

Abstract

Boynton Beach, Florida: Sun, Sand, Surf, and GIS

Track: State and Local Government

Author(s): Regina Hagger

Think you missed the GIS "Boat"? It is not too late. The City of Boynton Beach started GIS in 2000. Our GIS has kept pace with an ambitious vision set out by the City Commission. In 2002 we won the FCCMA Award for Innovations in Technology and Communications. See how the City's GIS is helping with the day-to-day operations of the enterprise. Lesson's learned: what worked and did not work and why. Getting public access for the residents using ArcIMS websites, touchscreen kiosks, and ArcPad handheld mobile GIS will be discussed.
