

**Esri International User Conference | San Diego, CA**  
**Technical Workshops | July 11 – 15, 2011**

# **ArcGIS for Windows Mobile – Developing Applications**

Glenn Meister

Jay Chen

# Agenda

- **Introduction**
  - **What is Mobile GIS**
  - **Positioning**
- **Software Development Kit**
  - **Framework SDK**
    - **Architecture**
    - **Demo**
  - **Application SDK**
    - **Introduction and Key Concepts**
    - **Demo**
- **Road Map**

# Introduction

# What is mobile GIS?

*Extends the reach of ArcGIS from the office to the field*

- With a mobile GIS solution you can
  - Carry your maps to the field
  - Collect and Update Geographic Information
  - Track and Geo-collaborate

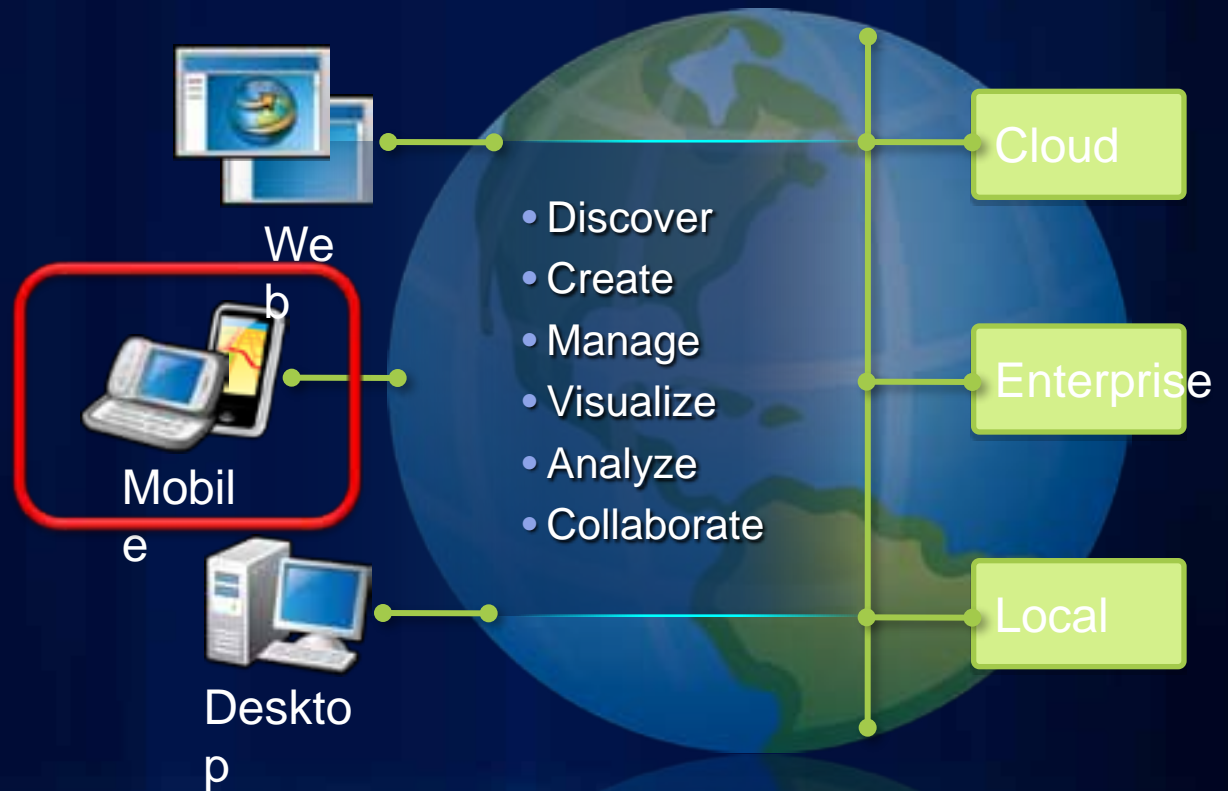

# What are the benefits of mobile GIS?

*Leverages the investment of your enterprise GIS*

- **Improve Efficiency and Accuracy of Field Operations**
- **Rapid Data Collection and Seamless Data Integration**
- **Helps to Make Informed and Timely Decisions**
- **Replaces paper based work flows**

# ArcGIS System

*ArcGIS mobile functionality exposed through applications and APIs*

# Esri Mobile Technologies

*Mobile capabilities of the ArcGIS system*

Apps and  
APIs

Form  
Factors

ArcGIS  
Mobile

Platforms

Functionality  
(Mobility  
Services)

# Esri Mobile Products

*ArcGIS for ...*

Rugged Devices

ArcGIS Mobile

ArcPad

Smartphones and Slates

iOS

Microsoft  
Windows Phone

Android

# ArcGIS for Windows Mobile

## *Windows and Windows Mobile Devices*

- Designed for harsh field conditions
- One handed/vehicle-mounted use
- Occasionally connected workflows
- High accuracy data collection
  - GPS integration
  - Laser integration
- Replace Paper Surveys
  - Intelligent forms
  - Barcode integration

