

Introduction to ArcGIS for Defense and Intelligence

Goals of the workshop

- Give an overview of ArcGIS as an Enterprise system for Defense and Intelligence
- Show examples of how thousands of users across the spectrum are using ArcGIS to better support the warfighter and national policy maker
- Explain GIS as a system—linking the different kinds of users from national to tactical levels
- Introduce new 10.0 workflows that are important to this community
- Provide recommendations and best practices
- Describe what's coming in 10.1 for Defense and Intelligence

Major topics covered

- What is ArcGIS for the Enterprise?
- How maps and spatial analysis are fundamental to military and intelligence missions
- How does ArcGIS as a system work across various platforms and networks
- Description of the resources available to the defense and intelligence user
- Introduce a high-level preview of the other related workshops
 - Using ArcGIS for Intelligence Analysis
 - Creating Basemaps for Defense and Intelligence products
 - Using ArcGIS for Military Planning and Operations
 - Using Imagery for Intelligence Analysis
- Overview of what is in the Defense Showcase in the Exhibit Hall
- Overview of what's coming in 10.1
