ESRI International User
Conference, 2013

Space Use Studies-Background

PARSONS

- Used by Multiple Services to assist in optimization of space utilization and assignment, energy conservation, footprint reduction, and other uses.
- Snapshot of space user and use information across a military installation(s).
- Multiple database structures, such as S-File, SUMS, and others currently unnamed.
- Combined CAD/GIS product.

Space Use Studies-Inputs

Large amounts of field collected data, typically from multiple teams and sources:

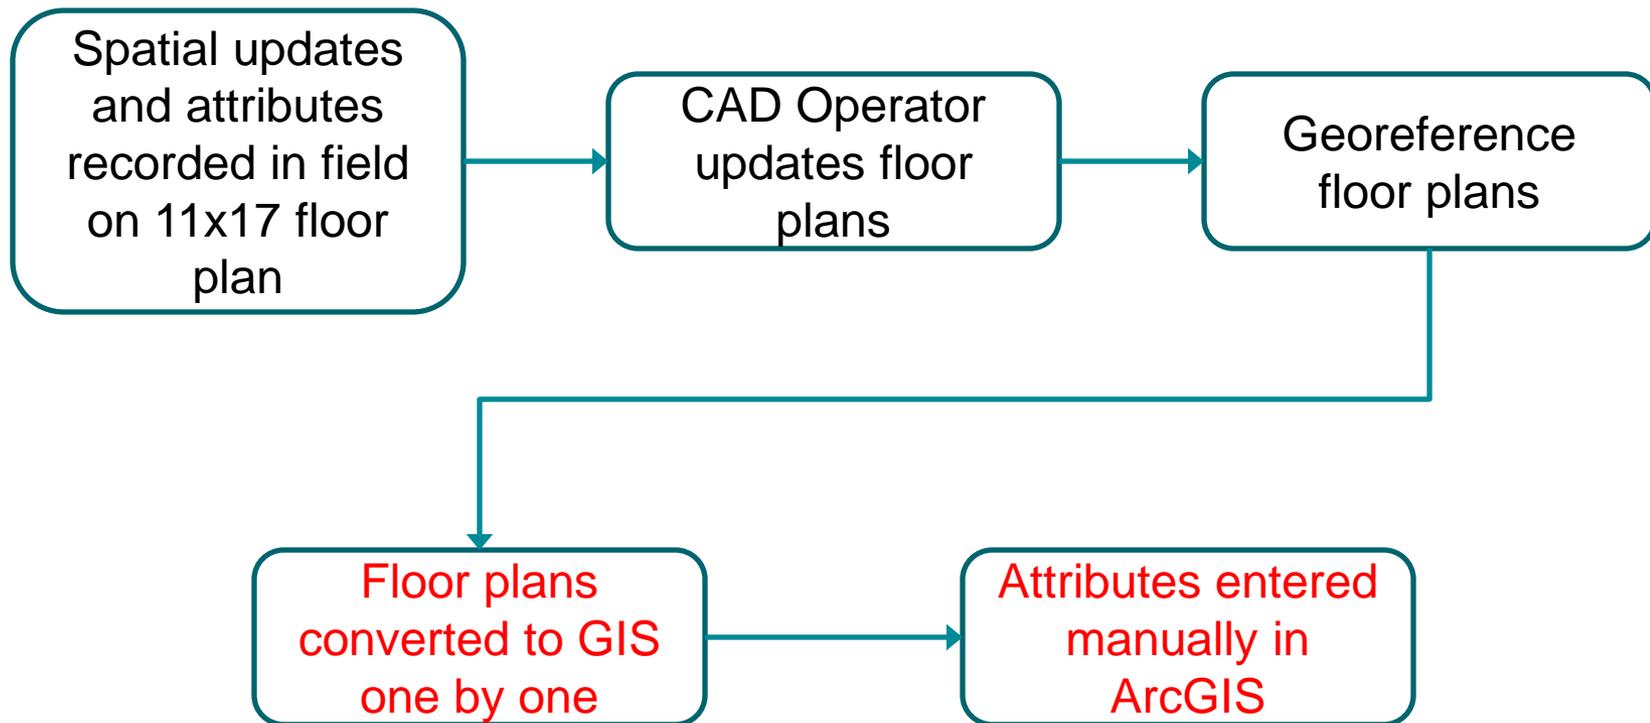

- Existing spatial data-floor plans
- Floor plan field markups
- Building and space level attribute data
- Personnel attribute data

