Abstract

Integrating ArcIMS Web Services Into E-Government: The Commonwealth's (of Mass) Shared GIS Services
Track: State and Local Government
Author(s): Adam Hocherman

The e-government vision for the Commonwealth of Massachusetts considers GIS a key infrastructure component. The vision has come to life in the form of shared GIS services—a statewide Web services infrastructure backed by ArcIMS. Operated by MassGIS, the shared GIS services support a variety of applications now accessible via the Mass.Gov portal. Learn how standard XML interfaces provide Web developers at the Commonwealth the ability to add customized maps to their applications quickly, cleanly, and with just a good knowledge of standard scripting techniques. This talk will explore how to set up the GIS Web services architecture using ArcIMS and considerations for integrating that into a statewide portal.
