

## **Title**

Imagery @ UC-Esri Perspectives

## **Goals of the workshop**

The purpose of this session is to provide an Esri perspective on imagery and GIS. It is an important part of the Imagery @ UC activities being held Tuesday through Wednesday, and will give attendees an overview of all imagery related offerings at the Esri User Conference. The presenter will be Peter Becker, Esri's Imagery Product Manager.

## **Major topics covered**

This session follows immediately after the Imagery @ UC Keynote and User Perspectives session and is an integral part of the Imagery @ US activities. This session will connect imagery concepts introduced in the UC plenary and other imagery UC sessions together to ensure attendees know where to get further information. The session will give attendees an understanding of the integration of imagery and GIS in ArcGIS and demonstrate some of the important concepts. This will include:

- Types of Image Management Professionals
- Types of Image Users
- Image Visualization
- Image Analysis
- Image Management and Mosaic Datasets
- Image Dissemination and Dynamic Image Web Services
- Enterprise Image Solutions