Space Use Studies-Outputs

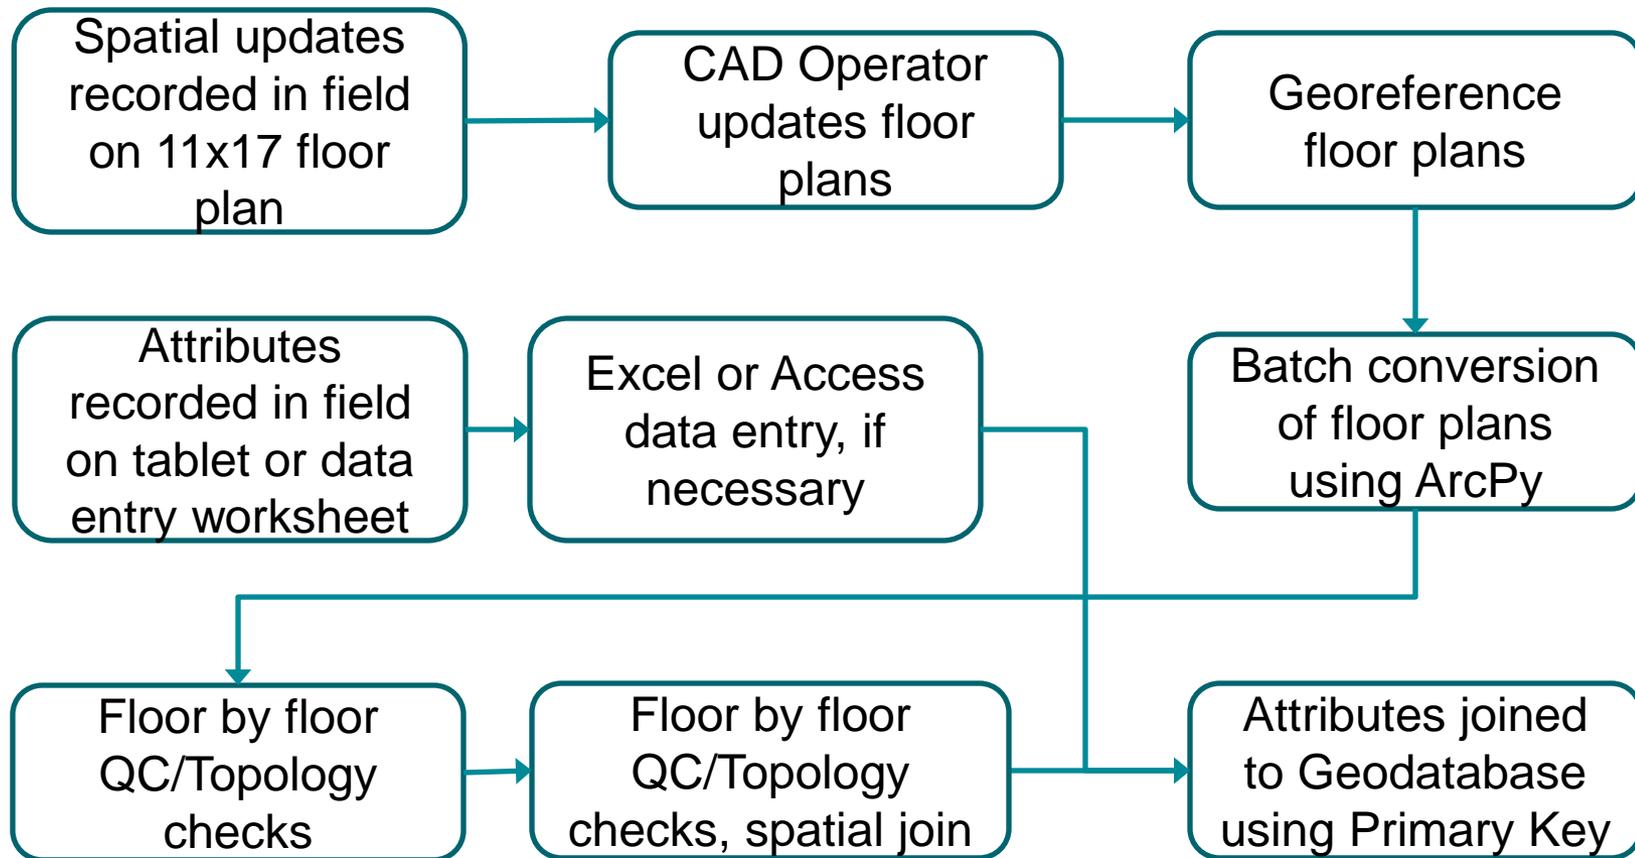

Large amounts of field collected data from multiple sources:

