

Esri Developer Summit

March 8–11, 2016 | Palm Springs, CA

ArcGIS API for JavaScript Using it with EmberJS

Frederic Aubry

Rene Rubalcava - @odoenet

EmberJS - Creating Ambitious Web Apps

What is Ember?

- A framework for building *ambitious* web apps.
- Provides a strong structure for development.
- Great for working with teams.
- Introduces you to Web Components.
- [emberjs](#)

ember-cli

- ember-cli.com
- Command line tools for building web apps.
- Adheres to a strict structure for applications.
- Uses ES6 for development.
- Rich addon support - [emberaddons](#)

Tooling

- Prerequisite: Node 0.12.7 and up
- `npm install -g ember-cli`
- `ember new my-app`
- `ember install ember-cli-amd --save-dev` - *for JSAPI!*

Some challenges

- Ember has it's own loader system.
- We built an addon to use JSAPI with it: [ember-cli-amd](#)

Let's build an app

- Demo fun time!
