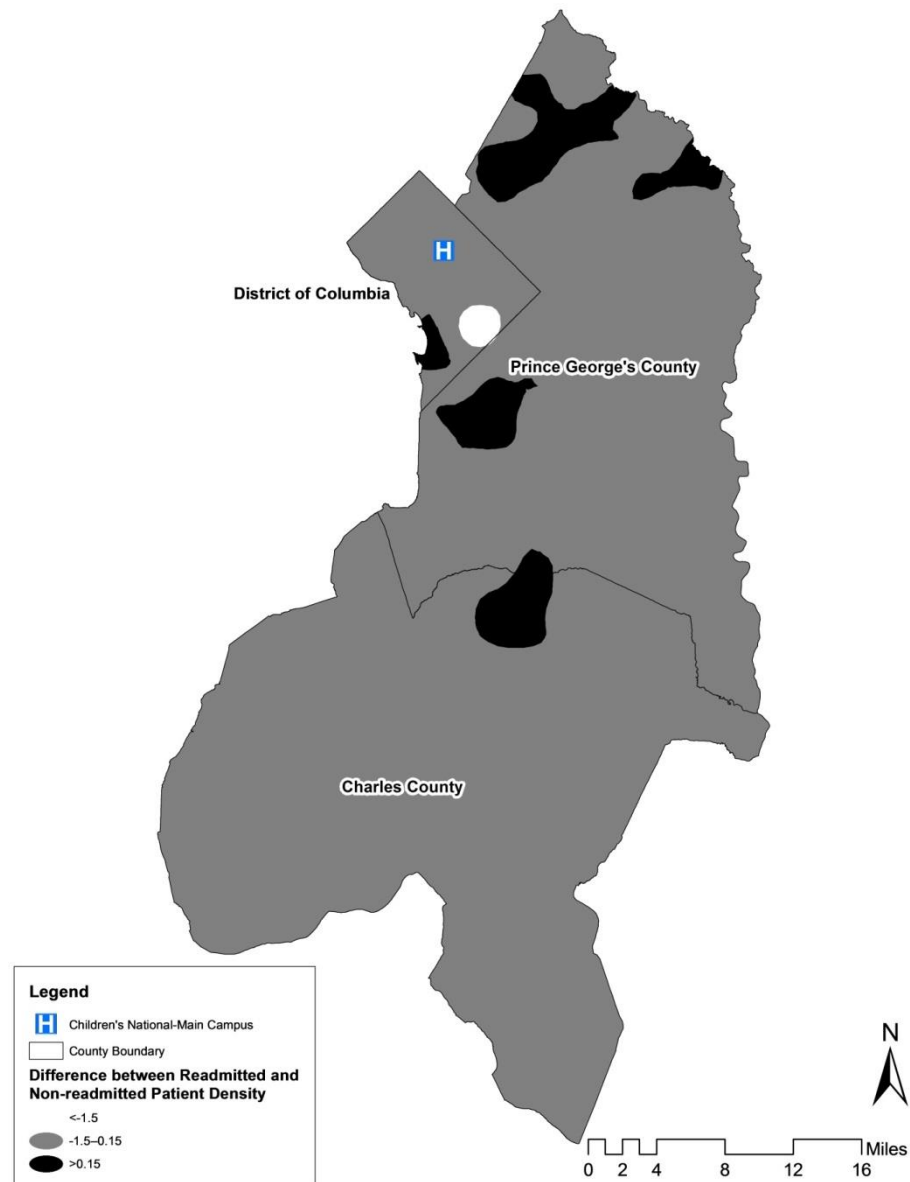

# Specific Condition Exploration

# Sickle Cell Disease Crisis

- Sickle Cell Disease
  - Hemoglobinopathy
    - Chartered by intense pain crises
  - Distinct clinical indicators (pain score, narcotics use, etc.)
  - Suggested environmental geographic indicators
- Evaluation Sample
  - Inpatient admissions to Children's National with SCD Pain Crisis between January 1, 2010 and December 31, 2012
    - SCD Pain crisis determined using both ICD-9 and SNOMED
  - 373 total validated patients over three years

