

Abstract

TAKBIS: A Study of Land Registry and Cadastral Information System in Turkiye

Track: Cadastral and Land Records

Author(s): Necdet Poyraz, Recai Boynukalin, Musta ilker Mataraci

Within the information systems, by the re-evaluation of Land Registry and Cadastre Information, it is inevitable the conversion and integration of data in the frame of standards to be defined for meeting of requirements. So, Turkish General Directorate of Land Registry and Cadastre (TKGM) can manage his tasks more efficiently and reliably and has to submit his data to his users in the concept of GIS/LIS. Turkish Land Registry and Cadastre Information System Project's (TAKBIS) consists of three steps: analysis, design, and application development.
