

## **Using Imagery for Intelligence Analysis**

### **Goals of the workshop**

- Discuss imagery analysis tools available in ArcGIS
- Discuss workflows at 10 using image services and on-the-fly processing
- Describe imagery resources available at ArcGIS.com
- Describe how imagery is stored and managed
- Provide recommendations and best practices
- Describe what's coming in 10.1 for Defense and Intelligence

### **Major topics covered**

- The Imagery Analysis Window and tools for exploiting imagery
- Using multispectral imagery for analysis, for example LANDSAT
- Using imagery for area familiarization
- Demonstration of imagery analysis tools using an intelligence scenario
- Recommendations and resources
- Overview of what's coming in 10.1

### **Related Workshops**

- Wednesday, 8:30-9:45, room 26A: Introduction to ArcGIS for Defense and Intelligence
- Wednesday, 10:15-11:30, room 26A: Using ArcGIS for Intelligence Analysis
- Wednesday, 12:00-1:00, room 26A: Creating Basemaps for Defense and Intelligence
- Wednesday, 1:30-2:45, room 26A: Using ArcGIS for Military Planning and Operations