- CAD floor plan updates
 - SUMS, S-File, or Other adaptations of SDSFIE 2.6
 - building_floor_area
 - building_space_area
 - building_room_area
 - Other layers, ancillary tables, relationship classes
 - Final reports in various formats
-

CAD to GIS Data Production-Conventional

CAD to GIS Data Production-Current

Batch Conversion: Attribute Extraction

PARSONS

■ File Name

InstIn ID Building No Floor No
inst_00111_01.dwg

■ CAD Layer

A-FLOR-OTLN = building floor area

A-FLOR-OTLN-RPRM = building space area

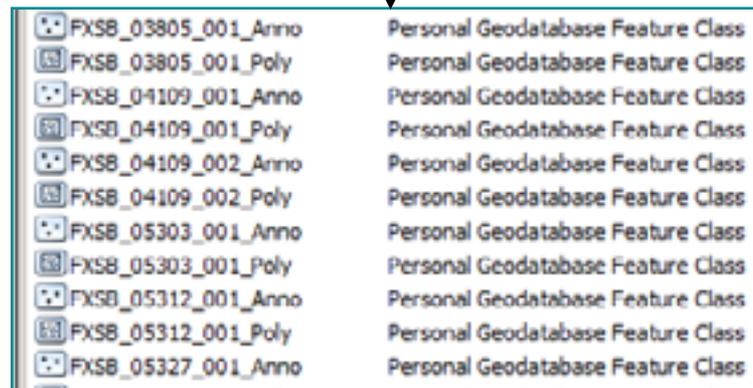

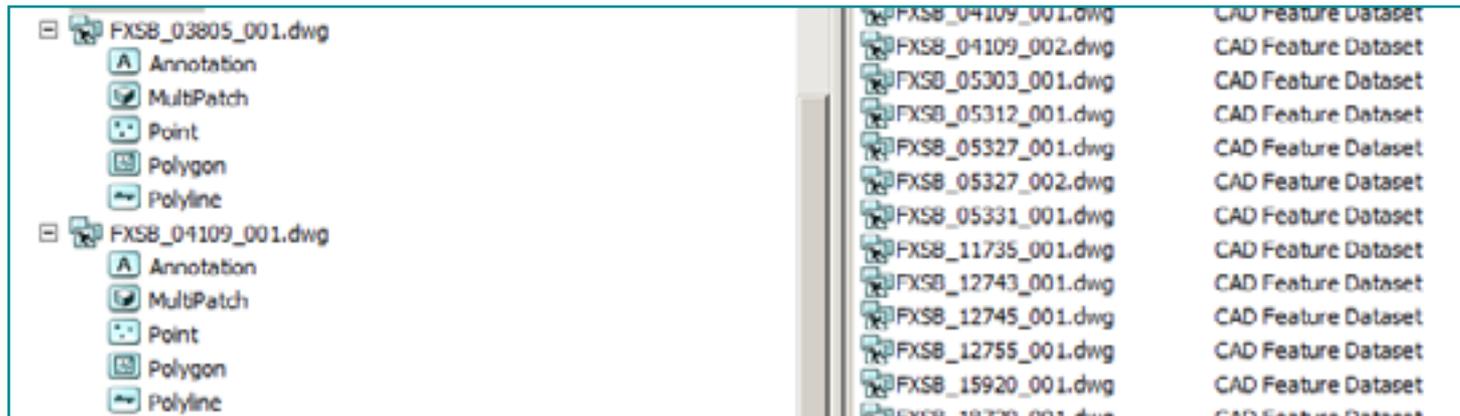

Others for exterior spaces, interior obstructions, walls, linework depending on desired output

■ CAD Annotation

Room or space IDs to be concatenated with building data to build space level primary keys

Batch Conversion: Conversion Looping (ArcPy)

PARSONS

Merged floor polygons, space polygons, and annotation points by floor

Batch Conversion: Floor by Floor Topology Checks

PARSONS

Name | Type

buildings_working_Topology	Personal Geodatabase Topology
FL01_annotation	Personal Geodatabase Feature Class
FL01_floor_area	Personal Geodatabase Feature Class
FL01_space_area	Personal Geodatabase Feature Class

Topology Properties

General | Feature Classes | Rules | Errors

Feature Class	Rule	Feature Class
FL01_annotation	Must Be Properly In...	FL01_space_area
FL01_space_area	Must Not Overlap	
FL01_space_area	Must Be Covered By	FL01_floor_area
FL01_space_area	Contains One Point	FL01_annotation
FL01_floor_area	Must Not Overlap