Water Facilities Mapping

Asset Maintenance/Inspection

First Responders

Land Management

# ArcGIS for Windows Mobile

- **Client Applications**

- Rapid Deployment of Maps, Apps & Projects
- Task-based, Workflow Driven User Experience
- Synchronization of Data between Field & Office
- Local Caching of Data

- **API**

- Coarse-grained .NET API
- Build focused, custom solutions
- Extend COTS application

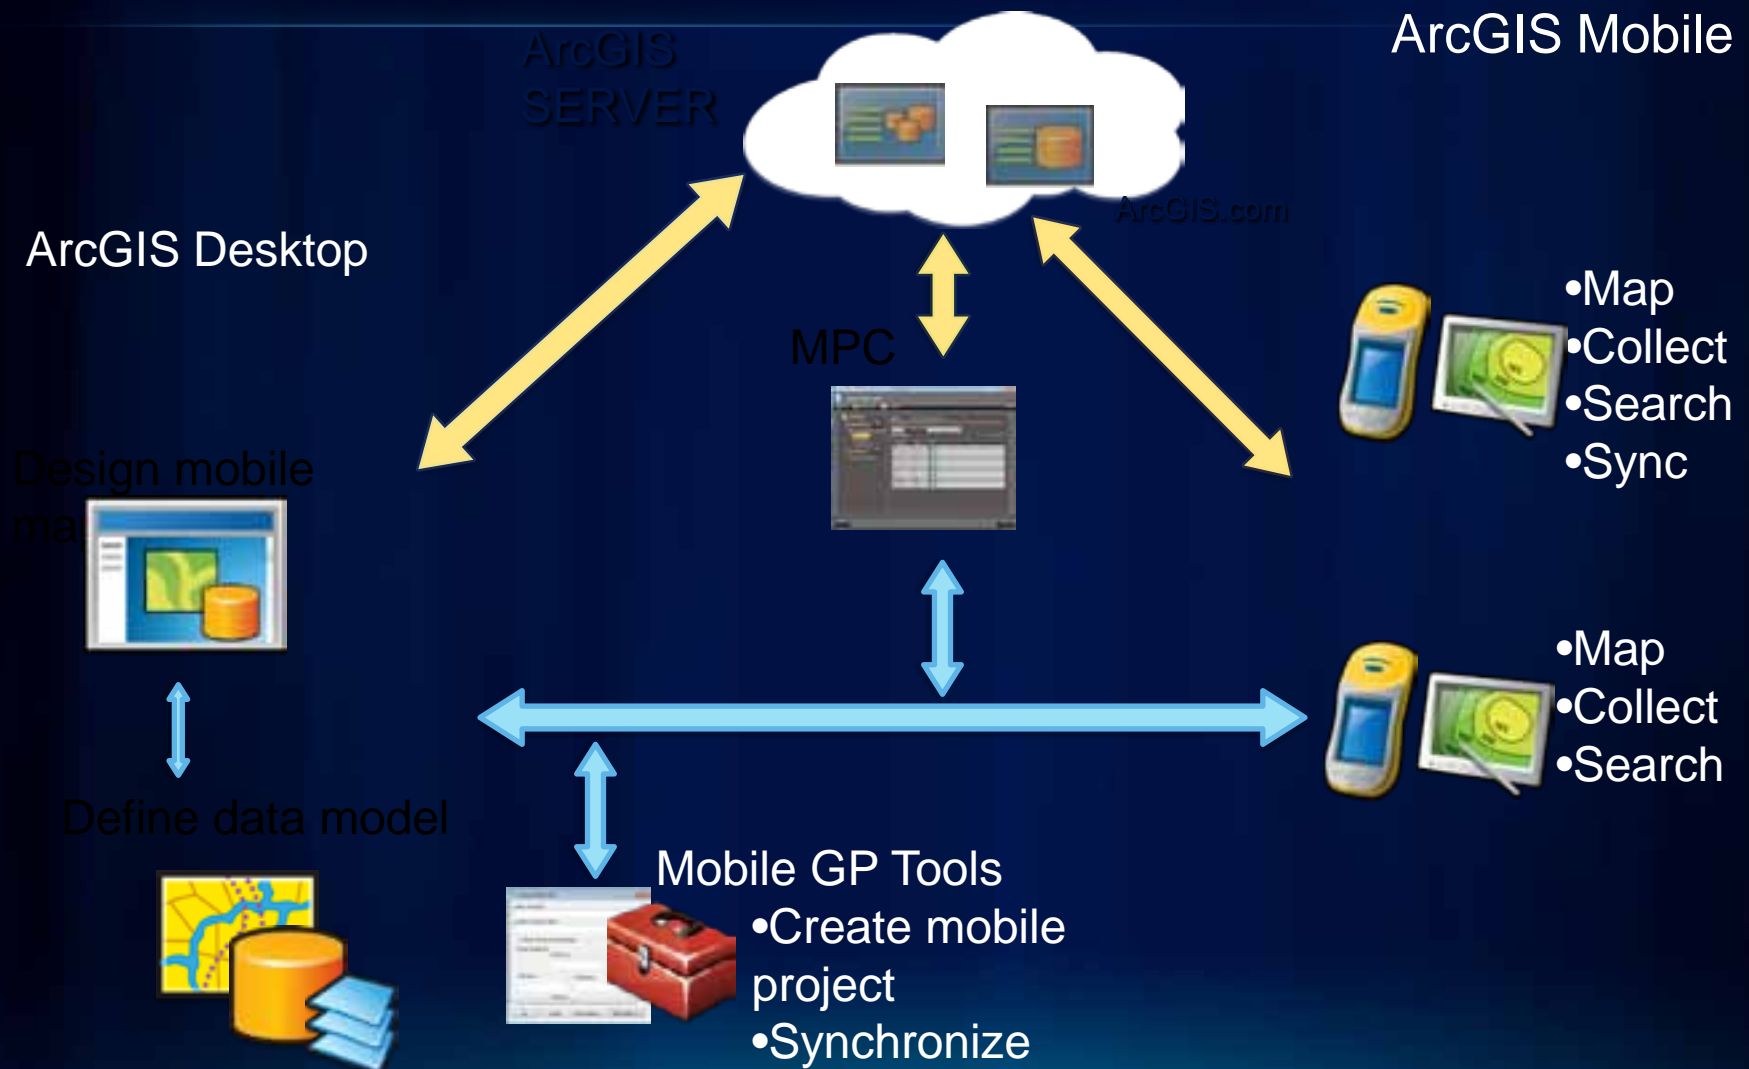

- **Platforms:**

- Windows XP, Vista, Windows 7
- Windows Mobile

*Applications plus SDK*

# ArcGIS Mobile 10

# ArcGIS Mobile Workflow: Overview

# Software Developer Kit

# Software Developer Kit

## Core SDK API

- Builds new field applications from scratch
- Embed GIS into existing Line-of-business applications
- Connected or occasionally connected filed operations

