

# Build the Right Map

A User-Centric Agile Design Case Study

The Vermont Agency of Transportation Rail section uses Esri's tools for asset management. We use Collector for inspections and track results with Op. Dashboard. But after inspections we still write paper reports. We decided a summary website would be better than a 60-page PDF to convey the results of our crossing inspection, so we involved users in a design studio exercise. In just 90 minutes we collaboratively designed the site including charts, reports, and maps. The result was more engaged users
