Abstract

ArcCadastre Implementation at Land Survey of Sweden
Track: Cadastral and Land Records
Author(s): Tomas Falk

The paper is a brief introduction to the Swedish cadastral system. Land related organizational structure, legislative, and procedural issues of property information, land conveyance, rights to land, and the characteristics of relevant registers will be discussed. Additionally, current development trends, new technical solutions, and revisions of law will be described. The presentation will also cover the development and nationwide implementation of ArcCadastre at Land Survey of Sweden.
