Design with GeoPlanner
Alex Laughton
GeoPlanner Overview

• A new premium web application
  - Integrates with ArcGIS Online

• Land Planning
  - Create
  - Analyze
  - Compare
Goal

- Create different design scenarios for land management
Drawing

Each Crayon = Polygon = Land Use Type
## Attributes

- Each color = polygon with a specific value

<table>
<thead>
<tr>
<th>Color</th>
<th>Polygon</th>
<th>Heat Absorption Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Red</td>
<td>Desert</td>
<td>1</td>
</tr>
<tr>
<td>Yellow</td>
<td>Crops</td>
<td>3</td>
</tr>
<tr>
<td>Blue</td>
<td>Water</td>
<td>8</td>
</tr>
<tr>
<td>Green</td>
<td>Forest</td>
<td>10</td>
</tr>
</tbody>
</table>
• Draw two scenarios - compare their values

• Overlay these with a landscape layer – determine impact
How Do You Get GeoPlanner?

- **Esri ArcGIS Marketplace**
  - Available Now!

- **Esri Professional Services**
  - Custom Templates
  - Technical Support
