Abstract

County Taxmap Plotter and Editing UNIX ArcStorm Layers From NT Track: Cadastral and Land Records
Author(s): Shaoli Huang

Property ownership boundaries for our county parcel taxmaps are drawn on paper maps and changes are still done by hand drafting. About ten years ago our county implemented a computer database for parcel mapping. Since then, we've had to maintain both the computer-based map and the paper-map system. We could have printed maps long ago but there is a strong desire to have the computer taxmaps mimic the format of the hand-drafted maps. A custom printing program was written to plot taxmaps. There have been many technical challenges over the years in moving from VMS to UNIX to Windows NT.
