

Railroad  
Environmental  
Conference  
October 16, 2012

Authors: Marc Sanford, Robbi McKinney (ARCADIS)  
William Parry (CSX Transportation)

# Three Dimensional Visualization Improves Conceptual Site Models

# *Authors*

## *Salamanca Rail Yard*

William Parry, CSXT – Remediation Manager

Robbi McKinney, ARCADIS – GIS Analyst

Marc Sanford, ARCADIS – Principal Scientist

# Outline

- n Site Location
- n Historical Railroad Operations
- n Remedial Program
- n Stakeholders
- n Design and Simulation

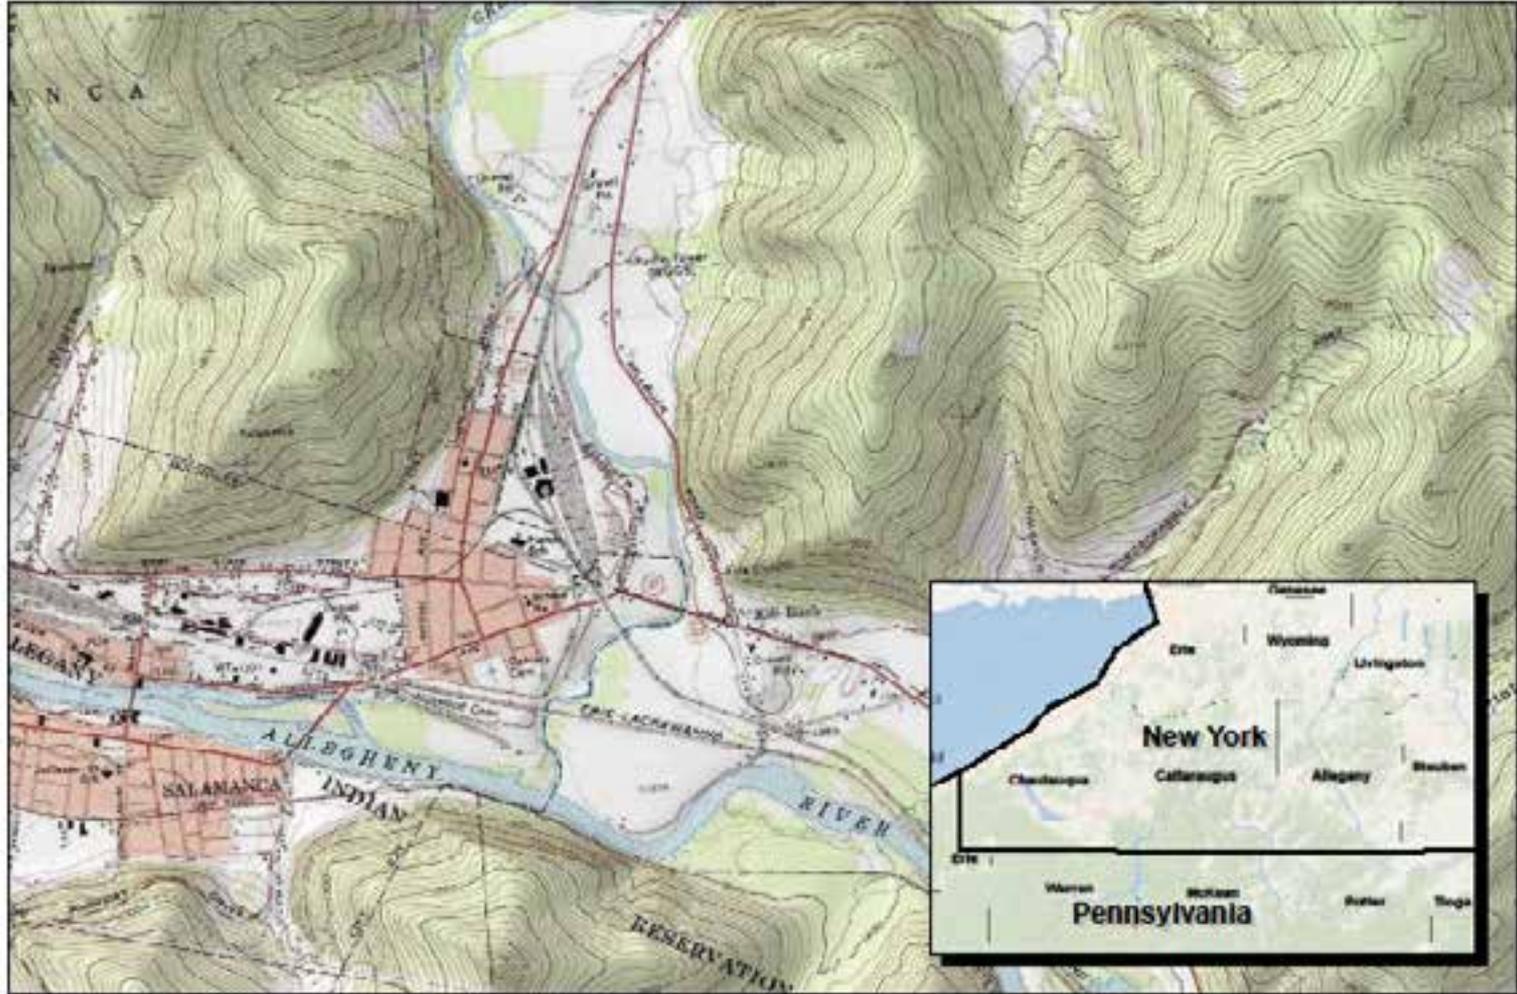

# Site Location

## Salamanca Rail Yard

# Site Location

## Salamanca Rail Yard

# *Historical Railroad Operations*

## *Salamanca Rail Yard 1958*

# *Historical Railroad Operations*

# *Historical Railroad Operations*

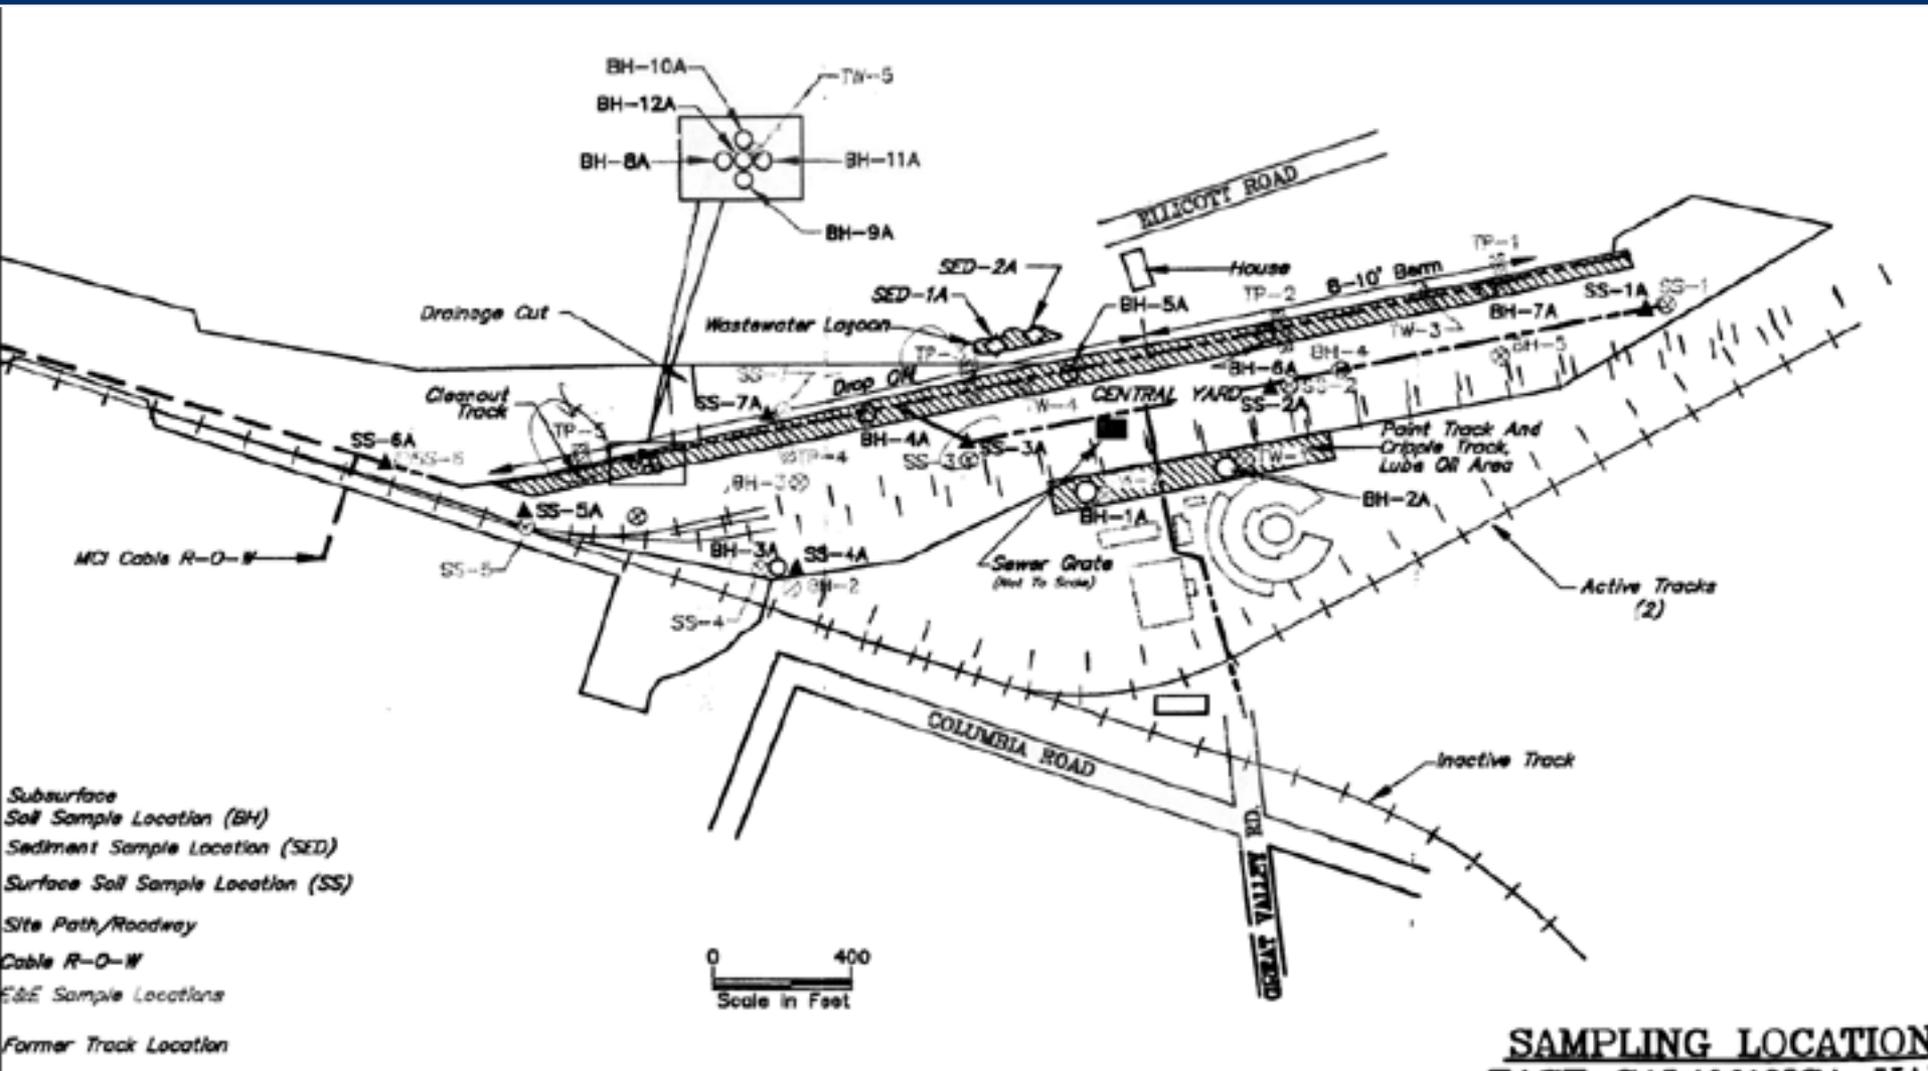

