Abstract

**Investigating Runoff Source Area for an Irrigation Drain System Using ArcHydro Tools**

**Track:** Education  
**Author(s):** Richard Ashe

This study is a pilot project for the GIS Initiative being conducted for the Regional Water Quality Control Board, Colorado River Basin, in Palm Desert, California. The project will demonstrate the hydrographic data management and analysis tools in Arc Hydro by linking water quality monitoring sites with management practice data for upstream areas along an agricultural drain system.
