Collector: Authoring Maps for Offline Data Collection

Morgan Zhang
Kevin Burke
What am I using

- ArcGIS Online organization account
- ArcGIS Server token secured feature service
- Hosted feature services
- ArcGIS.com web maps
- ArcGIS.com groups
- Collector for ArcGIS
Demo
San Diego Water Violation map
What are some best practices?

1. Leveraging your servers security and using a proxy
2. Ability to use multiple data sources
3. Naming your basemap
4. Configuring your app tools and settings
5. Sharing your maps and services
More best practice to share

- **Map for disconnected editing**
  - All feature layers are sync-enabled (ArcGIS Organization hosted or on-premise Server)
  - Server tiled map services with export tiles enabled
  - Esri default basemap
  - ArcGIS Online hosted tile layer

- **Advanced Offline Options**
  - Hosted feature services
  - ArcGIS for Server 10.4 feature services
More best practice to share

- **Versioned data**
  - Viewing versioned data supported with ArcGIS 10.2.2 for Server
  - Edit versioned data offline requires 10.3.1 or a later release of ArcGIS for Server and a 10.3 or later release of enterprise geodatabase