# *Salamanca Rail Yard*

## *B&P RR 1992*

# Preliminary Site Investigation Due Diligence

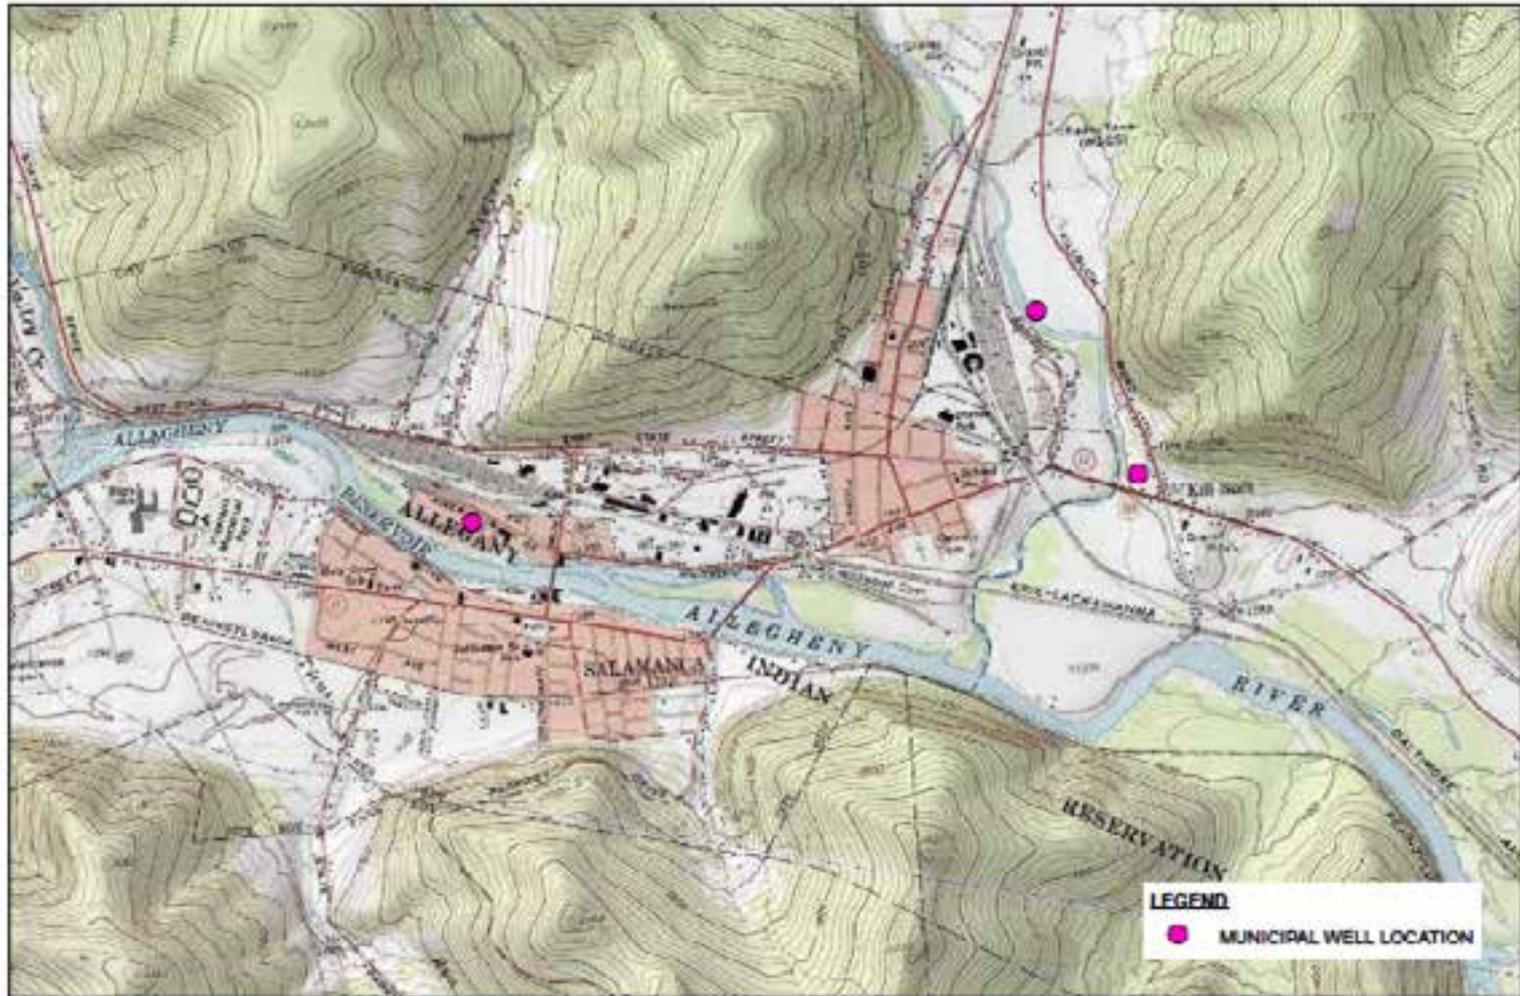

Subsurface  
Soil Sample Location (BH)  
Sediment Sample Location (SED)  
Surface Soil Sample Location (SS)  
Site Path/Roadway  
Cable R-O-W  
E&E Sample Locations  
Former Track Location

