Web Mapping as a Humanitarian Knowledge Platform

What exactly does that mean?

Addressing the Issue

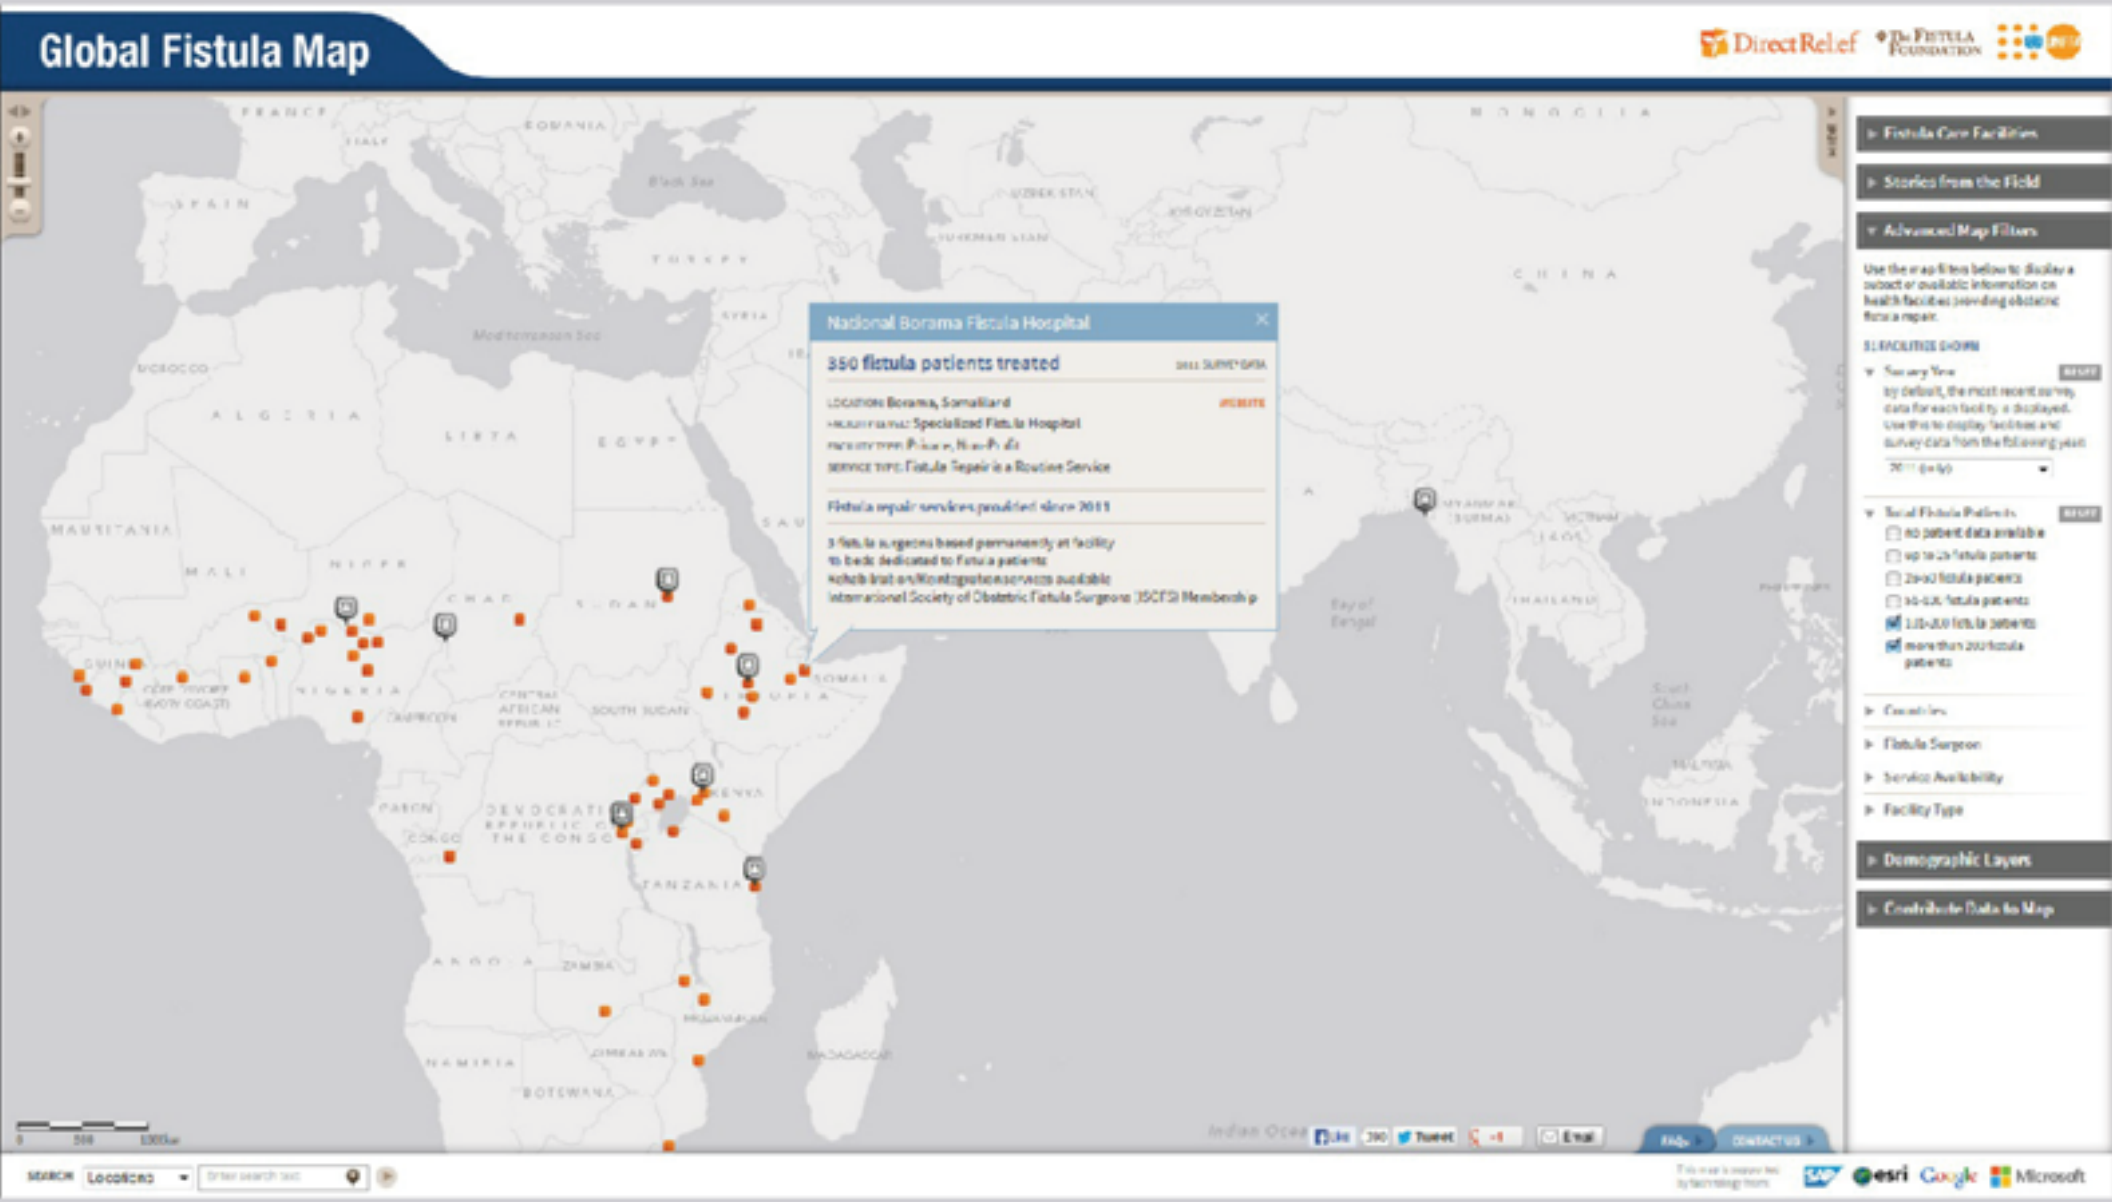
The Platform

- Visualized place and data on global map

  + EXPLORABLE: what is important to the user

  + EXPORTABLE: open data, this isn't just ours

  + CONTEXTUAL: related variables to give the data more meaning



Global Fistula Map
DirectRelief
The Fistula Foundation
National Borama Fistula Hospital
350 fistula patients treated
Fistula repair services provided since 2011
3 fistula surgeons based permanently at facility
10 beds dedicated to fistula patients
Rehabilitation/Reintegration services available
International Society of Obstetric Fistula Surgeons (ISOFS) Membership
Fistula Care Facilities

