i-Map Delaware River Basin: Utilizing Multiple Map Services Across Political Boundaries With ArcIMS

Track: Application Development

Author(s): Lawrence Thornton, Marla Chassels, Karl Heinicke

The Delaware River Basin Commission's (DRBC) Information Management Advisory Committee (IMAC) has developed i-Map Delaware River Basin, an interactive mapping application that provides answers to basic questions about recreational activities in the Basin area. Presented in an easy to use format, this application enables users to view and perform basic GIS analyses and queries. Associated data is linked to Basin specific map layers so that users can access up-to-date information. Utilizing multiple map services in ArcIMS, i-Map Delaware River Basin also displays reference maps from New Jersey, Pennsylvania, Delaware, and New York and provides links to various state, federal, and recreational Web sites.
