# 1. Vision and Strategies of Housing and Urban Informatization

## 1.1 Vision and Strategies

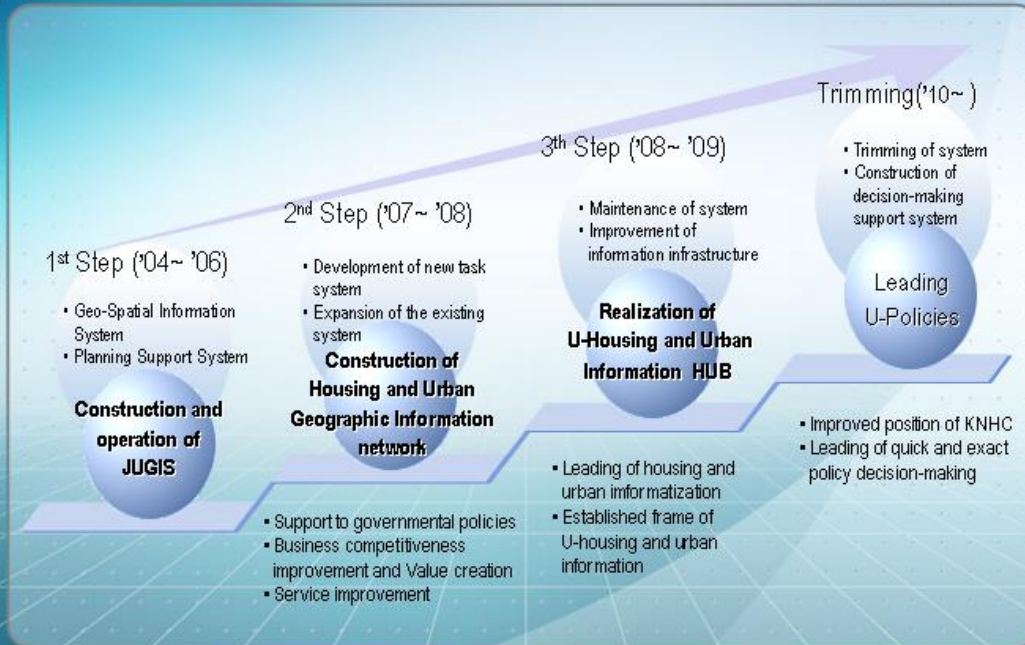

# 1. Vision and Strategies of Housing and Urban Informatization

## 1.2 Objective Image

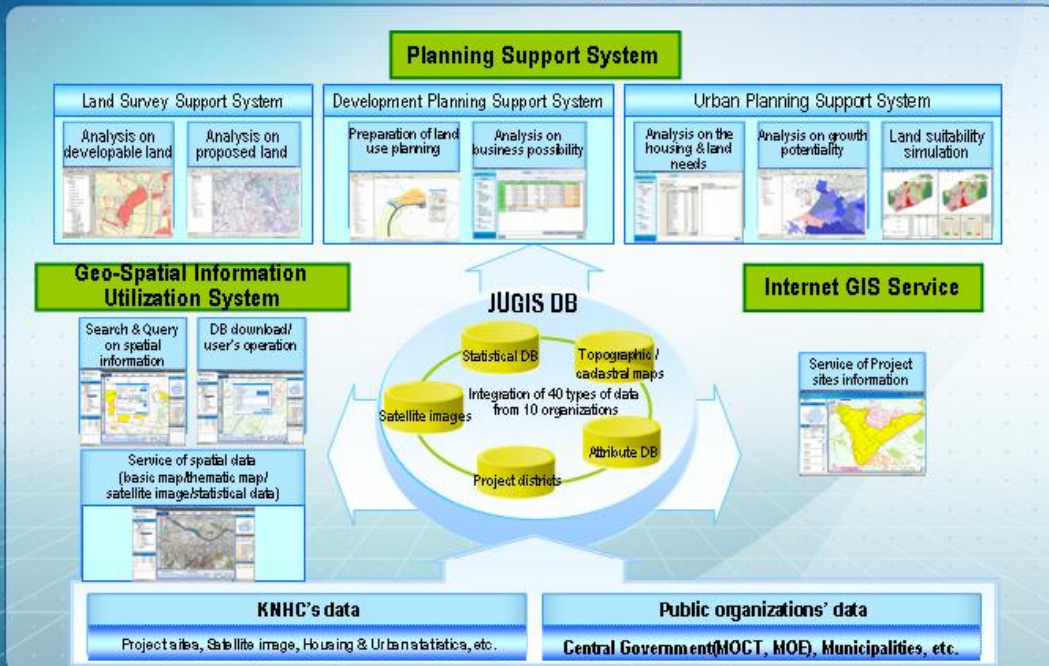

# 1. Vision and Strategies of Housing and Urban Informatization

## 1.3 Phases of Implementation

# 2. JUGIS I

## 2.1 Configuration of the System

## 2. JUGIS I

### 2.2 Geo-Spatial Information Utilization System

#### Three-dimensional map

- Three-dimensional topography

#### Satellite image service

- Satellite image with high-level resolution (QuickBird)
- SPOT satellite image
- LANDSAT satellite image

#### Statistical service

- Housing and urban statistics
- Urban planning statistics
- Year book of Housing and Urban statistics

