Abstract

The Monroe County Property Appraiser's Office and the Keys to Success
Track: Cadastral and Land Records
Author(s): Rob Shaw, Brian Sovik

Monroe County's Property Appraiser's Office (The Florida Keys and Everglades) has undergone some extreme changes since the inception of land management in the county. Today, Monroe County has stayed up with the times and would like to share our experience with Geographic Information Systems. The key to a successful GIS has come with time and experience as well as maintaining a balance between Property Appraisal responsibilities and responsibilities which serve the greater good of the county as a whole.
