

Navigator for ArcGIS

Hailemichael Teklai

2016 ESRI
PETROLEUM
GIS CONFERENCE

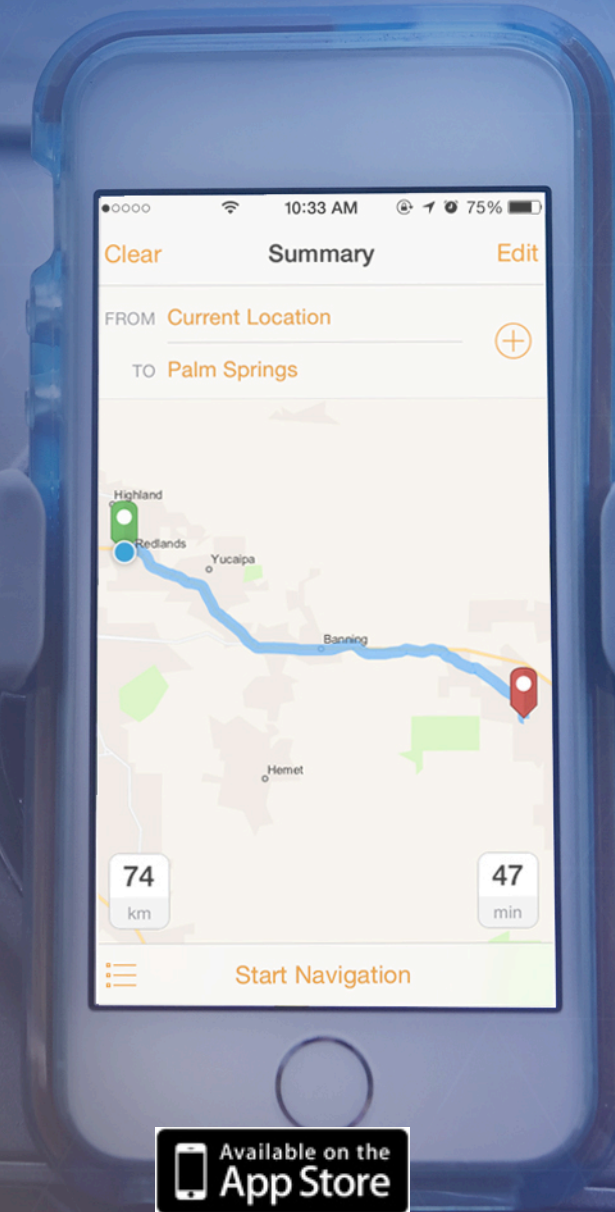

Navigator for ArcGIS

Direct your field workforce to where it needs to be. Navigator is much more than a consumer-level navigation app. It allows you to leverage your organization's data, and is fully integrated into ArcGIS so that you can work seamlessly between apps, all in a disconnected environment.

- **Fully integrated with other apps**
- **Advanced vehicle travel modes**
- **Work disconnected**
- **Custom data (search, route, display) – *coming soon***
- **Multi-stop optimization – *coming soon***
- **Follow pre-generated routes – *coming soon***

Navigator for ArcGIS

This workflow requires Navigator 2.0 and Pro 1.2

Navigator for ArcGIS| What's Coming Next

- 2.0 (Q2 2016)
 - Custom data
 - Optimized stops
 - Android in beta
 - App Link enhancements: JSON, address, optimize
- Q3 2016
 - Connect to pre-planned routes and follow route geometry
- Later
 - Support for Windows 10
 - Barriers
 - Floor-aware
