Abstract

BLM ePlanning: The Enterprise Land Management Planning Architecture
Track: State and Local Government
Author(s): Katherine Harness, Carl Zulick

The BLM has launched the "E-Gov for Planning and National Environment and Planning Agency (NEPA) Project," or "ePlanning." Partnering with ESRI, BLM has recently completed a pilot project to build a common planning data model and core land management tools for the BLM enterprise. ePlanning is a current initiative focusing on the delivery of planning information consisting of fully integrated text with intelligent and interactive maps and map layers. ePlanning establishes a new mechanism for land use planning that allows for an openly participative, collaborative, and community-based land use planning system envisioned in the BLM planning manual.