Identifying Needs

The Visualization

- Obvious gaps: Asia, Middle East, Oceania, South America need to be explored further
- More fine grained contextual data
- No services does not mean lack of need

Mobilizing Resources

The Community

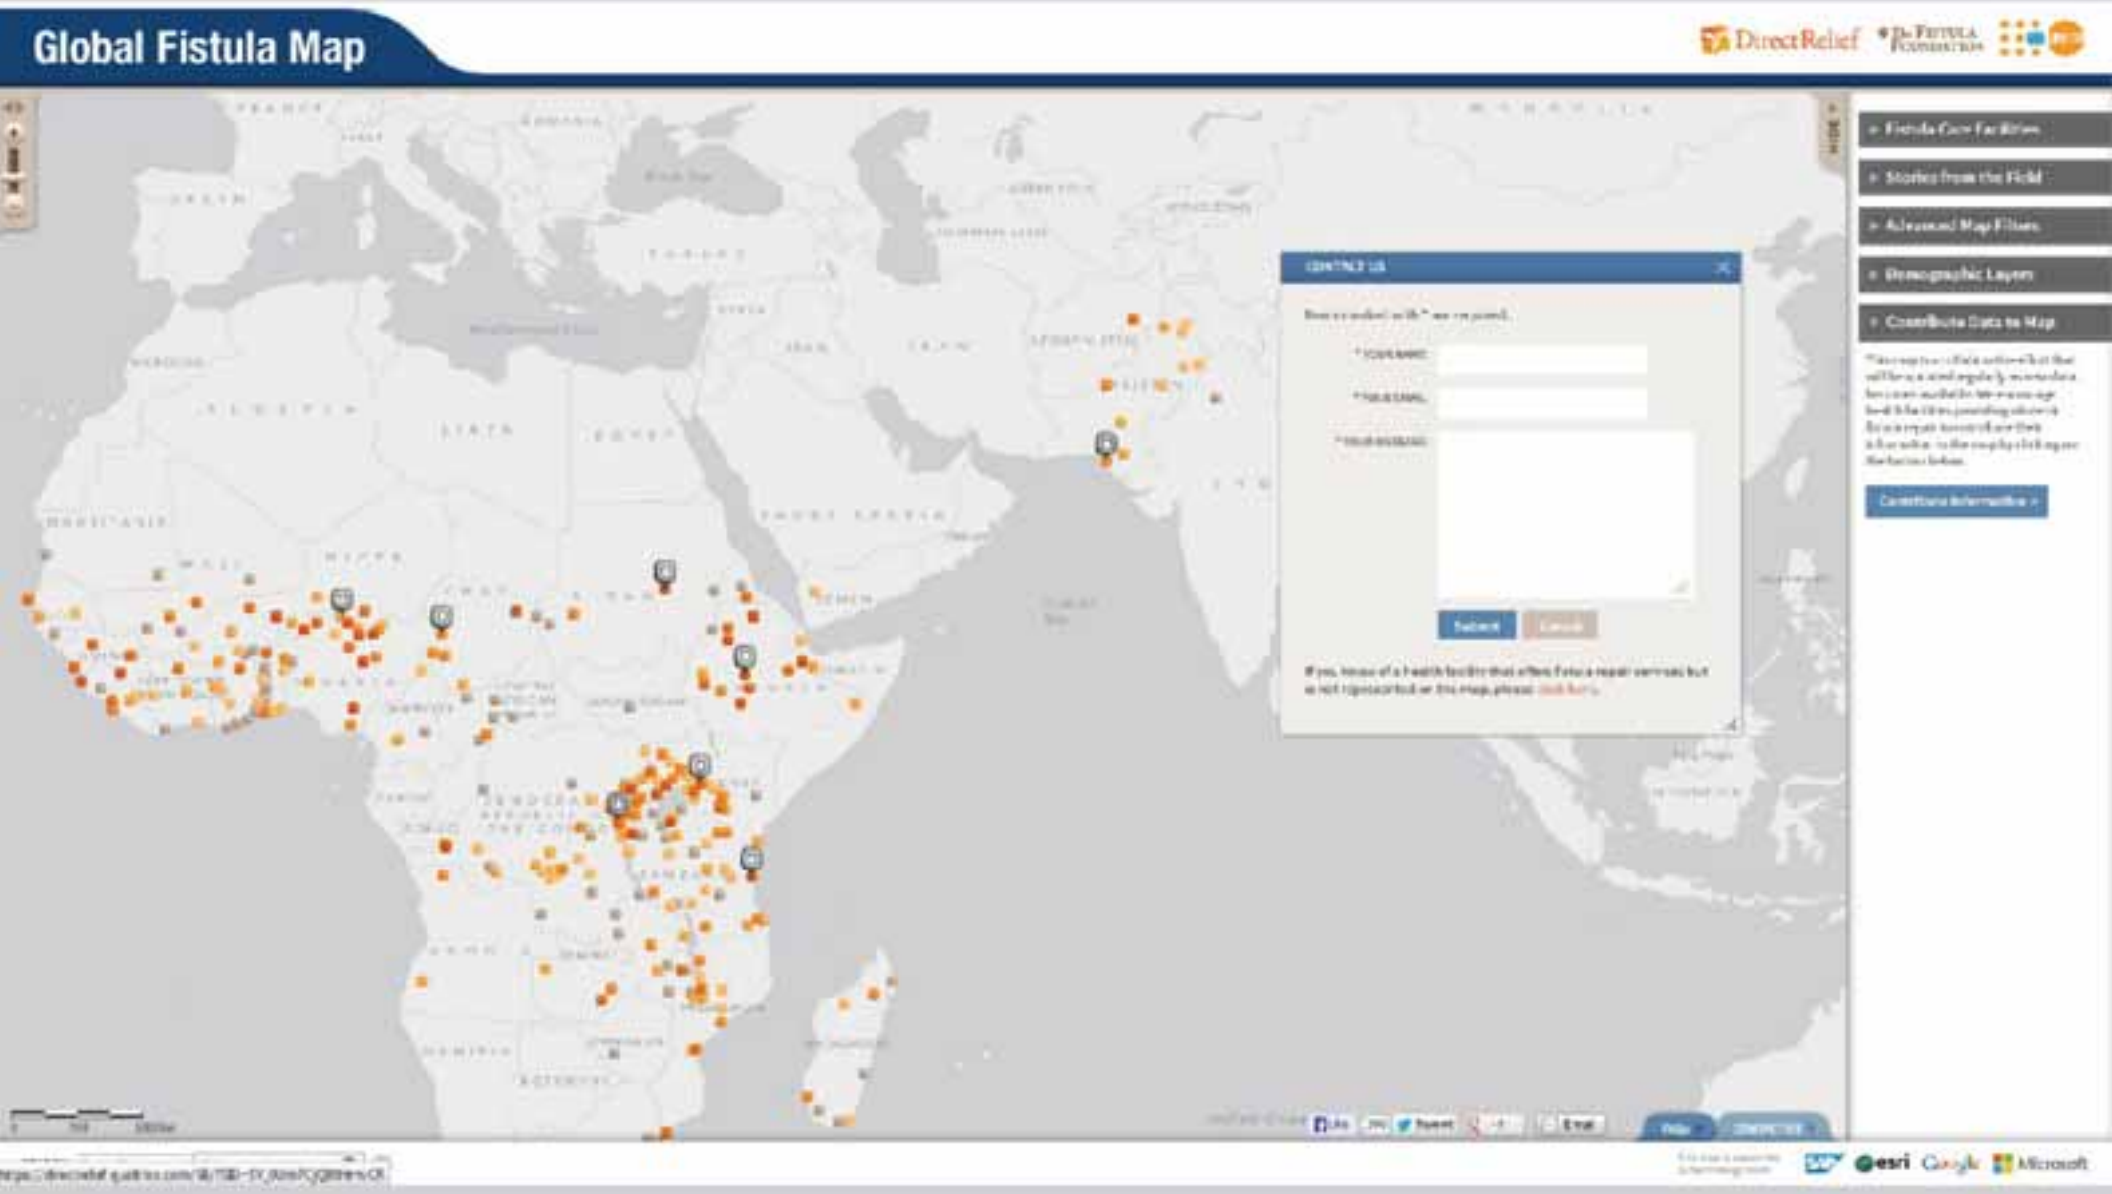
- Instant user feedback
  - + additional facilities
  - + facility data
  - + verification of info

- Other orgs using data for programmatic + funding work

- Helped change data collection conversation

- Evolving platform for data and advocacy because of community feedback and involvement

The Commu



programmatic + fundin