# Variability between Readmitted and Non-Readmitted

# SCD Crisis Readmissions Have a Geographic Aspect

## 30-Day Readmission Model (Concordance Rate: 76.6)

Model Variables	Coefficient Estimates	Adjusted Odds Ratio (95% CI)
Length of Stay (Per day)	-0.1526	0.858 (0.772–0.954)
Age (Per year)	0.0577	1.059 (1.013–1.108)
Hospital Utilizations in Previous 12 Months (Per utilization)	0.2470	1.280 (1.154–1.421)
Admission Pain Score $\geq 7$	0.7310	2.077 (1.234–3.497)
Discharge Pain Score $\geq 4$	0.4581	1.581 (0.907–2.756)
Residence within 5 miles from CNMC Main Campus	-0.7759	0.46 (0.256–0.827)

# Acute Bronchiolitis

## Acute Bronchiolitis Readmissions

- Evaluation Sample
  - Inpatient admissions to Children's National with SCD Pain Crisis between January 1, 2009 and December 31, 2013
    - Determined using both ICD-9 and SNOMED
  - 5,016 total validated patients
    - 720 Same Diagnosis Readmissions (365 days)

## Acute Bronchiolitis Readmissions

# Possible Readmission Indicators

- Access to appropriate care
  - Health System
  - Transportation Infrastructure
- Climatologic Indicators
  - Temperature fluctuation
  - Cloud cover
- Environmental Quality Indicators
  - Smog
  - Pollutant presence
  - Proximity to pollution creators

# Broad Scope Readmissions

### Pediatric Summary

ZZ, GOLOVE DAYINE

**Allergies (4)** +
 

All Visits
 Apple Juice
 penicillin
 Almond Oil
 Dextrose 5% in Water

**Medications Loaded**

Selected visit

**Home Medications**

All Visits
 Hx: ibuprofen (Children's)

**Patient Information**

\* Indicates a day without a full 24 hour measurement period

**Diagnoses (36)**

Selected visit
 Abdominal pain (36112013)
 Addendum (36112013)

**Lines, Tubes, and Drains (0)**

**Oxygenation and Ventilation**

Last 36 hours for the selected visit

**Microbiology (Non-Cerner) (0)**

**Pathology (0)**

### Sickle Cell Disease Crisis Readmission Risk Assessment

Length Of Stay:	1 Days
Total Hospital Utilizations:	2
Admission Pain Score	8
Most Recent Pain Score	3
Distance from Home to Hospital	10 mi