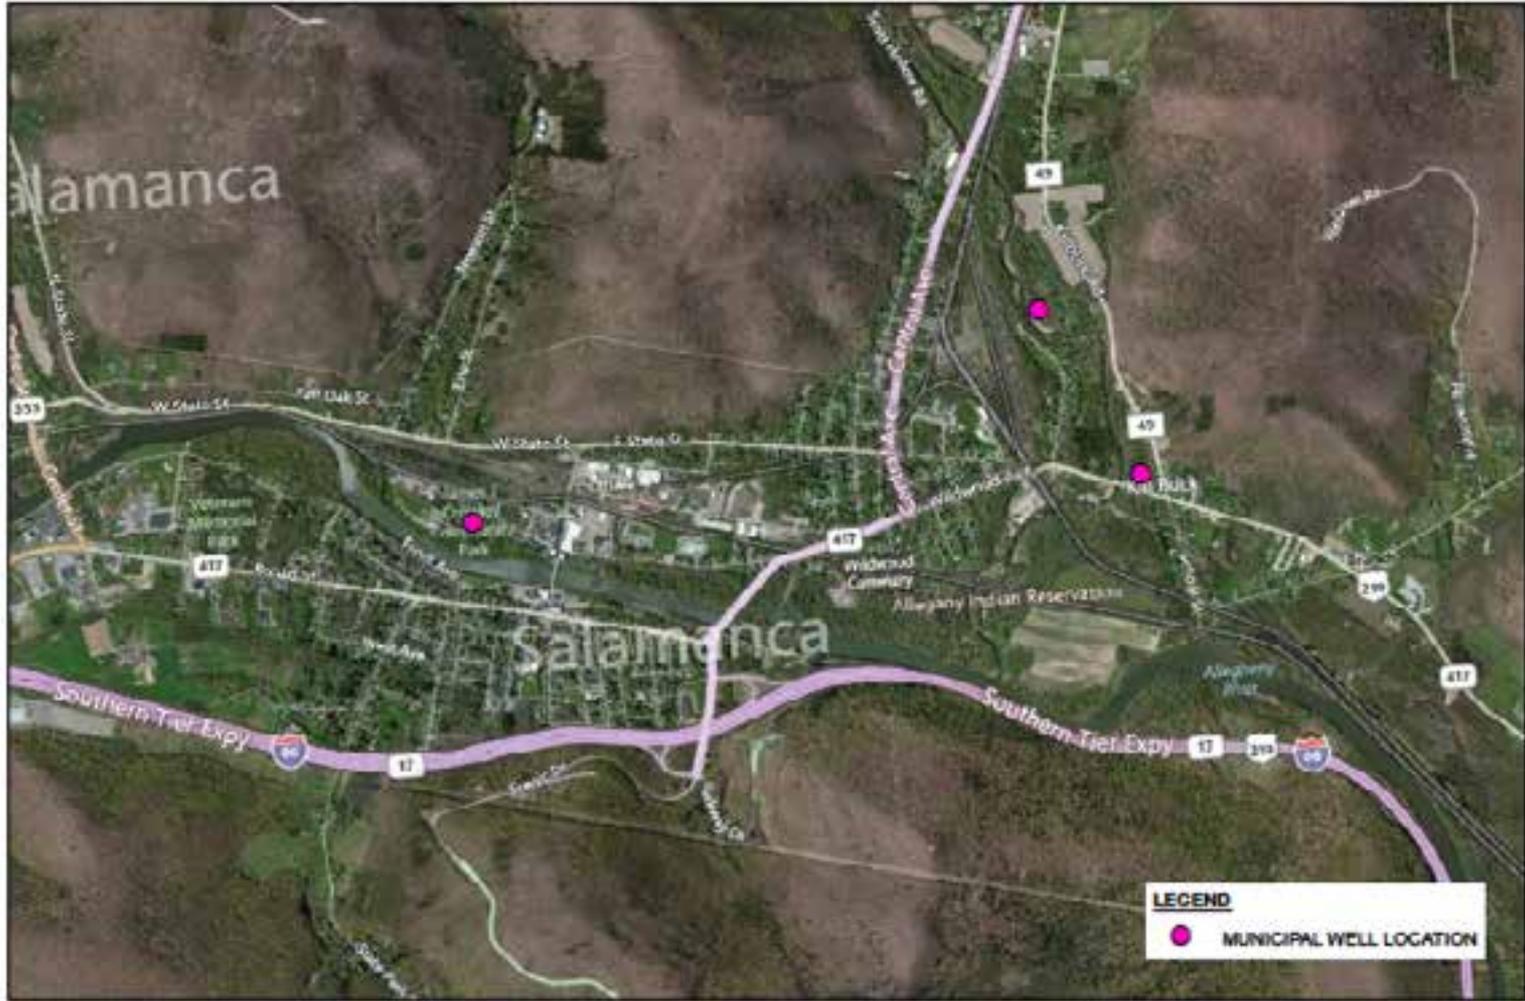

**SAMPLING LOCATION**

# Preliminary Site Investigation Salamanca Supply Wells

# Preliminary Site Investigation Salamanca Supply Wells

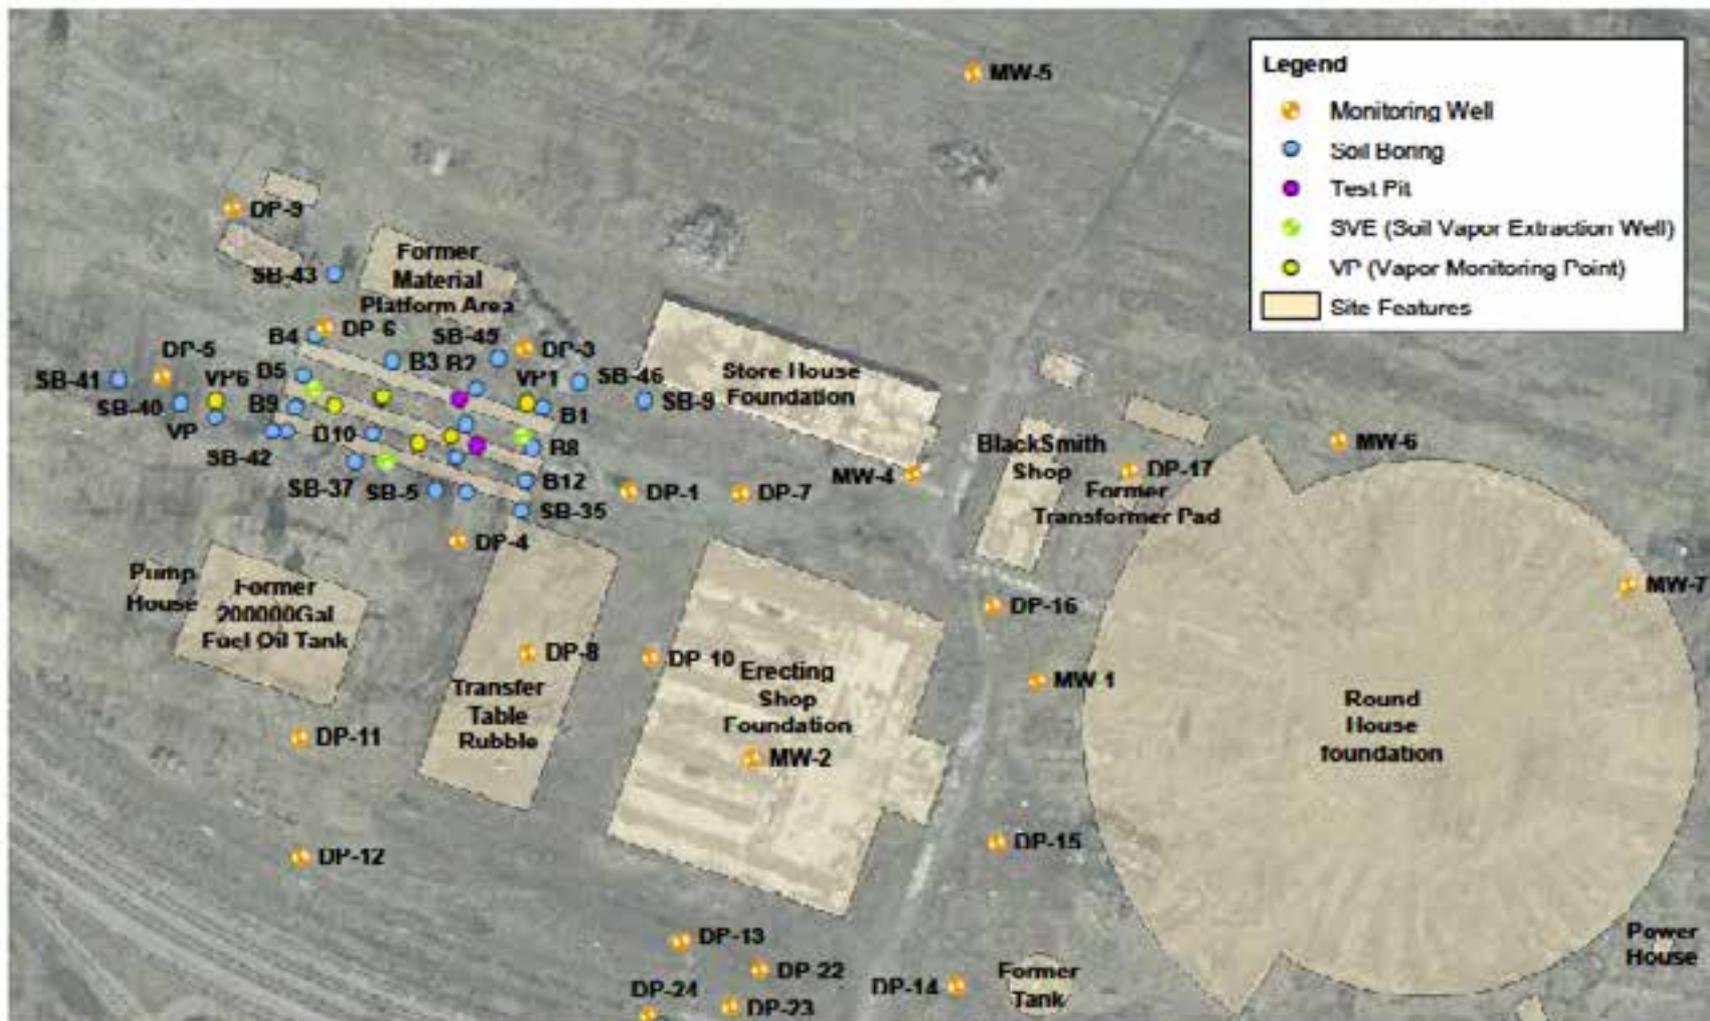

# Remedial Program Areas of Investigation

# Remedial Program

## Areas of Investigation – Former Fuel Storage Areas

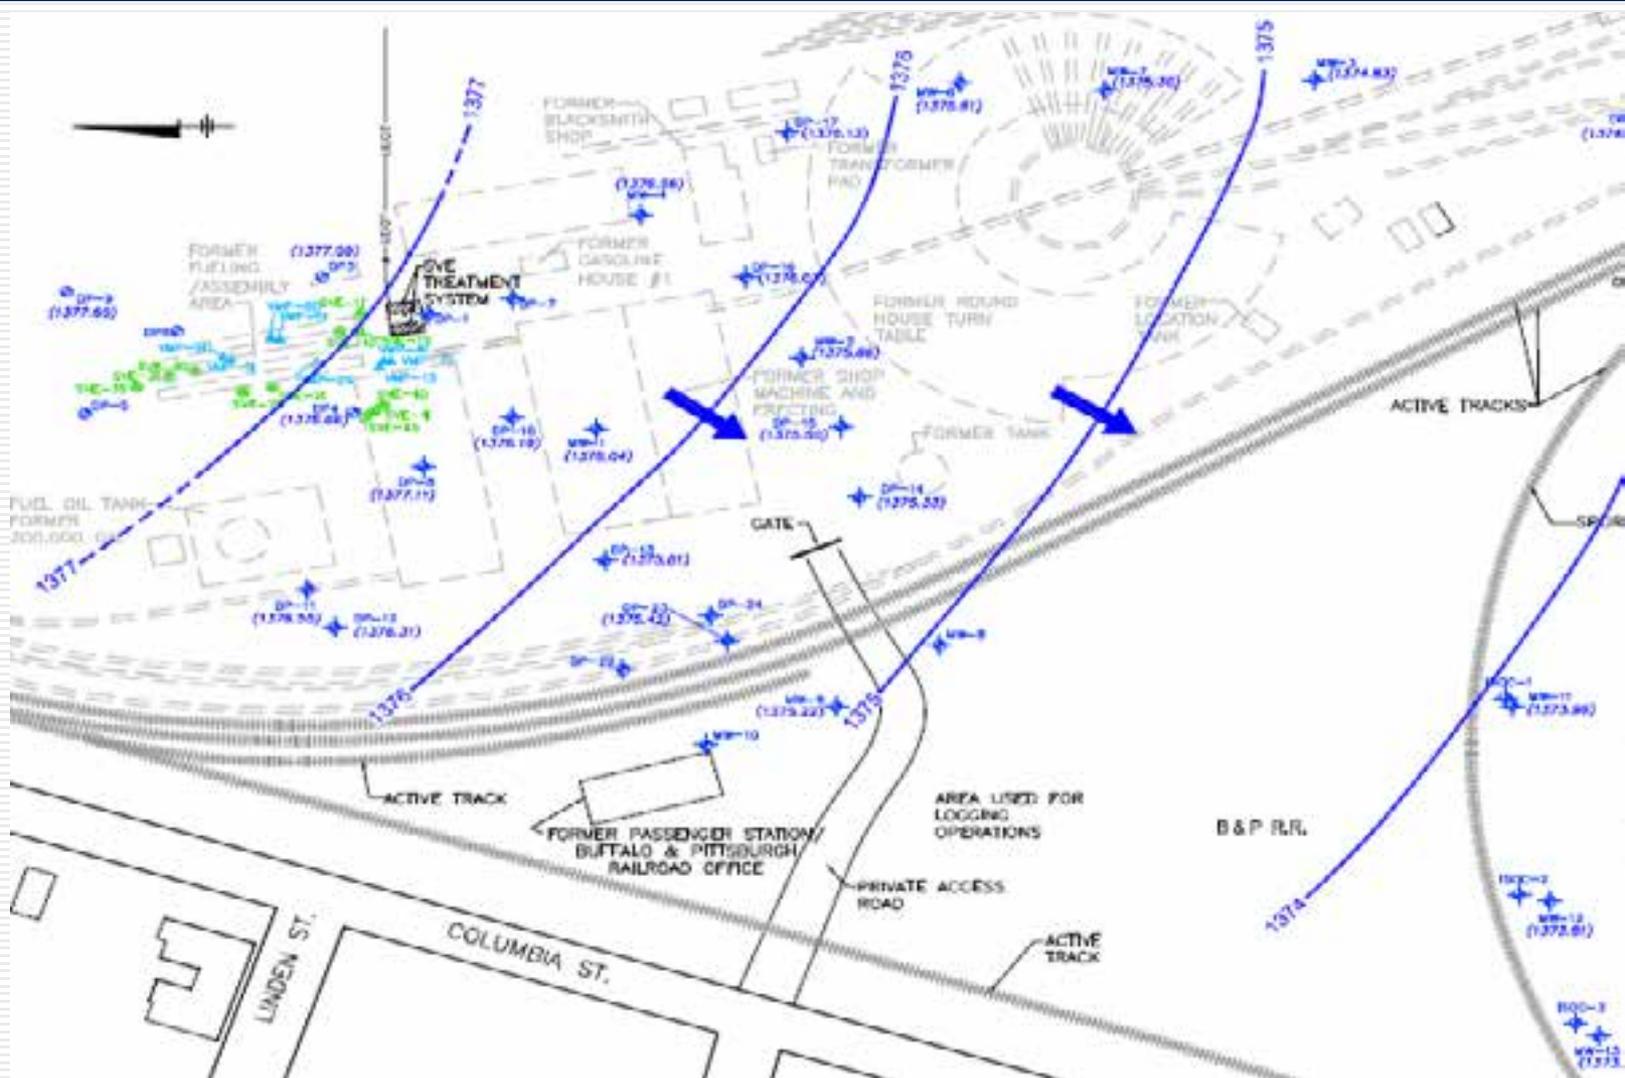

# Remedial Program

## Areas of Investigation – Former Fuel Dispenser Area

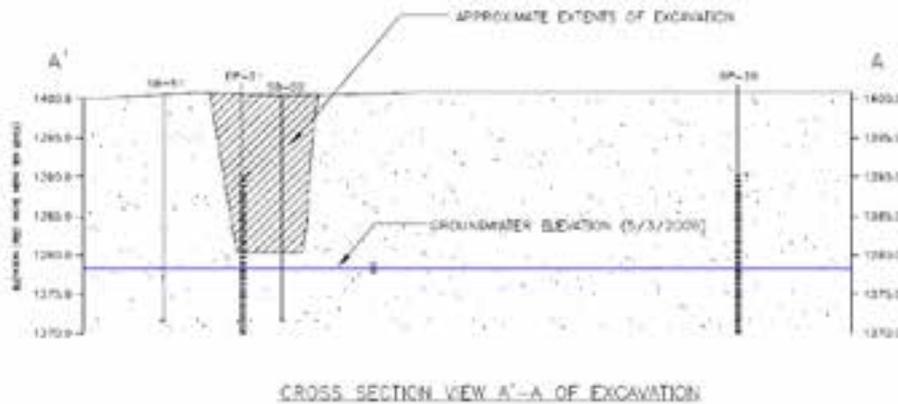

