

ArcGIS Online: Administering Your ArcGIS Organization through Scripting

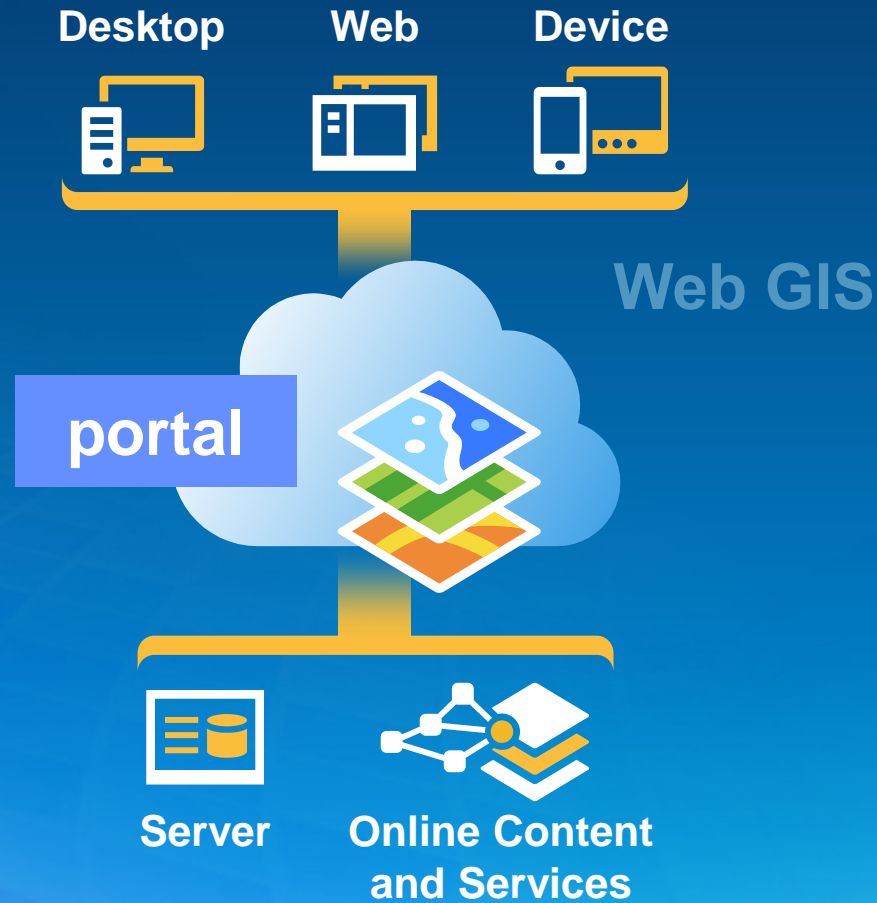

Witt Mathot, Dan O'Leary, Evan Caldwell

Technical Workshop

ArcGIS Is a Platform

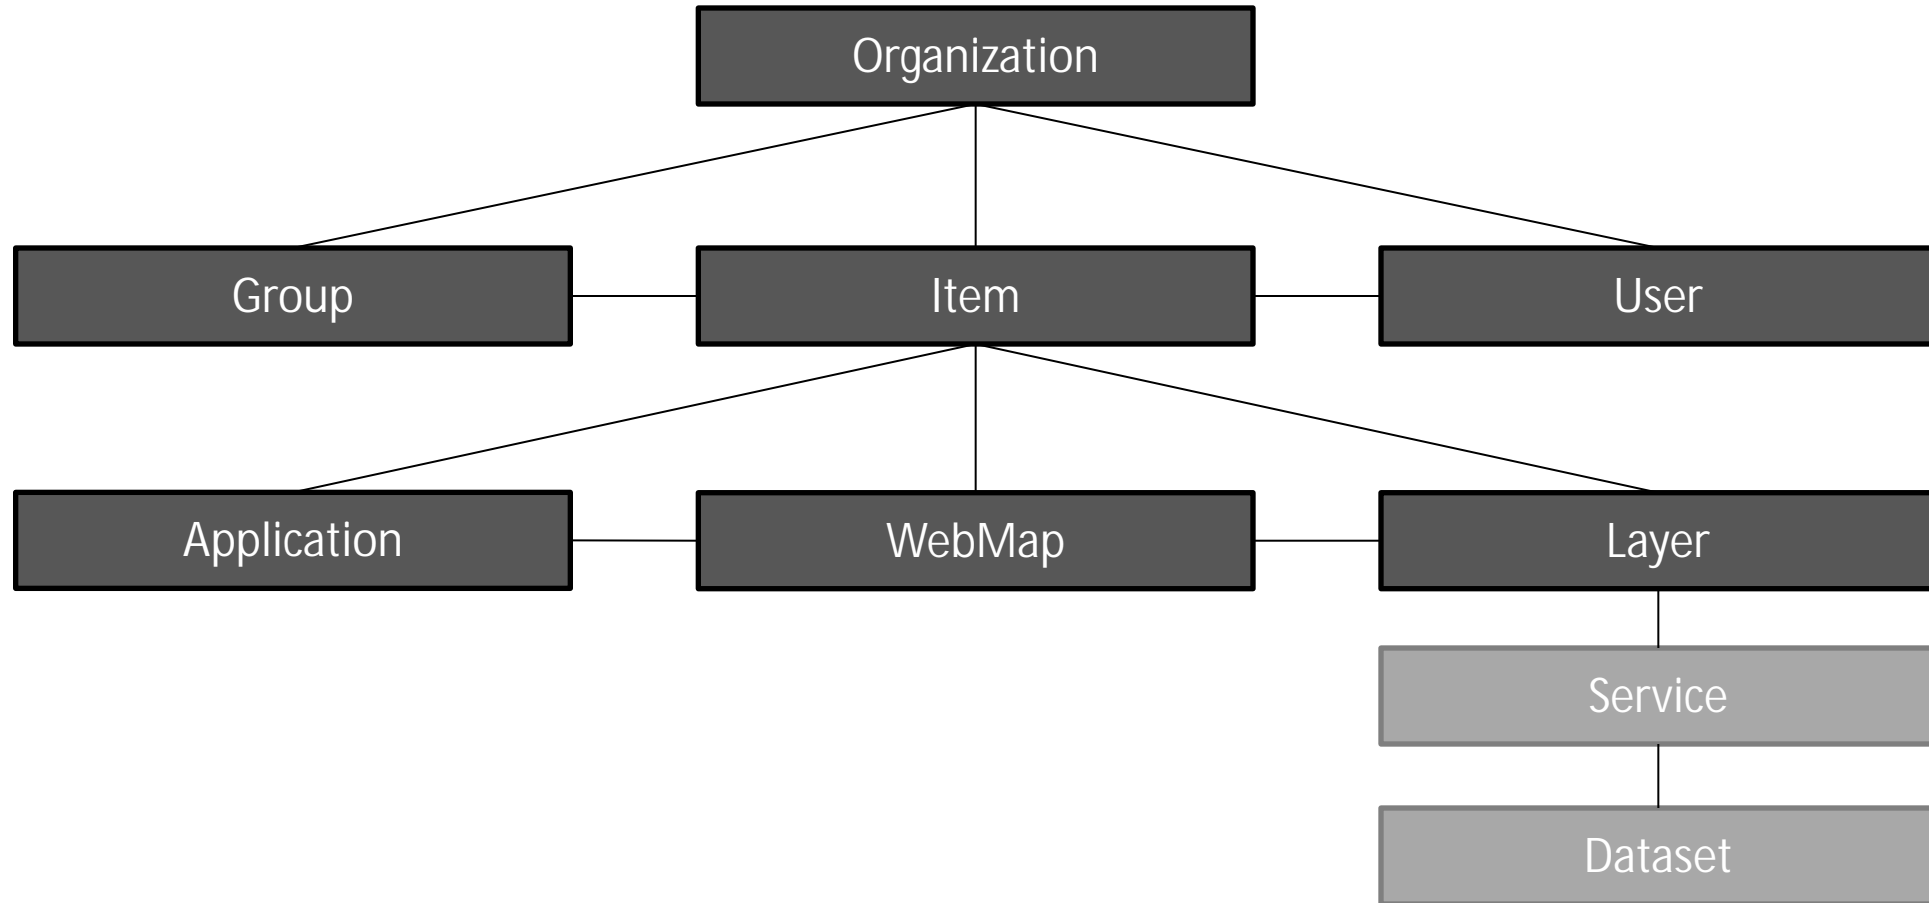

Enabling GIS Everywhere

Simple
Integrated
Open

*Available in the Cloud . . .
. . . and On-Premises*

Portal Information Model

Common Administrative Tasks

- Feature content
- Curate public groups
- On and off-board users
- Transfer ownership of items and groups
- Review content, groups, comments

...

Some Tasks May Demand Scripts

- Batch content, group, and user management *(e.g. remove/add users in bulk)*
- Advanced Housekeeping
 - Front end *(e.g. find/remove test items, find incomplete groups/items and alert owners)*
 - Back end *(e.g. find broken links and escalate, update references as hosts/services change)*
- Custom reports *(e.g. weekly summary reports)*
- Managing content across multiple portals *(e.g. sync, back/up restore items)*
