- Camping

Lake/River Size: 5 Miles
Elevation (ft): 200
County: Alameda

The lakes outlined in red are considered infested with quagga mussels. These animals are an invasive species capable of causing great damage to the aquatic ecology of the lake and water conveyance structures. Boaters should anticipate inspections at launch ramps around the state. Remember to always CLEAN, DRAIN AND DRY.
Biogeographic Information and Observation System / Program

- Catalog of biological datasets
- ArcGIS Server 10.11 with SDE
- Map Viewer: JSAPI + ASP.NET
- Over 1000 layers available via public and secure access and more being added
- More than a dozen tools for data viewing, analysis, and reports
Custom Viewer Configuration

- Title and icons
- Side panels visibility
- Number of tabs per panel
- Default startup layers
- Layer List view style
- Tool options and predefined queries
- Simplify default map action - click on map for info

- Fishing Closures
Location Relationship

- Unique **DFGWATERID** for every stream reach and water body as maintained by CDFW.
- Unique **StockingWaterID** for fish plantings which may happen along the same stream.
California is a great place to fish!

We've recently rebuilt and improved our Fishing Guide to help you plan your fishing activities! It's faster, has a much improved map interface, and provides more information. In it, you will find:

- Locations where fish are being planted for fishing by CDFW
- Historically good locations to fish
- Locations of Marine Protected Areas
- Quagga mussel infested waters

Over the coming year or so, we hope to also include License Sales locations, Fishing Regulations, Boat Facilities, and more!

**Update:** April 29, 2015 – Now includes Fishing License Sales Locations

**Update:** April 17, 2015 – Now includes Boating Facilities

If there is something you think we should include, please let us know.

Q&A

Why not just upload the layers and configure an AGOL webmap or use Web AppBuilder?

- Data often change and still being developed
- Various data sources are managed by different groups
- Internally hosted, secure database services and API still difficult to integrate with AGOL
- Curated information display easier to view and understand