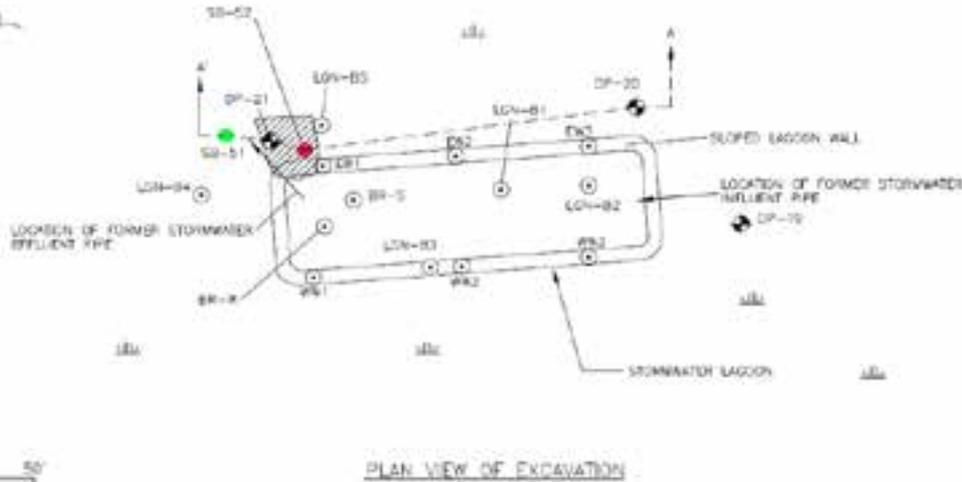

# Remedial Program

## Areas of Investigation – Off Site B&P Property

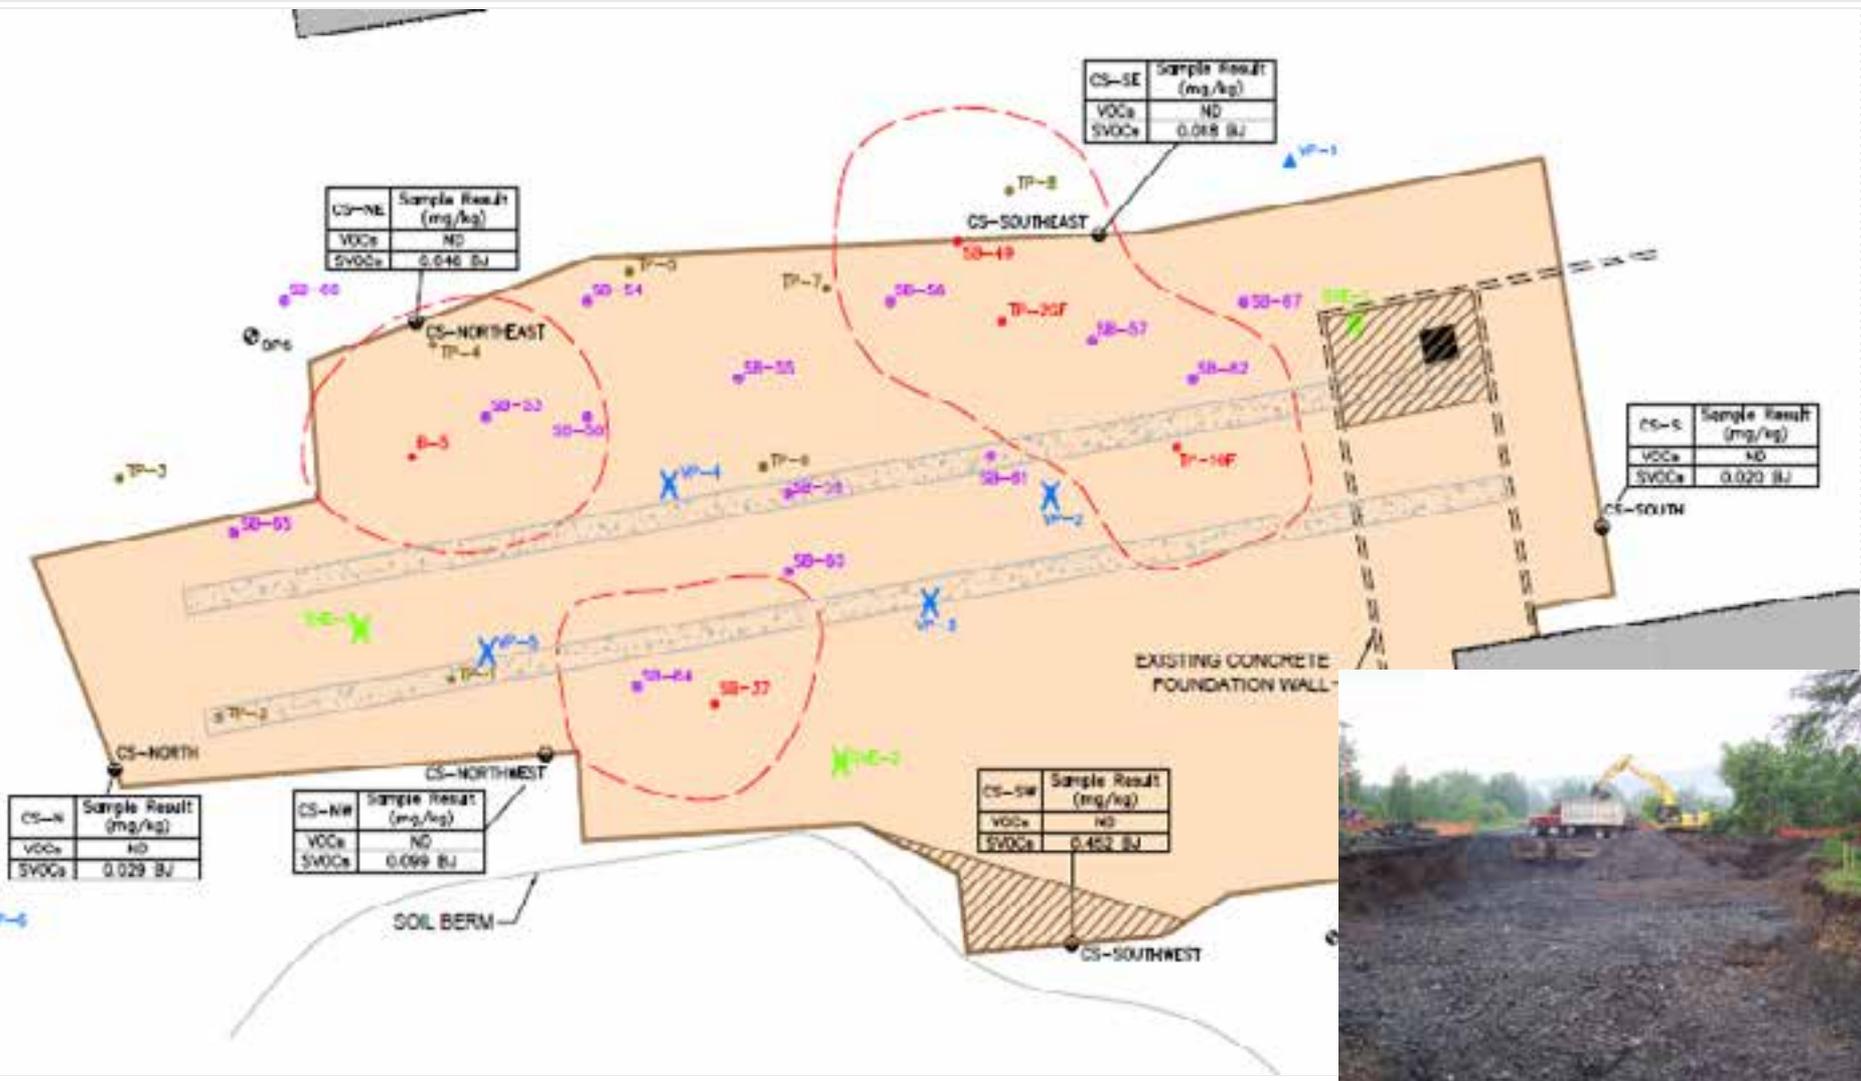

# Remedial Program

## Remedial Actions – Lagoon Closure

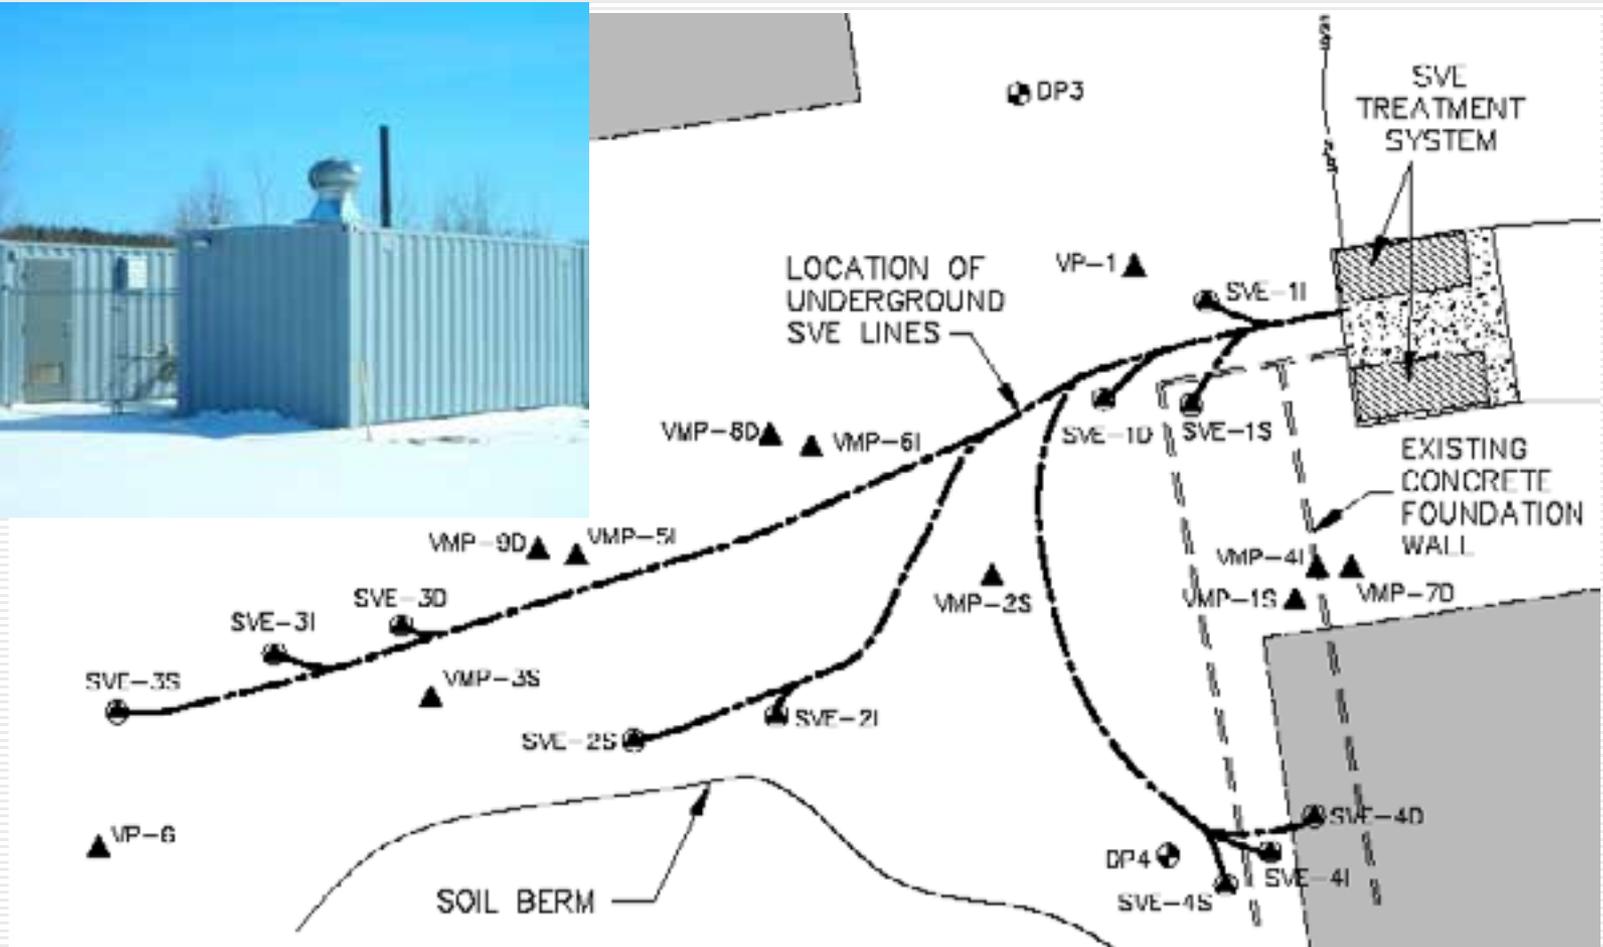

# Remedial Program

## Former Fuel Dispenser – Shallow Soils Source Removal

# Remedial Program

## Former Fuel Dispenser Area – Intermediate and Deep Zone Soil