

# Abstract

## **Shell Standard Symbology**

**Track:** Cartography and Map Production

**Author(s):** Bart Hulshof

Shell E&P has developed a new style sheet that incorporates the Shell Standard Legend. The style sheet contains some 1,300 symbols and has extra columns for symbol codes and descriptions. The new columns enable end users to symbolize on attributes from the feature class while displaying different descriptions in the legend. The standard style sheet is rolled out to Shell E&P companies worldwide to enforce the use of standard symbology.
