# Street View Widget

The screenshot shows a map interface with a Street View widget overlay. The widget is a dark grey box with a title bar that says "Street View" and a close button. Inside the widget, there is a small Street View icon in the top left corner. The main text inside the widget reads: "Click on map to view dual images." Below this, there is a section titled "Select content form:" with a dropdown menu currently set to "Dual Viewer". Underneath, there is another section titled "Select window to open content:" with a dropdown menu currently set to "Open in Flash". At the bottom of the widget, there is a line of text: "Content provided by MapChannels.com" and another line: "Widget Developed by Frank Roberts".

Street View

Click on map to view dual images.