Vapor Extraction

# *Conceptual Site Model Development*

## *Salamanca Rail Yard*

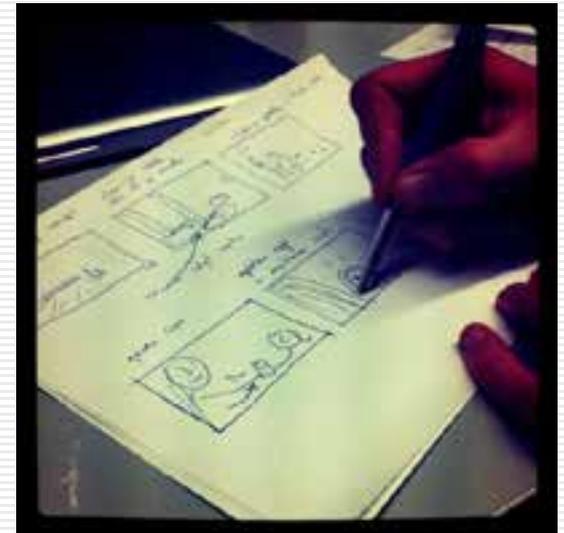

- n Identification of source areas
- n Migration pathways
- n Exposure points/receptors
- n Communication to stakeholders
  - City of Salamanca
  - Genesee & Wyoming (Buffalo & Pittsburgh line)
  - Potential private commercial/industrial development
  - New York State

