

## **Printing, Exporting and ArcPress**

### **Goals of the workshop:**

- Learn how to create an ArcMap layout that works well for printing and export.
- Discuss the technical details of export and printing functionality in ArcGIS.
- Discuss some troubleshooting strategies for common printing and export problems.
- Get a look at all that's new in printing and export at ArcGIS 10.

### **Major topics covered:**

- Map page size vs. Printer page size and what it means for your prints and exports.
- The differences between the ArcMap Printer Engines (ArcPress, Windows, Postscript)
- ArcPress “driver” selection and other ArcPress properties.
- Output Image Quality and resolution settings.
- Rasterization and the “jaggy” effect.
- What to do when you have trouble printing, including strategies to minimize the “Cannot map metafile. Out of memory.” error.
- Advanced PDF Export, including Adobe Reader and Acrobat 9 geospatial functionality.
- Introduction to data driven pages capabilities at ArcGIS 10 for creating map series and PDF map books.