#### Base map service

- Topographic map
- Cadastral map
- Urban management planning map

#### Thematic map service

- Land data (KLIS)
- Environment/agriculture data
- Land use regulation data

#### Project site information service

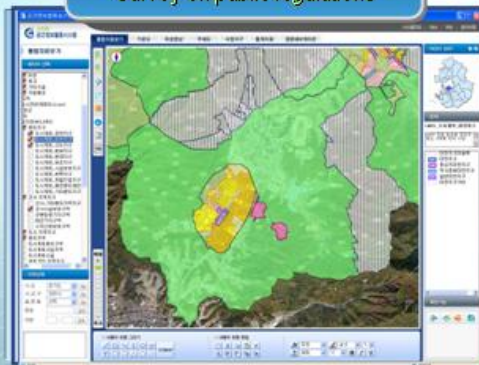

- General information
- Progress status
- Related libraries

## 2. JUGIS I

### 2.2 Geo-Spatial Information Utilization System

Geo-Spatial Information Utilization System

#### Survey on public regulations

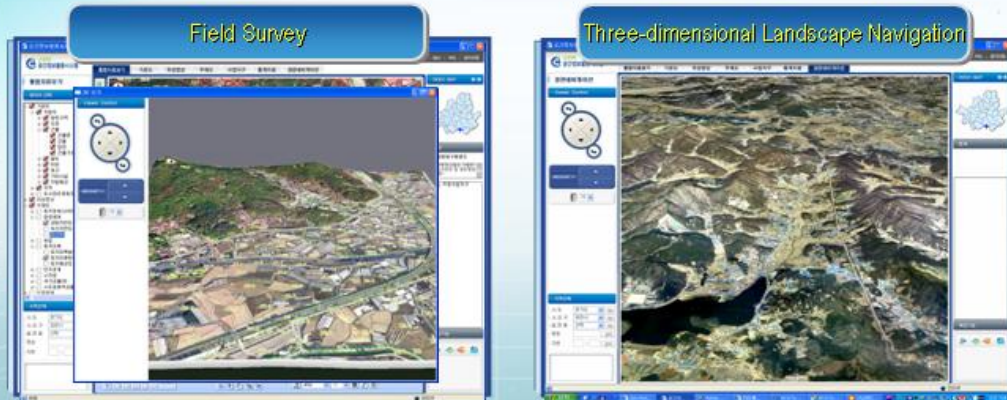

#### Survey on natural environment

## 2. JUGIS I

### 2.2 Geo-Spatial Information Utilization System

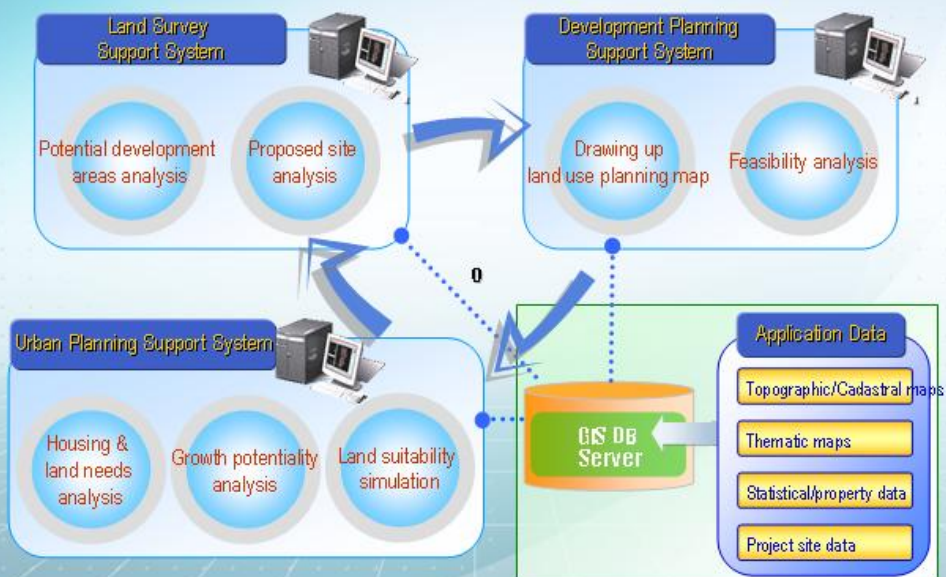

Geo-Spatial Information Utilization System

## 2. JUGIS I

### 2.3 Planning Support System

Structure of the system

## 2. JUGIS I

### 2.3 Planning Support System

#### Main screen

##### Potential development areas analysis

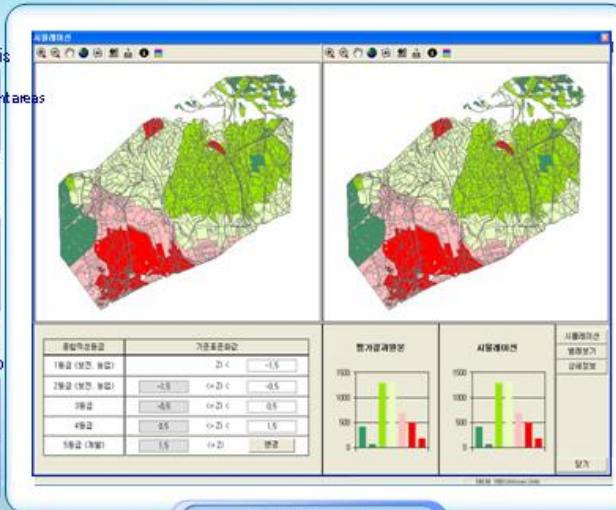

- Simulation on Potential development areas
- Analysis on exclusion/coincidence of spatial information

##### Proposed site analysis

- Analysis of statistical and geographic data
- Analysis of the priority of the proposed site considering circumstances

##### Drawing up landuse planning map

- Auto-preparation of land use plan and housing plan with spatial data
- Analysis of three-dimensional landscape

##### Land suitability simulation

- Land suitability assessment
- Analysis on data of managed land

##### Growth potentiality analysis

- Spatial information + statistical analysis
- Evaluation of growth potentiality

##### Housing & land needs analysis

- Analysis by District/zone units
- Consideration of various planning factors

##### Feasibility analysis

- Application of both cadastral map and notified land price
- Automatic calculation of land cost
- Suitability analysis through business simulation

## 2. JUGIS I

### 2.4 Application in the Process of New Town Development

#### Institutions of new town development

##### 1. Related Regulation

the Act of Housing Site Development Promotion

##### 2. Objectives

The development and supply of housing sites necessary to construct houses for solving the problem of site shortage in urban areas are;