**Risk for 30-Day Readmission: !!!**

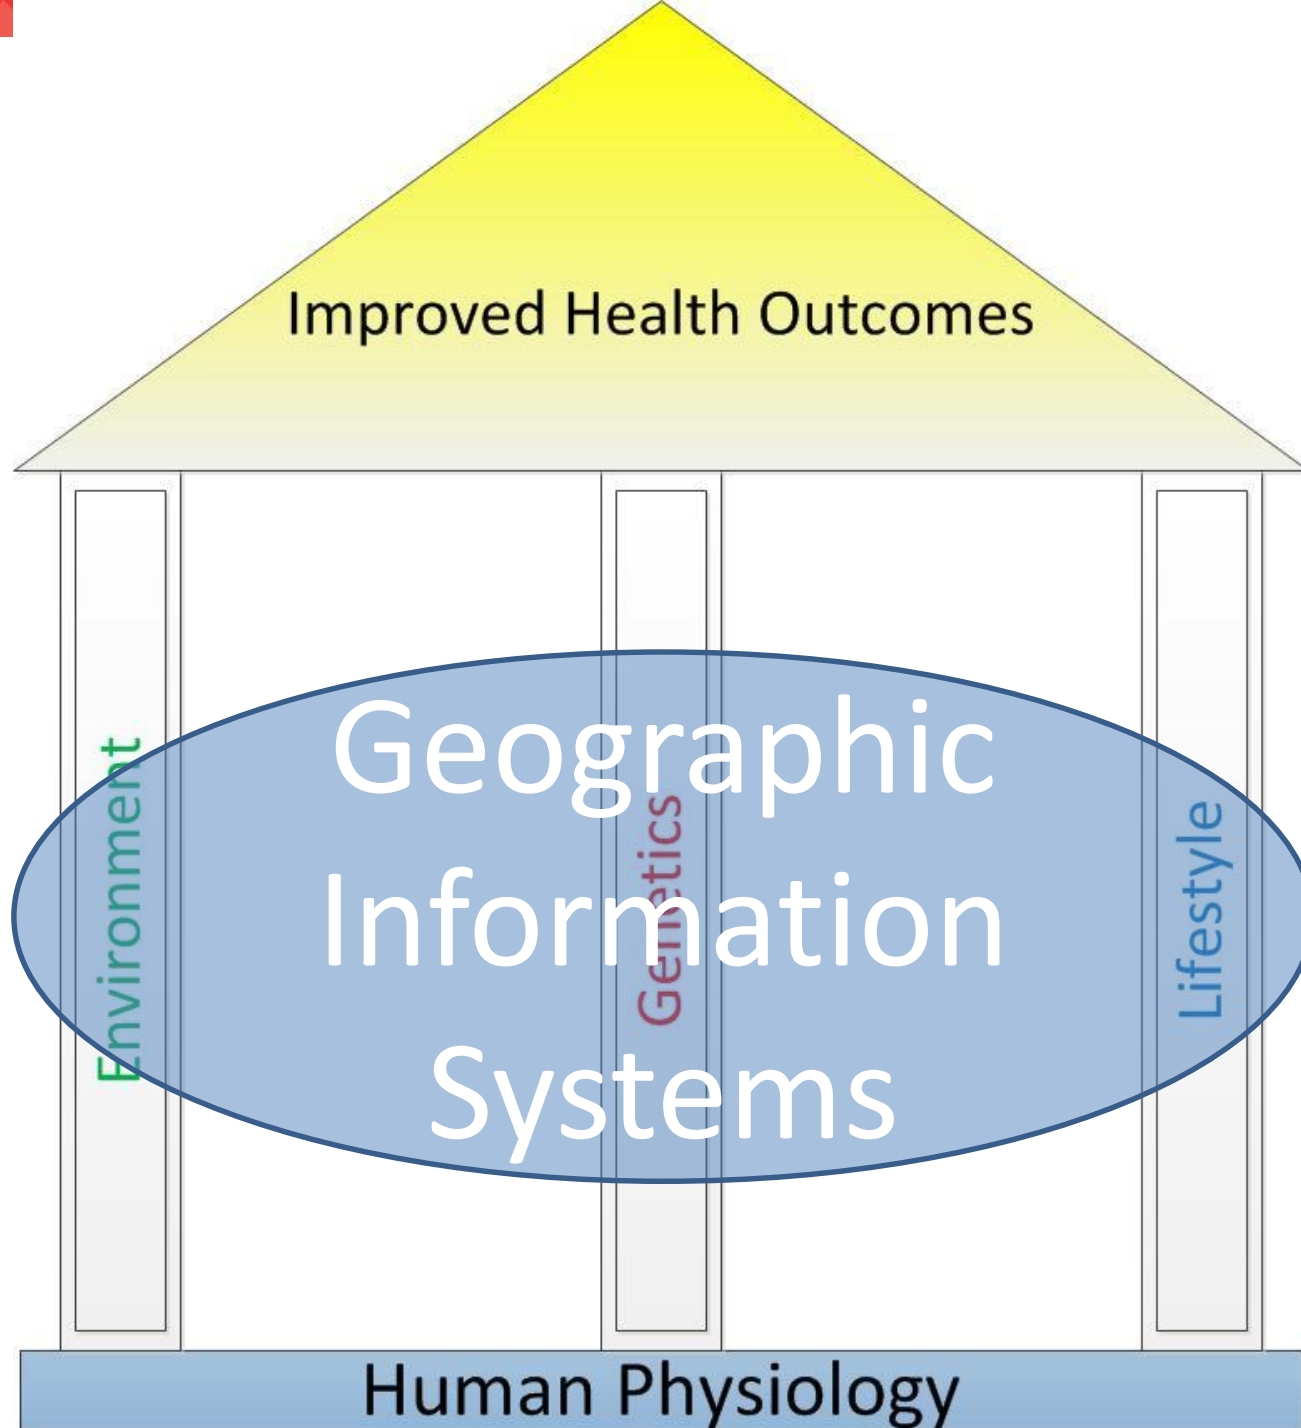

Return to Chart

Continue to Discharge

## Future of Readmission Evaluation

- Prospective model testing
- User Interface Design and Testing
- Outcomes Measurement
  - Reduced readmission rate
  - Improved patient satisfaction
- Model refinement and testing
