

Editing Versioned Geodatabases : An Introduction

Cheryl Cleghorn and Shawn Thorne

Technical Workshop

Assumptions:

- ü **Basic knowledge of relational databases**
- ü **Basic knowledge of the Geodatabase data model**
 - **Other sessions that focus on the geodatabase data model**

Requests:

- **Please hold questions until Q&A**

- **Please silence smart devices**

Session Path

- **Introduction to the Multi-user Geodatabase**
- **Versioning**
- **Types of Editing**
- **Archiving**
- **Geodatabase Replication**
- **Q & A**

Session Path

- **Introduction to the Multi-user Geodatabase**
 - **What is the Geodatabase?**
 - **The Geodatabase Management Approach**
 - **Different types of Geodatabases**
 - **The Multi-user Geodatabase**
- **Versioning**
- **Types of Editing**
- **Archiving**
- **Geodatabase Replication**
- **Q & A**

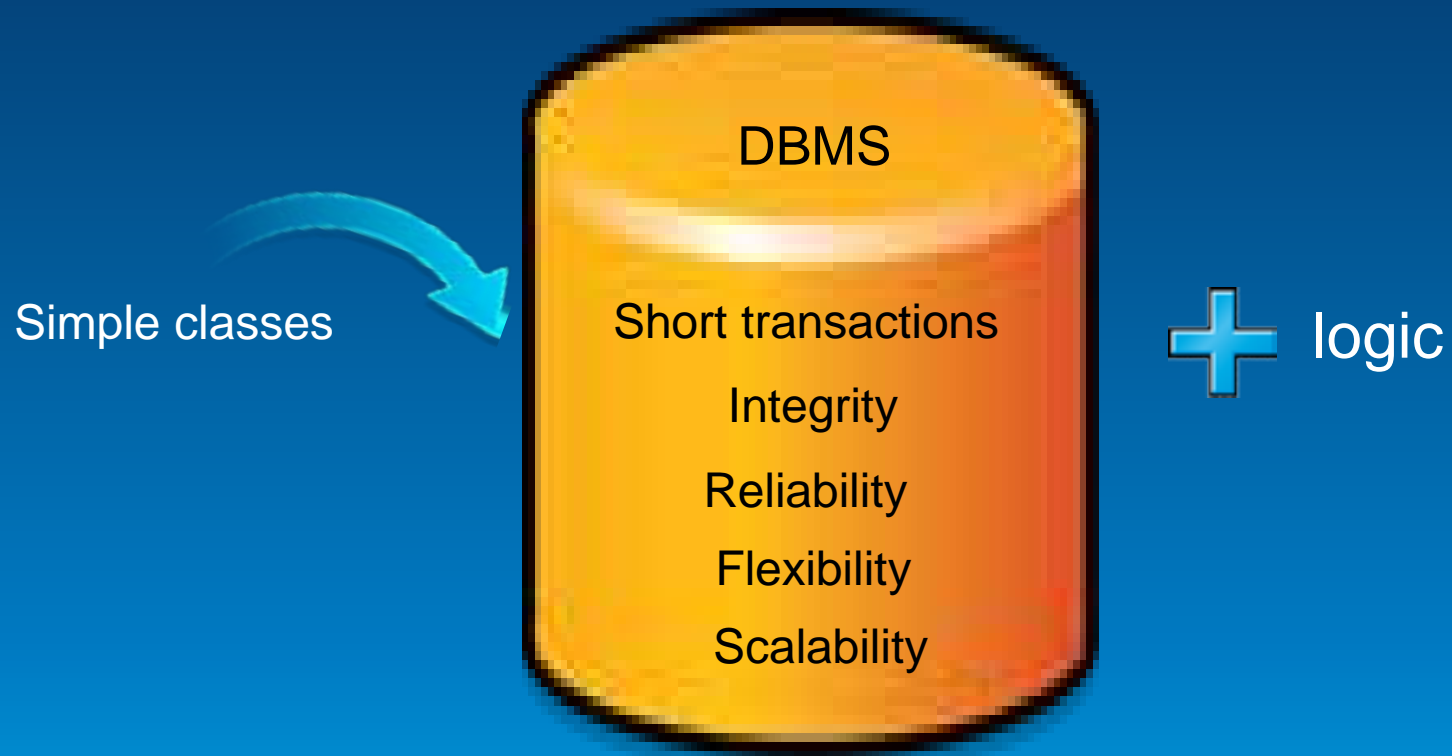

What is the Geodatabase?

- **Physical data store**
- **Core ArcGIS data model**
- **Transactional model**
- **COM components**

Three Types of Geodatabases

	Personal GDB 	File GDB 	Multi-user GDB (3 editions) 
Storage format	Microsoft Access	Folder of binary files	DBMS
Storage capacity	2 GB	1 TB per table*	Depends on edition
Supported O/S platform	Windows	Any platform	Depends on edition
Number of users	Single editor Multiple readers	Single editor Multiple readers	Multiple editors & readers
Distributed GDB functionality	Check out/check in One way replication	Check out/check in One way replication	Replication (all types) & versioning