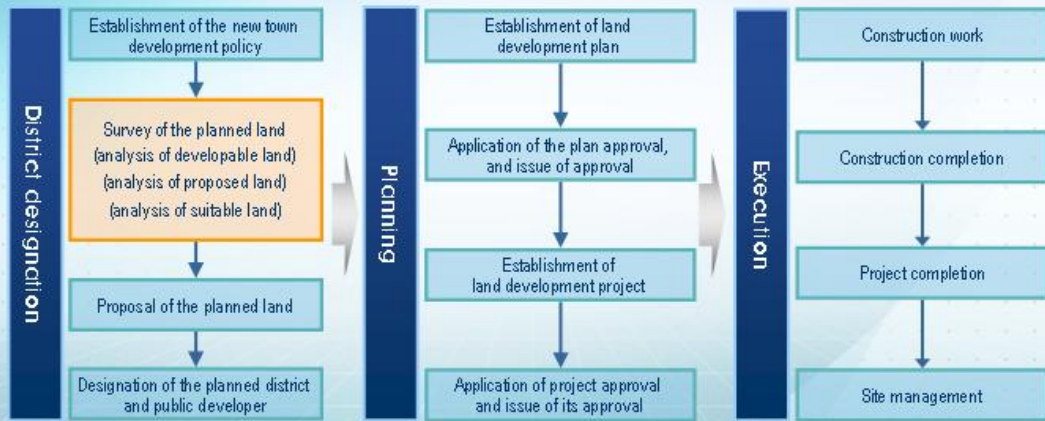

- To contribute to improving the national housing stability and welfare
- To expand the urban infrastructure including roads, train, etc.
- To induce the balanced national development with development profit reinvested to the public section
- To prevent the speculation in real estate and encourage the stability of land price with the large development of public housing land

### Feasibility analysis

The screenshot shows a web browser window displaying a report titled '사업성분석 보고서' (Feasibility Analysis Report) for the '연습용지구' (Practice Area) project. The report includes the following information:

- 작성일자: 2006년 10월 7일 금요일 (Creation Date: 2006 Oct 7, Friday)
- 출력일자: 2006년 11월 10일 목요일 (Output Date: 2006 Nov 10, Thursday)
- 가. 토지이용계획 및 주택건설계획 (Land Use and Housing Construction Plan)
- 토지이용계획 (Land Use Plan)

