Abstract

**Building a Consolidated Law Enforcement Geographic Information System**

**Track:** Law Enforcement and Criminal Justice

**Author(s):** David Broyles

The Marine Corps uses MCO 1630.4a Law Enforcement Physical Activity Report (LEPSAR) as guidance and form NAVMC 11197 to submit criminal, traffic, and other statistical information to HQMC. Since 1991, the Marine Corps has populated the NAVMC 11197 by performing a manual count of archived documents, including traffic citations, incident reports, accident reports, etc. Collecting, categorizing, and counting the data for this annual report is labor intensive and requires large storage areas. The finished product for this project is a Web-enabled (ArcIMS) interface that displays statistical information about crime, traffic, hyperlinks to live video and other areas of high interest to the Marine Corps occurring aboard Marine Corps Bases worldwide.
