USING GIS TO ASSESS NATURAL RESOURCES AT THE BISHOP PAIUTE TRIBE

PRESENTED BY:
BryAnna Vaughan – Water Quality Coordinator
Thomas Gustie, III – Natural Resources Specialist

July 2015
ESRI International User Conference
Tribal Tract
Members of the Bishop Paiute Tribe are descendants of the "Nu-Mu".

In 1912, the U.S. Government reserved over 67,000 acres of lands in the Owens Valley for the Native Americans of the area.

In 1932, President Hoover revoked the 67,000 acre reserved lands and placed them in watershed protection status for the City of Los Angeles.

In 1936, the City of Los Angeles wanted the remaining lands and the U.S. traded these lands for the 875 acres that are recognized today as the Bishop Paiute Reservation.
BISHOP PAIUTE TRIBE
WE DO NOT HAVE A GIS DEPARTMENT... OR SPECIALIST
SO WHAT DO WE DO?
