

Abstract

Developing Community Outreach for a Regional PLACE3S Land Use Study

Track: State and Local Government

Author(s): Joe Concannon, Jeanie Hong, Laura Bell

The Sacramento Region is using community-based workshops to envision how the region might grow over the next 50 years. The workshops use the ArcView software-based PLACE3S Growth Allocation Model to stimulate local opinion on housing for an expected addition of 1.7 million people in the next half-century. The PLACE3S model provides simple tools for citizens to build from their local parcel-level vision to a region-level vision of how the Sacramento Valley can grow differently in the future than it has in the past. These interactive workshops use wireless network technology to capture local input on planning for the future.
