New Jersey is... CRACKING DOWN ON ILLEGAL DUMPING!

The Problem: Public lands all over New Jersey are being used as dumping grounds. Litter, garbage bags, tires, televisions, electronic waste, appliances, yard waste, and construction debris are being dumped and threatening our local environment, animals and public. This dumping detracts from the natural beauty of our public lands, it decreases property value, and costs the citizens of New Jersey tax dollars to clean up.

GeoForm is a configurable template for form-based data editing of a Feature Service. This application allows users to enter data through a form instead of a map's pop-up while leveraging the power of the Web Map and editable Feature Services. Use the following steps to customize and deploy your GeoForm.

Select a Webmap

The selected webmap is Example Illegal Dumping. To select a different webmap please click on 'Choose Webmap' button.
GeoForm BUILDER

GeoForm is a configurable template for form-based data editing of a Feature Service. This application allows users to enter data through a form instead of a map's pop-up while leveraging the power of the Web Map and editable Feature Services. Use the following steps to customize and deploy your GeoForm.

1. Webmap
2. Layer
3. Details
4. Fields
5. Style
6. Options
7. Preview
8. Publish

Select Editable Layer

This is the layer that the GeoForm will be built from. The layer must be a feature service that is enabled for editing with sharing permissions appropriate for your audience.
