Abstract

The Web GIS Prototype for Local Government Management
Track: State and Local Government
Author(s): Fregonese Luigi, Monti Carlo, Monti Giada

This paper describes the methodologies applied in the small municipality of Erba, Italy. The Web GIS is the right instrument to build different levels of interrogations: process of conservation, management of the technologic network, synergies between public and private organizations, data transfer for local client in the public organization and remote client (public or private).

The Web GIS on line prototype is set up with ArcInfo, ArcSDE, Oracle, and ArcIMS.
