

U.S. Navy GeoReadiness IGI&S Enterprise Forward, Engaged, Ready

*Providing Authoritative
Installation Geospatial
Information & Services
(IGI&S)*

*Geo-enabling Navy
Shore Installation
Mission to achieve:
Readiness,
Performance, and
Sustainability*

*Ensuring Accurate,
Timely & Accessible
Shore Installation Maps
for Better Decisions*

*Enabling & Validating
the Navy Periodic Virtual
Inventory (PVI) Process
to support FIAR*

Overview

The U.S. Navy's GeoReadiness program goal is to provide a geospatially-aware infrastructure to transform data into better decisions.

The Navy is able to achieve this goal through the GeoReadiness Enterprise System (GES).

This presentation explores the next evolution of the enterprise and the resulting capabilities opening up for the Navy.

Outline

- **“Case study” in implementation of an enterprise GIS System**
 - The full platform
- **Goals**
- **Challenges**
- **Path forward**
 - Expected functionality
