Tips and Tricks for Working with Tables in ArcGIS Pro

Alycia Rajendran
Product Engineer
@AlyDoesGIS
How am I going to talk about tables for 30 minutes?

- Easy Data Management
  - Using non-database tables
  - Definition queries
  - Field re-ordering and visibility

- Fast Data Retrieval
  - Deferred scrolling
  - Table filters
  - Related data

- Effective Data Visualization
  - Highlighting selected records
  - Filter indicators
We have help documentation!

Keyboard shortcuts for working with tables

The following list of keyboard shortcuts can help you save time and be more productive when working with tables and the table view. In most cases, the table view must have focus (to be active) to use the shortcuts.

Open and close tables

<table>
<thead>
<tr>
<th>Keyboard shortcut</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ctrl+T</td>
<td>Open the attribute table for the selected layer or stand-alone table from the Contents pane.</td>
</tr>
</tbody>
</table>
Easy Data Management

Using non-database tables

Why? Database tables do not have the limitations of an Excel (etc) table in Pro!

My favorite tool ➔
### Easy Data Management

#### Field re-ordering

<table>
<thead>
<tr>
<th>Club Team</th>
<th>Club Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>AaB Fodbold</td>
<td>Aalborg</td>
</tr>
<tr>
<td>Marnejejad</td>
<td>Heereneven</td>
</tr>
</tbody>
</table>

#### Hide/Show fields

- AaB Fodbold
- SC Heereneven
- AZ Alkmaar
- FC Tokyo
- Akhmat Grozny
- FC Akhmat Grozny
- Al-Batin FC.
## Fast Data Retrieval

### Deferred scrolling

ArcGIS Earth: Introduction and Deployment

SDCC - Ballroom 6E-D

ArcGIS Earth has been built specifically to help more users in large enterprises access the value of their data in ArcGIS Enterprise and ArcGIS Online. This session will discuss the types of deployments that are being supported by ArcGIS Earth, how administrators can get users started quickly, and what types of enterprise data are accessible through Earth.
