Esri Business Analyst: Overview and Update

James Killick

Part 1: Product Overview

A GIS System for optimizing
decisions about
**where to locate &
where to market**

You have to make a multi-million dollar real estate decision.

Where is the best place to invest?

You need to maximize the performance of your store network.

Which ones should be doing better?

The Market is Changing. You need to plan for the future.

How can you stay competitive?

- **Retail & Financial Services**
- **Commercial Real Estate**
- **Economic Development**

Economic Development & Economic Gardening

Greater New Orleans

Urban & Regional Planning

Community Needs Assessment

Utilities & Telco

Network Planning

US Air Force

Public Safety

Emergency Management

Facility Site Selection

Hospitals, Parks,
Fire Stations et cetera

4

Things Business Analyst Provides

1

Detailed, Current Facts About Any Area

6,000+ Variables. Current Year and 5 Year Forecast.

- Population
- Households
- Age
- Income
- Family Size
- Education
- Net Worth
- Consumer Spending
- Market Segmentation
- Businesses
- Business Types
- Products Consumption
- Services Consumption
- Supply vs. Demand

Access via Dynamic, Customizable Color Coded Maps

... and many, many more

Demo

Esri Data

Leveraging Esri Data for Market Planning

- **35+ years experience in building demographic data**
- **Processing 5th decennial census**
- **Current year estimates and 5 year forecasts**
- **We publish both methodologies and trends**

Quote from Trends Documents

2005:

“Affordable housing is becoming an issue and not only among lower income households”

“The era of easy money is definitely over”

2006:

“Increases in short-term interest rates are expected to take their toll on economic activity”

“Without the rapid appreciation of home value, home equity loans are also likely to decrease and decelerate consumer spending”

Using This Brain Trust is Easy...

400 Results found for **2015**

- + 2015 Key Demographic Indicators (Esri)
- + 2015 Age: 5 Year Increments (Esri)
- + 2015 Age: 1 Year Increments (< 25 Years Old) (Esri)
- + 2015 Labor Force by Industry (Esri)
- + 2015 Race (Esri)
- + 2015 Hispanic (Esri)
- + 2015 Income (Esri)
- + 2015 Income by Age (Esri)
- + 2015 Family Income (Esri)
- + 2015 Home Value (Esri)