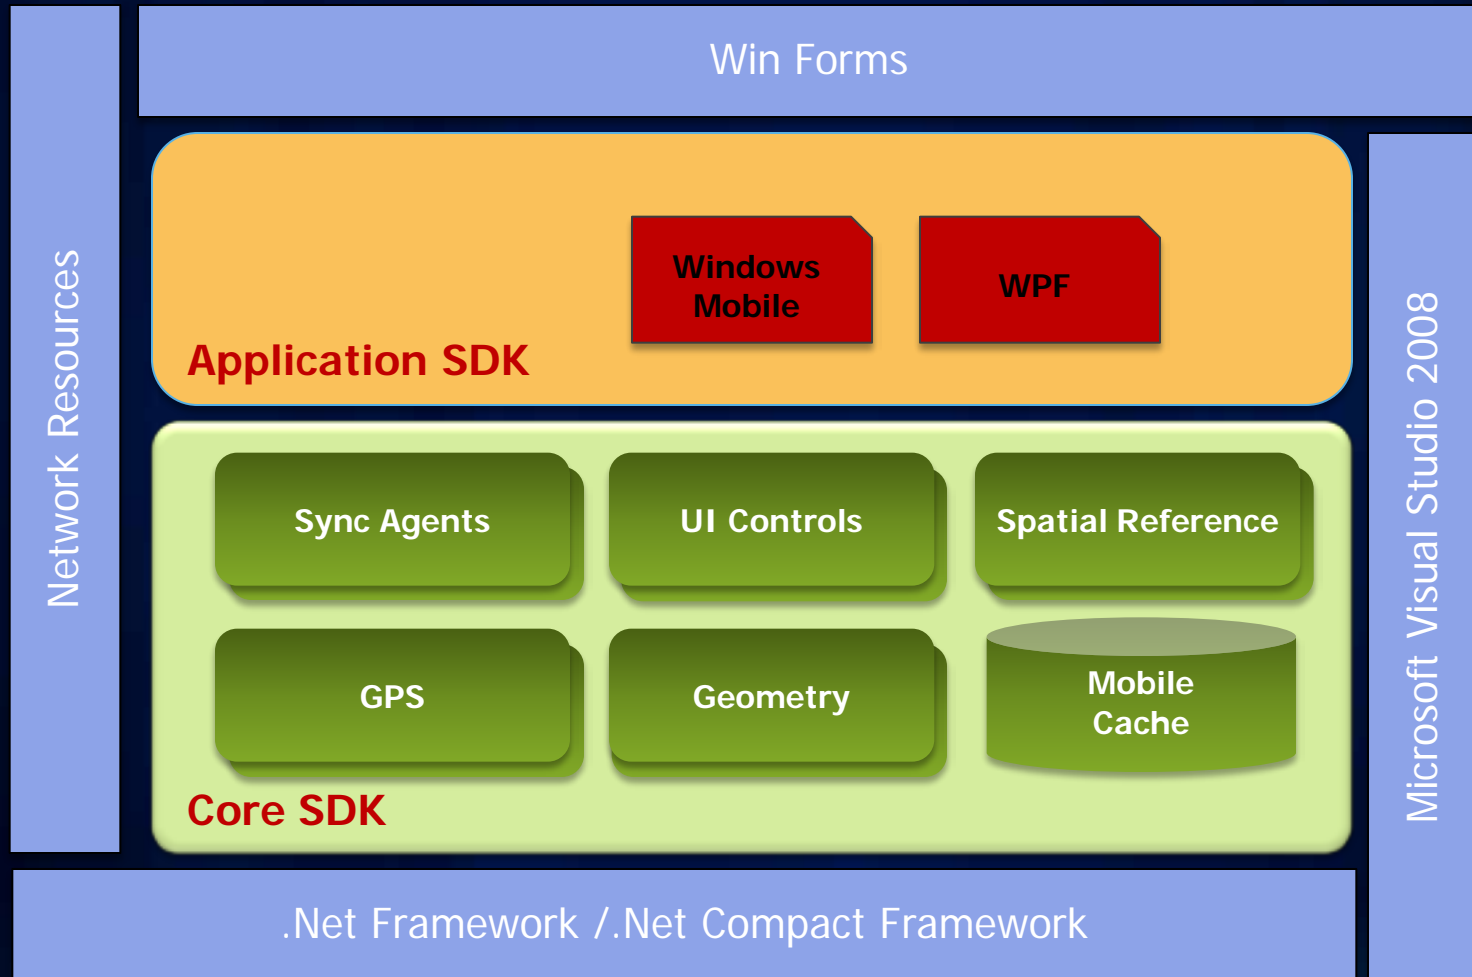

Conceptual  
Documentation,  
API Reference,  
VS components  
& templates

Sample Code

## Application SDK API

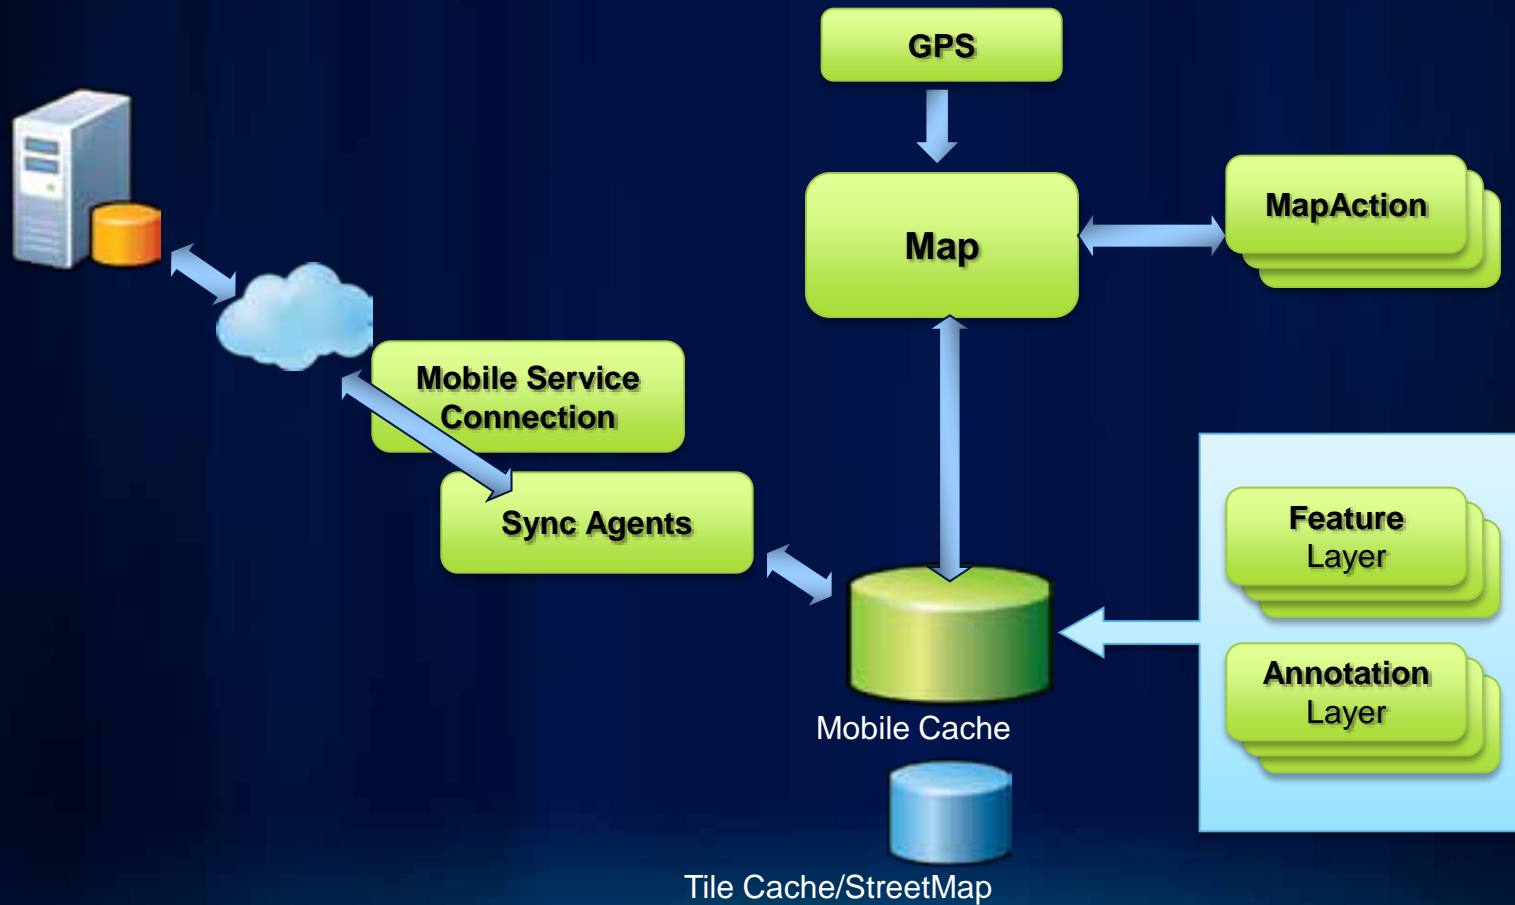

- Extends ready-to-deploy applications
- Creates new tasks or customizing existing functions
- Available for Windows and Windows Mobile

# Core SDK and Application SDK

# Core SDK API

## **Core SDK – Demo**

- **Getting Data**
- **Use TileCacheMapLayer**
- **Use GPS**
- **Query Data**
- **Select Data**
- **Create New Feature**
- **Post Updates to Server**

