

Managing Assets at the Local Level

*E. Thomas Hicks IV, Assistant Executive Director and
Chief of Programs and Technology, International
Association of Fire Chiefs*

Mutual Aid Net

Managing Assets at the Local Level

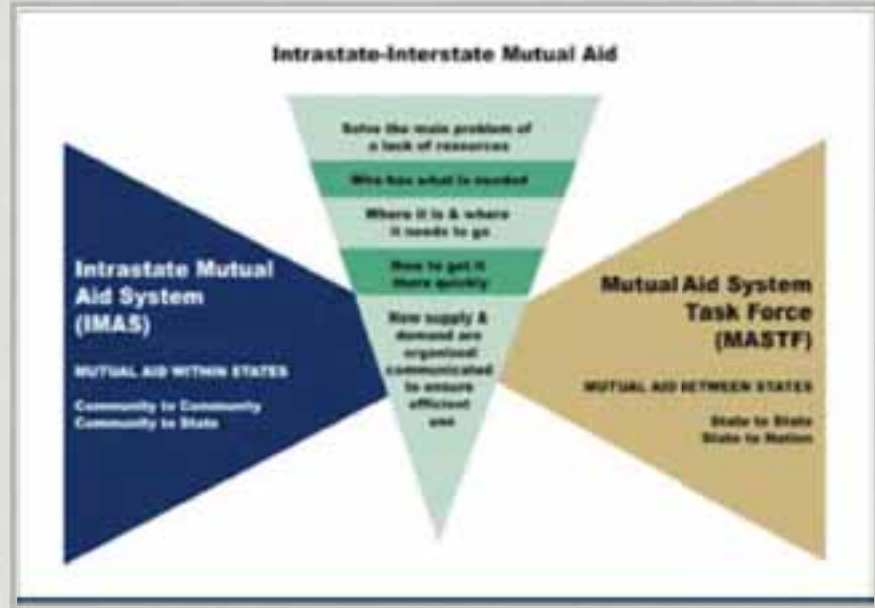

The Story of Mutual Aid Net

The Start

MutualAidNet is a statewide resource database and dispatch system used to catalog, locate and deploy the closest and most appropriate resources.

A system that is accessible to all Department/Agencies that are involved

Journey Begins

How Do we bring value to an existing system and leverage the changes in Technology

Value

- A master list of typed resources managed with and at the local level
- Includes both Tier-I and Tier-II resources
- Started with just ESF-4 assets and has grown
- Provides a single database to catalog and manage all the required information needed to facilitate the statewide deployment of mutual aid resources
- Accessible to all users

What are the numbers?

- Department/Agencies
 - 9,640
- Contacts/Users
 - 4,978
- Resources
 - 39,568

Functionality

- Resources By department/agency
- Provides POC for each
- Allows for opt out of deployments
- Manages request for assistance
- Recommends closes
- Alerts users
- Tracks deployed resources
- Displays open activations
- Customized access Levels
- Builds pre-defined Strike Teams and Task Forces
- Manages Mission Ready Packages (MRP) to support a roll up

Building the Next Generation

Policy and Governance

You don't know what you don't Know..... BUT

I Do Want This

Where are we?

Next Generation

MUTUALAIDNET

Home - Organizations - Training - Documentation - Get Involved - Contacts - Login

Access Current Activations

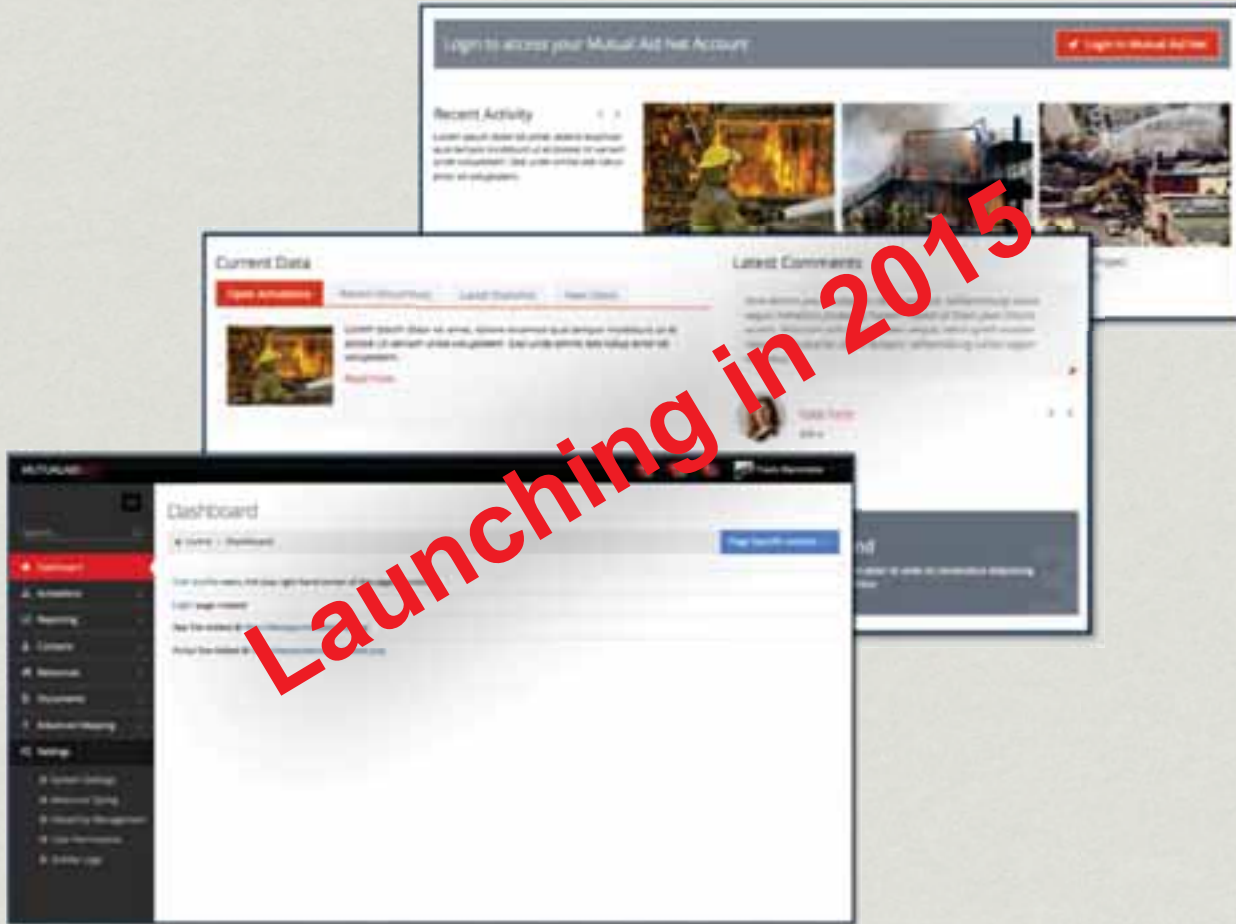

Generate Reports

View Active Event Discussions

Lihat lokasi donor di area, detail event di setiap wilayah di area di mana anda membutuhkan. Saat anda ingin melakukan aksi di wilayah.

Features

- Manages resources at the resource level
- Customize notifications al a carte
- Advance real time mapping integrated with Geospatial capabilities
- Credential
- Fully responsive
- Provide integration in National integration
- Customized AAR and reports
- Functionalities identified at the grass roots level of service providers

Deployment of an ID Management System

Provides a single sign on and secure access point allowing cross discipline and multi-agency access to authorized users.

Creates a gateway that gives 3rd party API access to leverage other systems.
