Navigator for ArcGIS – Tech Preview

Tech Workshop

- **Meet the newest member of the esri apps family. Navigator for ArcGIS works alongside ArcGIS for Collector and Explorer to safely navigate field workers to where they need to be. Navigator may also be used independently, and allows you to create a stop list for your entire day's work. See how this app provides turn-by-turn voice guidance and off route detection, even when disconnected. This workshop will cover the basics – deployment, using navigation data, and different supported workflows.**
- **Tuesday, 21 Jul 2015, 2:00pm - 2:30pm**
- **Location: Tech Theater 17 Exhibit Hall A**
- **Beginner**
