

## **Title**

### **National Map, Chart and Data Production**

## **Goals of the workshop**

The purpose of this session is to provide insight into national mapping, charting and data production issues and solutions. Attendees will learn about the challenges these organizations face and their impacts. They will also see solutions GIS can provide, their benefits and examples.

## **Major topics covered**

This presentation will cover national mapping, charting and data production:

- Internal and external issues
- Impacts on an organization
- Workflow
- GIS solutions to issues
- Benefits to an organization
- Example organizations
- Examples of technology solutions