- **400 Variables**

Smart Map Search

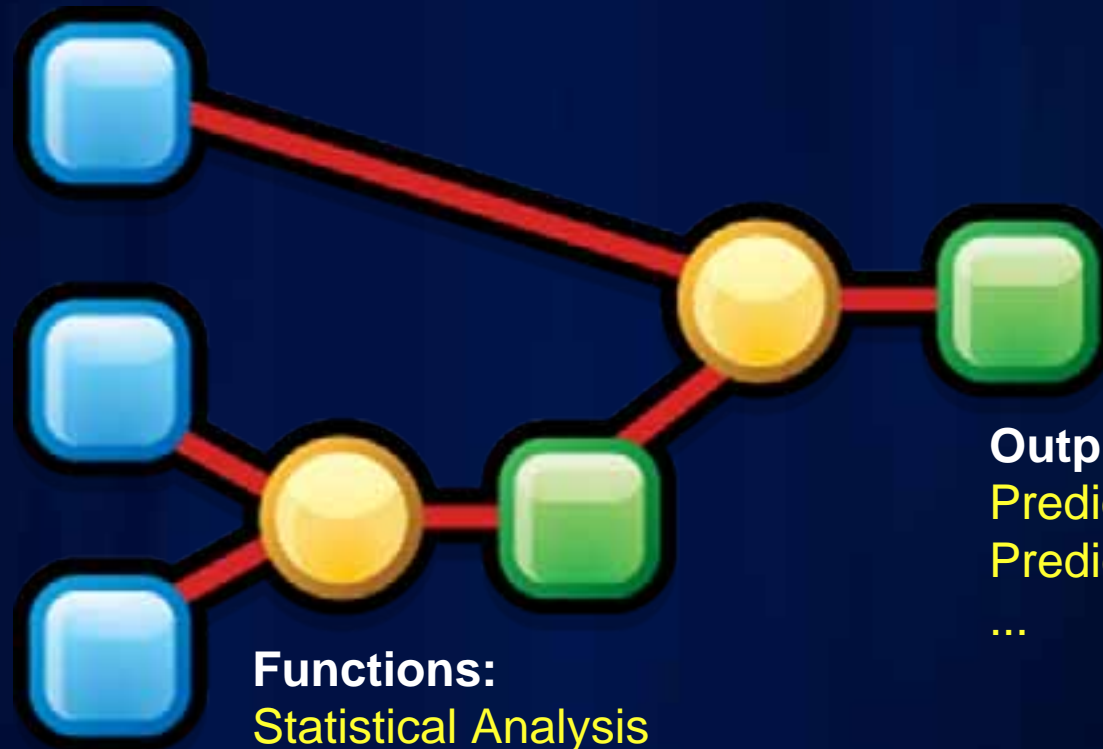

- Model Builder Framework
- Python Scripting Framework
- Access Hundreds of Tools:
 - Geo-Analysis
 - Business Analysis
 - Spatial Statistics
- Designed for Analysts!

Predicting Performance using Models

Inputs:

Actual Sales
Demographics
Competitor Locations
Catchment Area
Accessibility
Attractiveness
...

Functions:

Statistical Analysis
Spatial Statistics Tools
Geo-processing Tools
Built in Demand Models

Outputs:

Predicted Sales
Predicted Profit
...

$$P_{ij} = \frac{A_j^\gamma D_{ij}^\lambda}{\sum_{j=1}^N A_j^\gamma D_{ij}^\lambda} \quad (1)$$

- P_{ij} = the probability of a consumer at a geographical area i traveling to a given shopping center j ;
- A_j = is a measure of attraction of shopping center j ;
- γ = a parameter for the sensitivity of P_{ij} associated with attraction characteristic;
- D_{ij} = is a measure of accessibility of shopping center j to a consumer located at i ;
- λ = a parameter for the sensitivity of P_{ij} with respect to accessibility;
- N = the number of shopping centers.

The Huff Demand Model

Example of How Modeling is Used

Store	Actual Sales
1	\$1,100,000
2	\$2,300,000
3	\$1,750,000

Store	Predicted Sales
1	\$1,310,000
2	\$2,150,000
3	\$1,600,000

Design & Build a Model That Predicts Actual Sales as Accurately as Possible

Use Model to Predict Sales

- What would the sales be if I opened at location X?
- How would that affect sales at existing stores?

Store	Predicted Sales
1	\$1,210,000
2	\$1,890,000
3	\$1,100,000
X	\$1,300,000

Business Analyst Online

BAO Add-in for ArcGIS

The screenshot shows the 'ESRI Business Analyst Online Reports' window. At the top, it says 'Welcome' and has a '(Sign out)' link. Below this, it asks to 'Select boundary layer for reports:' with a dropdown menu currently set to 'ESRI 5-10-15 Drive Time'. There is an unchecked checkbox for 'Use selected features only'. The next section is 'Select report(s) to run:' with a subtext '1 report is selected (unselect)'. It contains a list of reports with checkboxes and PDF icons: 'Market Profile', '2010 Demographic and Income Profile' (two entries), 'Demographic and Income Comparison Profile', '1990-2000 Comparison Profile', 'Age 50+ Profile', 'Age by Income Profile', and 'Age By Sex By Race Profile'. Below the list is a 'Report subtitle:' field containing 'ESRI 5-10-15 Drive Time'. At the bottom, there is a checked checkbox for 'Download report data to boundary layer' with a help icon. Navigation links for 'Preferences', 'FAQs', and 'Previous Results' are present, along with 'Run' and 'Close' buttons. A footer banner says 'Do more with your subscription at bao.esri.com'.