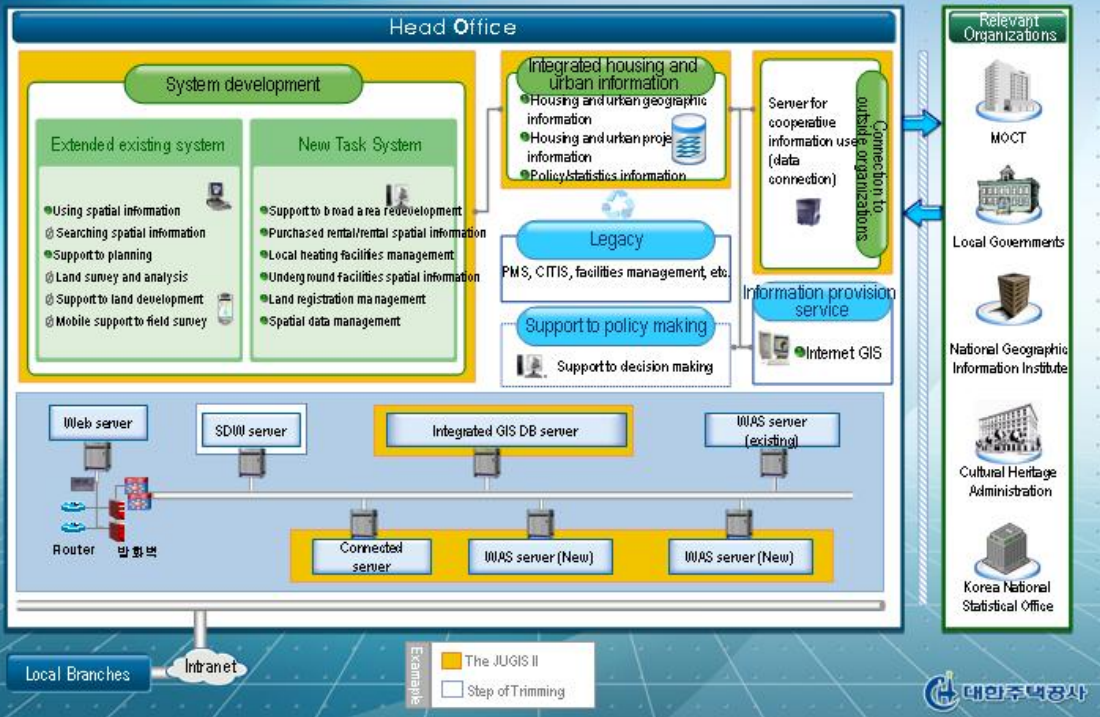

순번	토지이용구분	공간용역	개발방식	면적(㎡)	면적비율	가치분류부
1	아파트용지(60㎡이하)	국민임대	자재건설	106.80	12.59%	○
2	아파트용지(60-65㎡)	분양	자재건설	100.60	11.66%	○
3	아파트용지(65㎡초과)	분양	합동개발	26.12	3.25%	○
4	연립용지(60-65㎡)	분양	자재건설	22.71	2.63%	○
5	연립용지(65㎡초과)	분양	합동개발	21.35	2.47%	○
6	단독주택용지			41.35	4.78%	○
7	근린생활시설용지			8.12	0.94%	○
8	상업용지			26.51	3.07%	○
9	도로			141.79	16.40%	X
10	주차장			49.33	5.71%	○
11	여원이공원			14.96	1.73%	X
12	근린공원			79.00	9.14%	X
13	녹지			99.70	11.53%	X

On the right side of the screenshot, there is a table comparing 2007 and 2009 data:

2007	2009
12,770.94	4,399.30
13,415.00	524.00
13,437.32	20,768.32
1,222.95	1,427.19
<b>49,245.91</b>	<b>27,492.27</b>
-	4,799.16
-	-
-	-
93,871.22	4,520.87
63,291.89	24,452.32
59,721.29	12,349.47
-	12,219.25
4,522.04	15,132.02
-	-

# 3. JUGIS II

## 3.1 Structure of the System

# 3. JUGIS II

## 3.2 Main Contents

### ■ Broad-Area Redevelopment Project Support System

- Analysis on the proposed sites and infrastructure cost, Simulation of sharing urban infrastructure cost