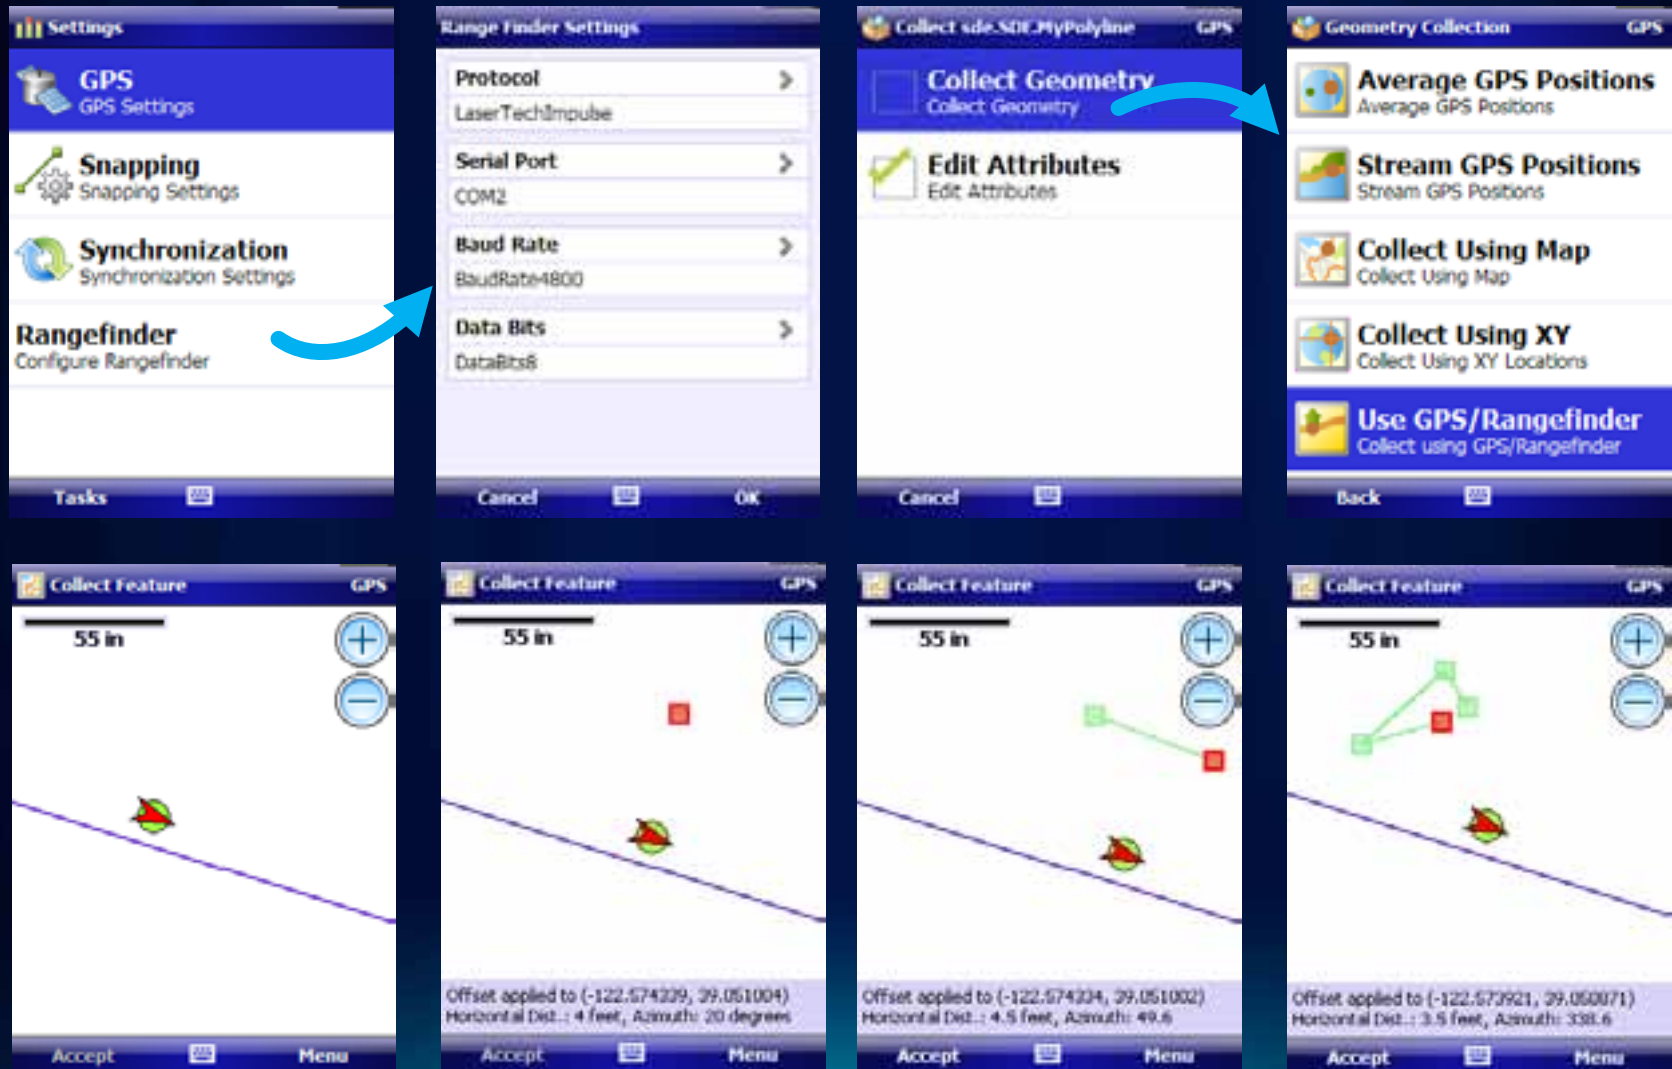

# Application Framework - Introduction

- **Customize out-of-the-box app to better fit your data collection/inspection needs**
  - Simplified data collection
  - Auto-populating fields...
- **- Add new functionalities as required by organization's field work**
  - Laser rangefinder
  - Bluetooth Camera integration
  - Navigation...
- **App is part of SDK, comes free, easy to extend**
- **Benefits - lower the cost, repurpose the app, faster and easier**