# Conceptual Site Model Development Salamanca Rail Yard

# Visualization Concept Process

- n Think through the known data in 4-Dimensions
  - Space and Time
- n Storyboard the desired outcomes
- n Identify data gaps and acquire additional data
- n Define the deliverables and the scale
  - Animation
  - Poster
  - Real-world model

# GIS Development

## Conceptual Site Model

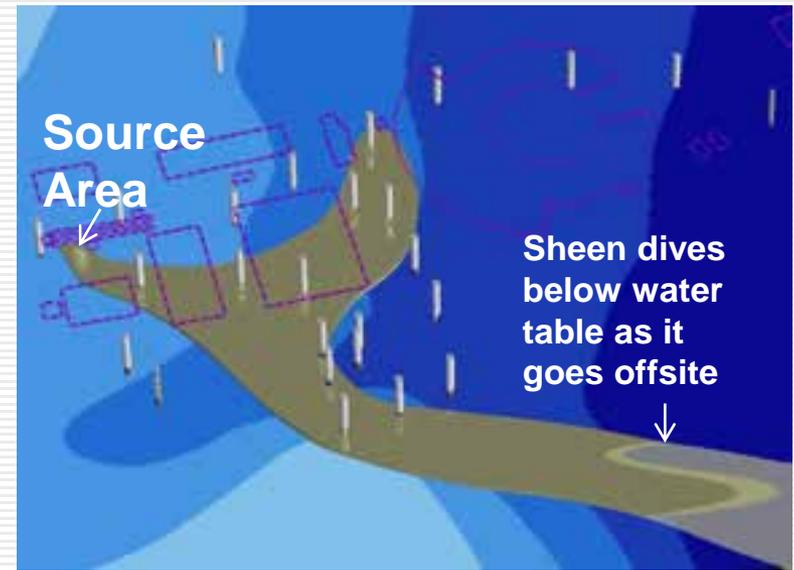

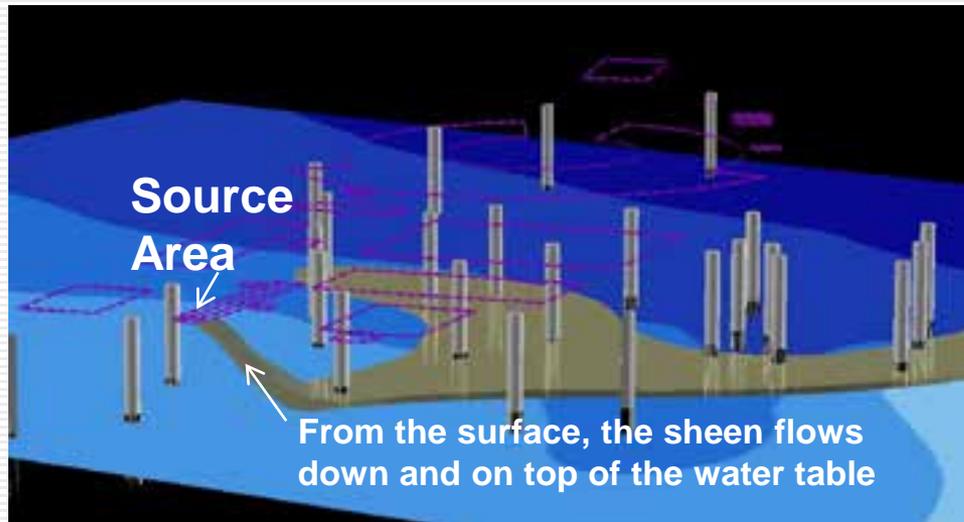

- n Data sources
  - CAD, USGS Seamless Data Distribution
- n Georeference historical images
- n Define XYZ values and Coordinate System
- n Assign symbology
  - Points
    - § Trees, homes, samples
  - Lines
    - § roads, rails
  - Polygons
    - § Plumes, building footprints

# GIS Development

## Conceptual Site Model

- n Create bookmarks (view points)
- n Create animations
- n Export to post-production
  - Final labeling, transitions, additional still images

# *CSM Animation*

# *Imagine the result*