[사업후보지분석]

### ■ Local Heating Facilities Management System

- Management of facilities and houses, early detection and treatment support of disorder, etc.

[열배관 시설물 관리]

# 3. JUGIS II

## 3.2 Main Contents

### ■ Support System of Purchased Rental / Rental Housing Information

- Search and query of applied buildings, support to occupants and housing management

[입주자 및 주택관리]

### ■ Facilities Spatial Information System

- Support of facilities management, establishment of the underground facilities DB, and its management guideline

[시설물도면 DB구축]

# 3. JUGIS II

## 3.3 Application in Urban Redevelopment Process

### Institution of Urban Redevelopment

#### 1. Related Regulation

the Special Act for Urban Redevelopment Facilitation Project

#### 2. Objectives

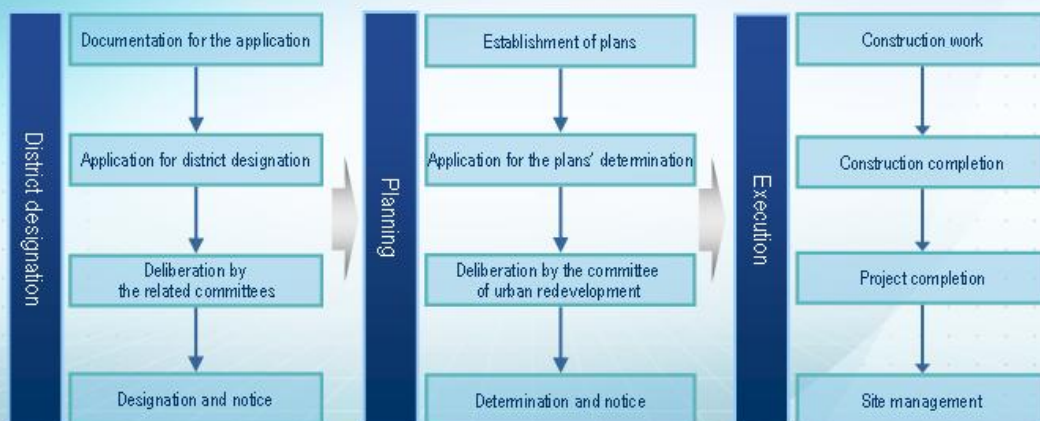

The institution to support urban-redevelopment facilitation projects for the purpose of improving residential environment, extending infrastructure sufficiently and restoring the urban functions for urban deteriorated areas