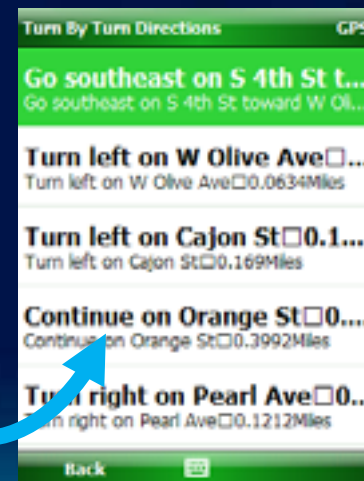

# Example – Simplified Fire Data Collection

# Example – Use Laser Rangefinder for Data Collection

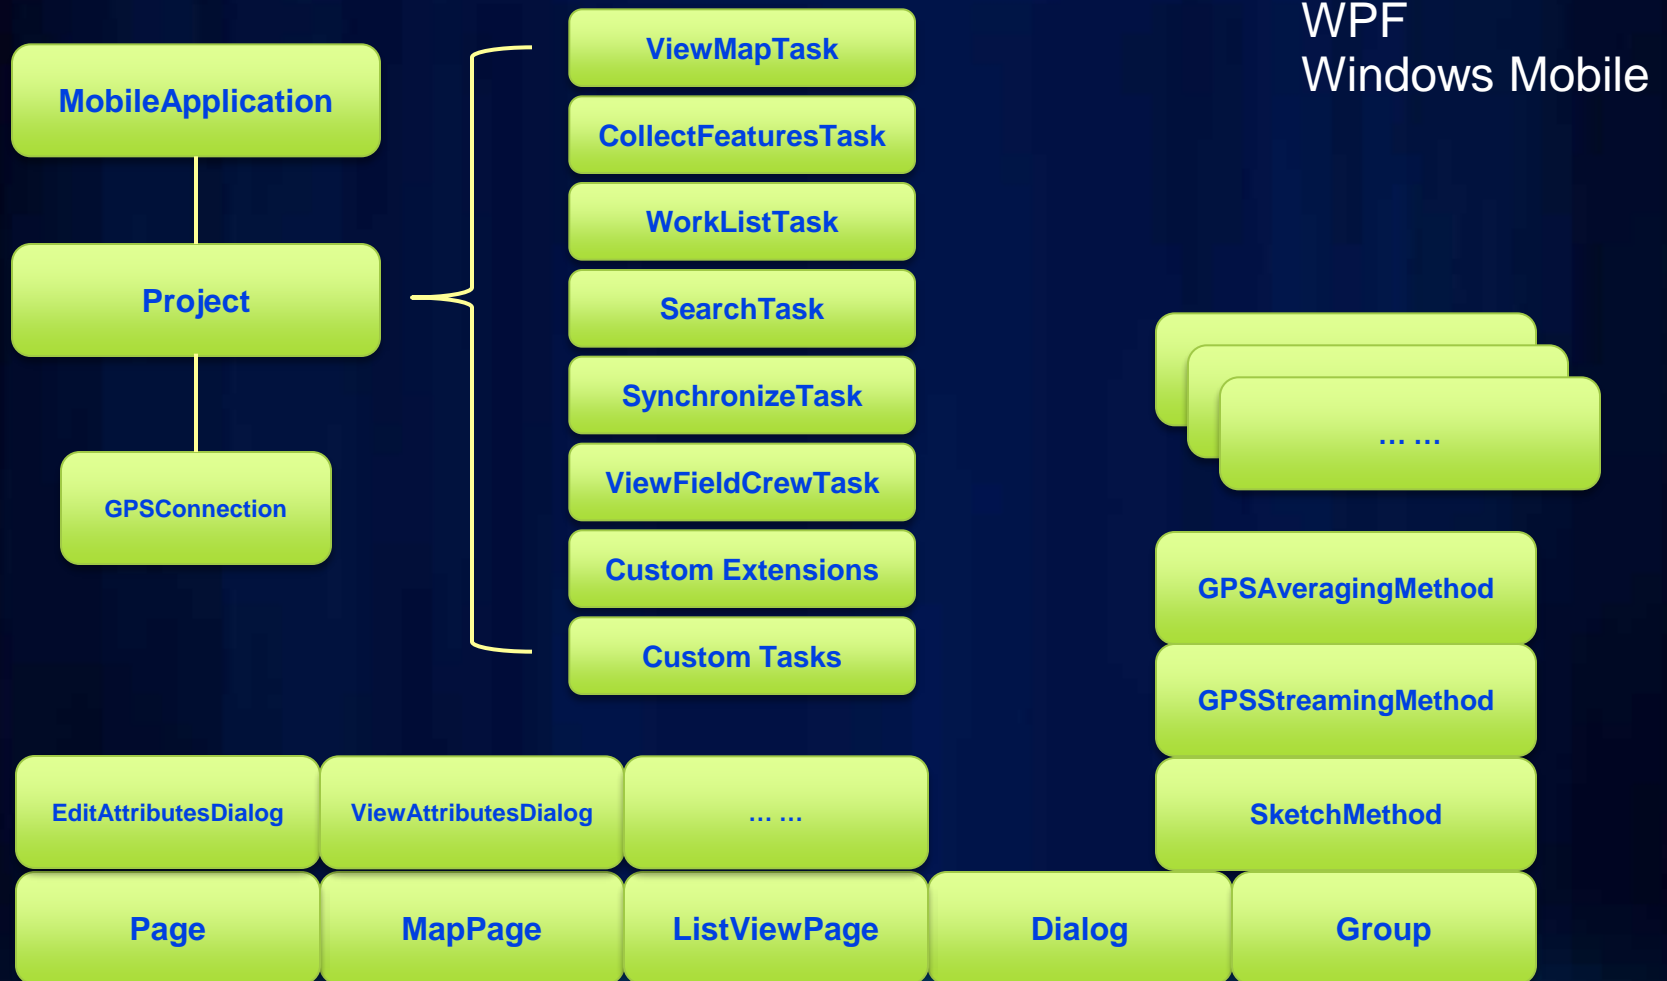

# Example – Provide Turn-by-Turn Navigation

# Application SDK – Conceptual Architecture

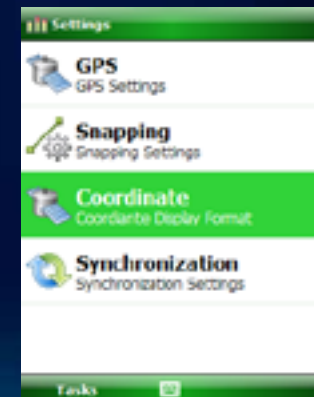

# Application SDK – Key Concepts

- **MobileApplication**
  - Represents the instance of mobile application
- **Project**
  - A device may contain multiple projects
  - The app can open one project at a time
- **Task**
  - Think of it as a workflow for field operation
  - Appears on Tasks List
- **ProjectExtension**
  - Custom implementation that changes existing workflow, or introduce new business logic
  - Plug-into the app through extensible points