- To improve residential environment through infrastructure construction at broad urban deteriorated areas
- To expand housing supply with the modified construction regulations
- To prevent excessive individual profit through collecting development profit

# 3. JUGIS II

## 3.3 Application in Urban Redevelopment Process

### Procedures of Urban Redevelopment Facilitation Projects

# 3. JUGIS II

## 3.3 Application in Urban Redevelopment Process

### Outline on The Urban Broad-Area Redevelopment Support System

#### Outline

- This system supports the scientific and efficient establishment of urban redevelopment projects through analyzing various spatial information;
  - to analyze the proposed sites
  - to support the analysis of feasibility
  - to simulate the share of infrastructure construction cost
  - to support the policy of urban redevelopment

#### Direction

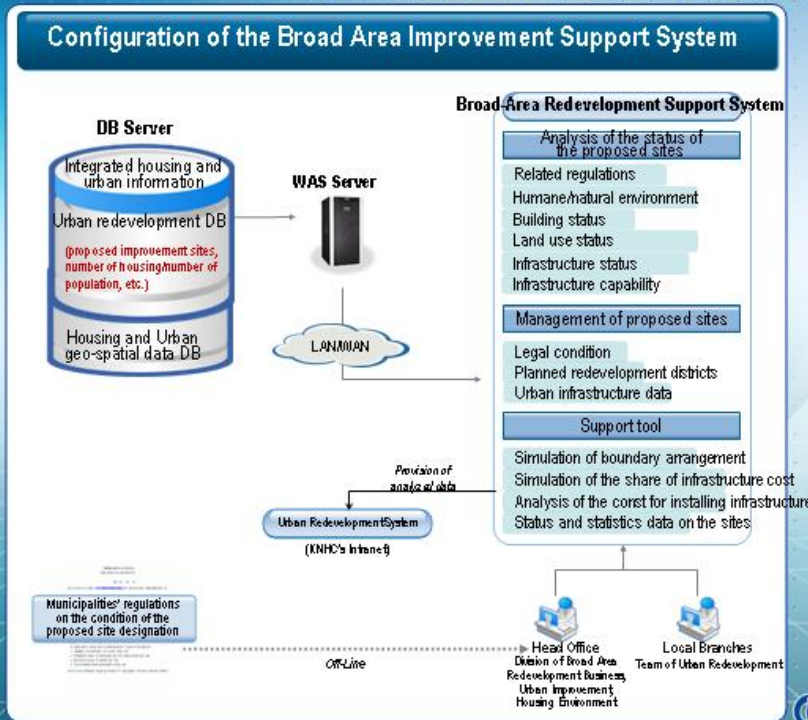

- To use the basic data including national map, cadastral map, etc.
- To use GIS data on the planned districts of urban redevelopment and the district plans
- To construct the practice application based on Web
- To use know-how / knowledge of urban experts
- To improve feasibility with rational spatial analysis
- To predict areas requiring urban redevelopment in the future

# 3. JUGIS II

## 3.3 Application in Urban Redevelopment Process

### Configuration of the Broad Area Improvement Support System

# 3. JUGIS II

## 3.3 Application in Urban Redevelopment Process

### Show of The Urban Broad-Area Redevelopment Support System

# 4. Direction of Future Informatizaion

## Positioning as the World's Best Housing and Urban Information Organization

### Information service for innovative value creation tasks

- Improvement of task execution efficiency through scientific analysis
- Improvement business competitiveness through housing and urban informatization

### Support to governmental housing and urban policies And search for new informatization tasks

- Support to housing urban policy with related information
- Expansion of public role by national service provision

### Improvement of housing and urban information service satisfaction

- Establishment of housing and urban informatization Hub
- Comprehensive housing and urban information service