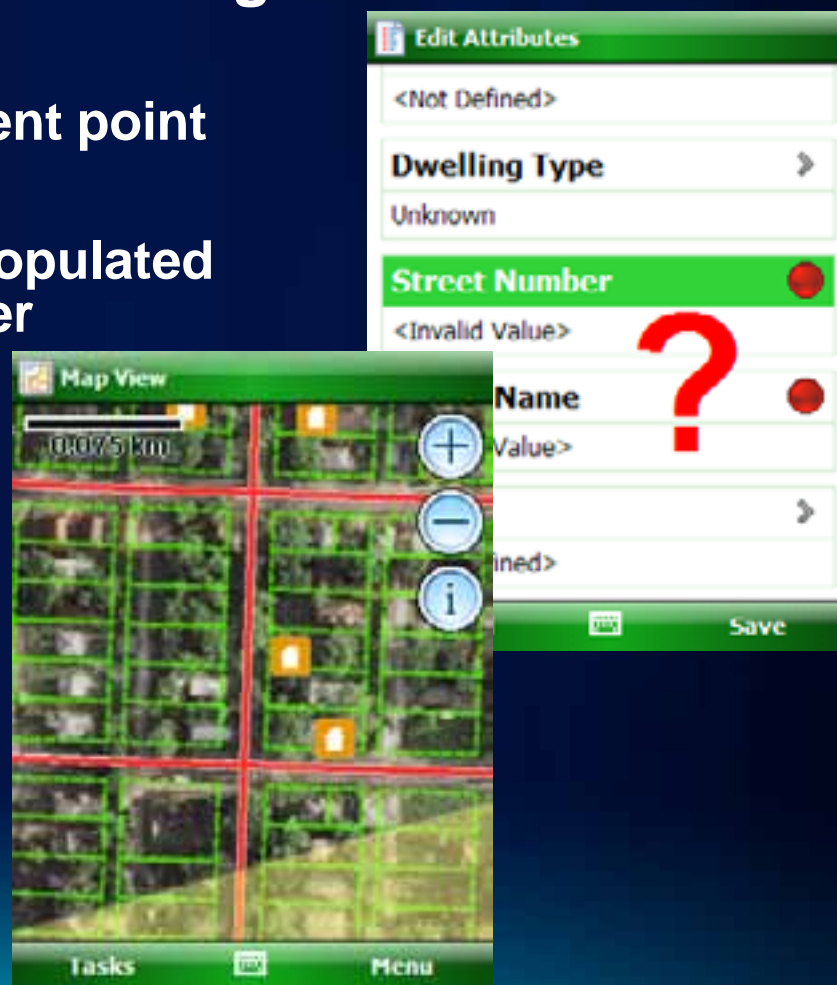

# Application SDK – Extensible Points

- MapPage
- CollectFeaturesTask
- View/Edit Attributes Page and Dialog
- MenuDialog
- SearchTask/WorkList Task
- SettingsPage
- Various Events
- and more...

# App Framework Demo – Tornado Damage Assessment

- Auto-populate address for damage site
- Workflow
  - Collects damage assessment point
  - Collects attributes
  - Street address gets auto-populated from underlying parcel layer

## **App Framework Demo – Laser Rangefinder**

- Use Laser Rangefinder for collecting tree height**

# Deployment Demo

- **Deploy to MPC and enable extension in mobile project**
  - *<ArcGIS Mobile Install Path>Mobile10\bin\Extensions*
- **Deploy to device**
  - **Windows**
    - *<ArcGIS Mobile Install Path>\bin, or*
    - *C:\ProgramData\ESRI\ArcGIS Mobile\Extensions\* (for Vista and Windows 7), or
    - *C:\Documents and Settings\All Users\Application Data\ESRI\ArcGIS Mobile\Extensions* (for XP)
  - **Windows Mobile**
    - *\Program Files\ArcGIS\Mobile\10*

# How to get started?

- **Project Templates**
  - Seamless integration with Visual Studio IDE
  - Creates Task or ProjectExtension solutions
  - Supports both Windows and Windows Mobile
  - Includes VS project for MPC
- **Developer Help**
  - Discusses architecture of the framework
  - Reveals extensible points with code snippets
- **SDK Samples**
  - Implemented in C#
  - Demonstrates various extensible points

# Road map - ArcGIS Mobile 10.1

- **Data Model Support**

- Support tables, attachments

- **Data Collection and Editing**

- Simplified Data Collection Experience
- Editing of Existing Feature Geometry
- Related feature data collection
- Improved GPS Collection (GNSS/RTK support)

- **Map Display**

- Waypoint Navigation
- GPS Improvements (Heads-up display, Configuration)
- Coordinate display (MGRS, DMS, ...)

- **Publishing and Deployment**

- Map Analyzer and Publishing support (MSD)
- Project Center improvements
  - Improved Ux
  - Packaging projects and cache
  - Basemap Catalog
- Improvements to support desktop workflows
- Improved ArcGIS Online/Portal integration

**Questions?**