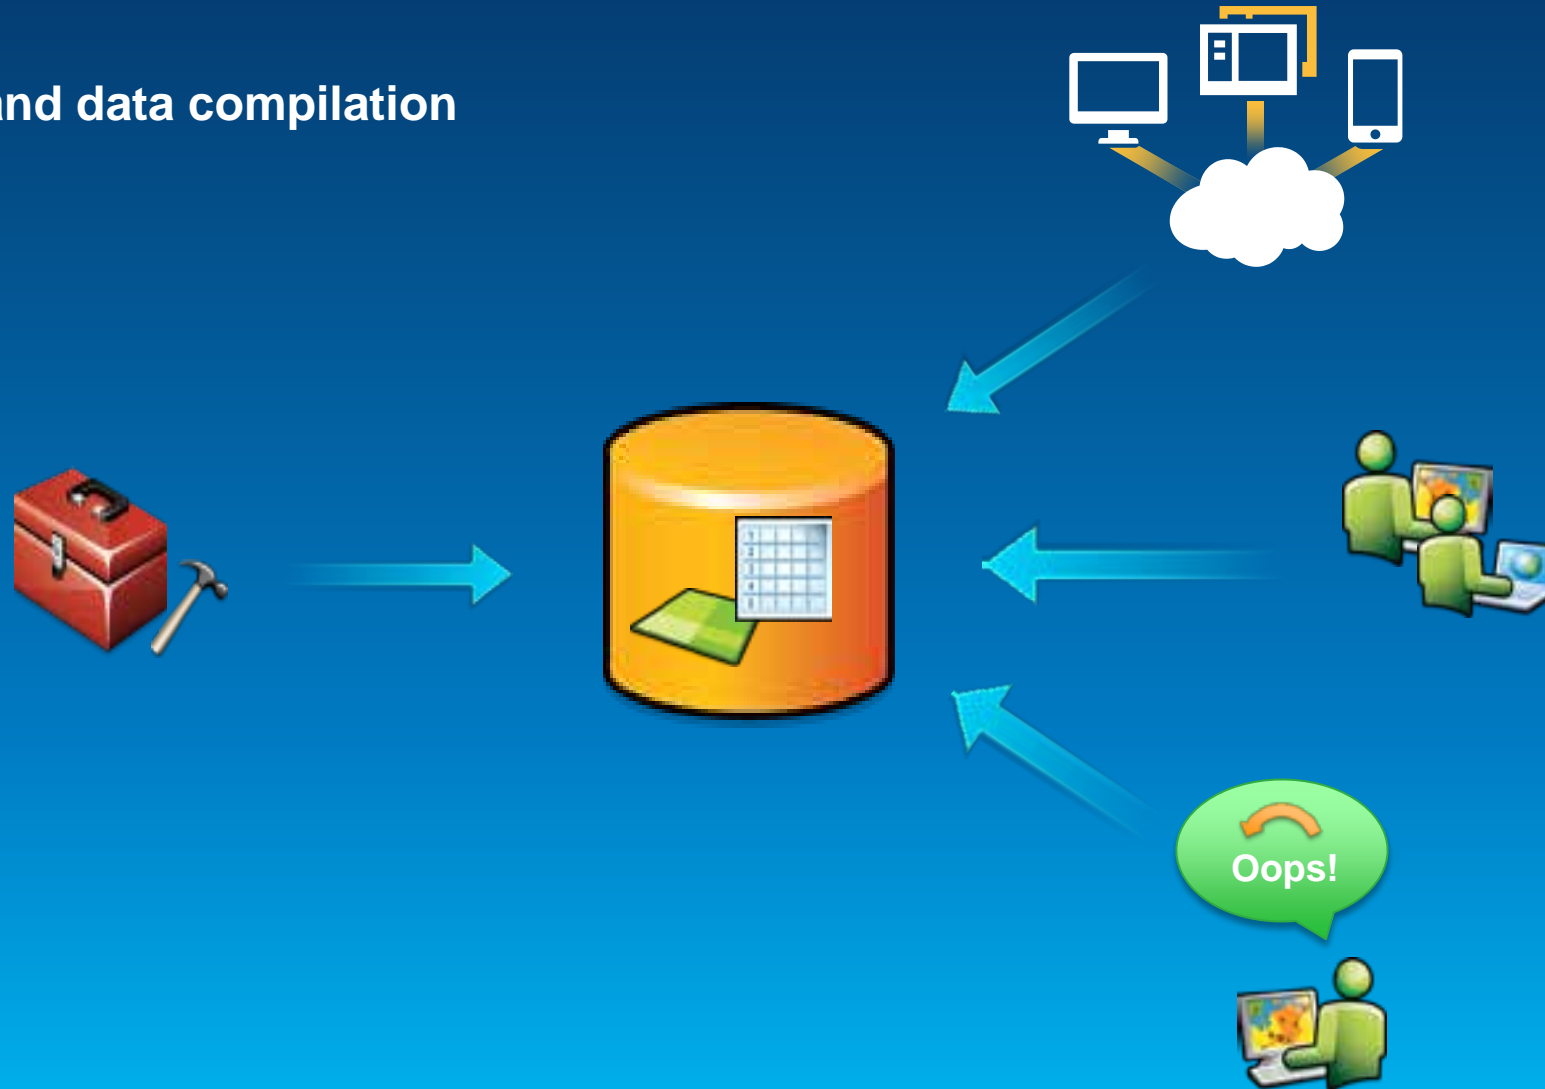

Mult-user Geodatabase Data Management Approach

Extend functionality and data integrity

Multi-user Geodatabase Data Management Approach...

Editing and data compilation

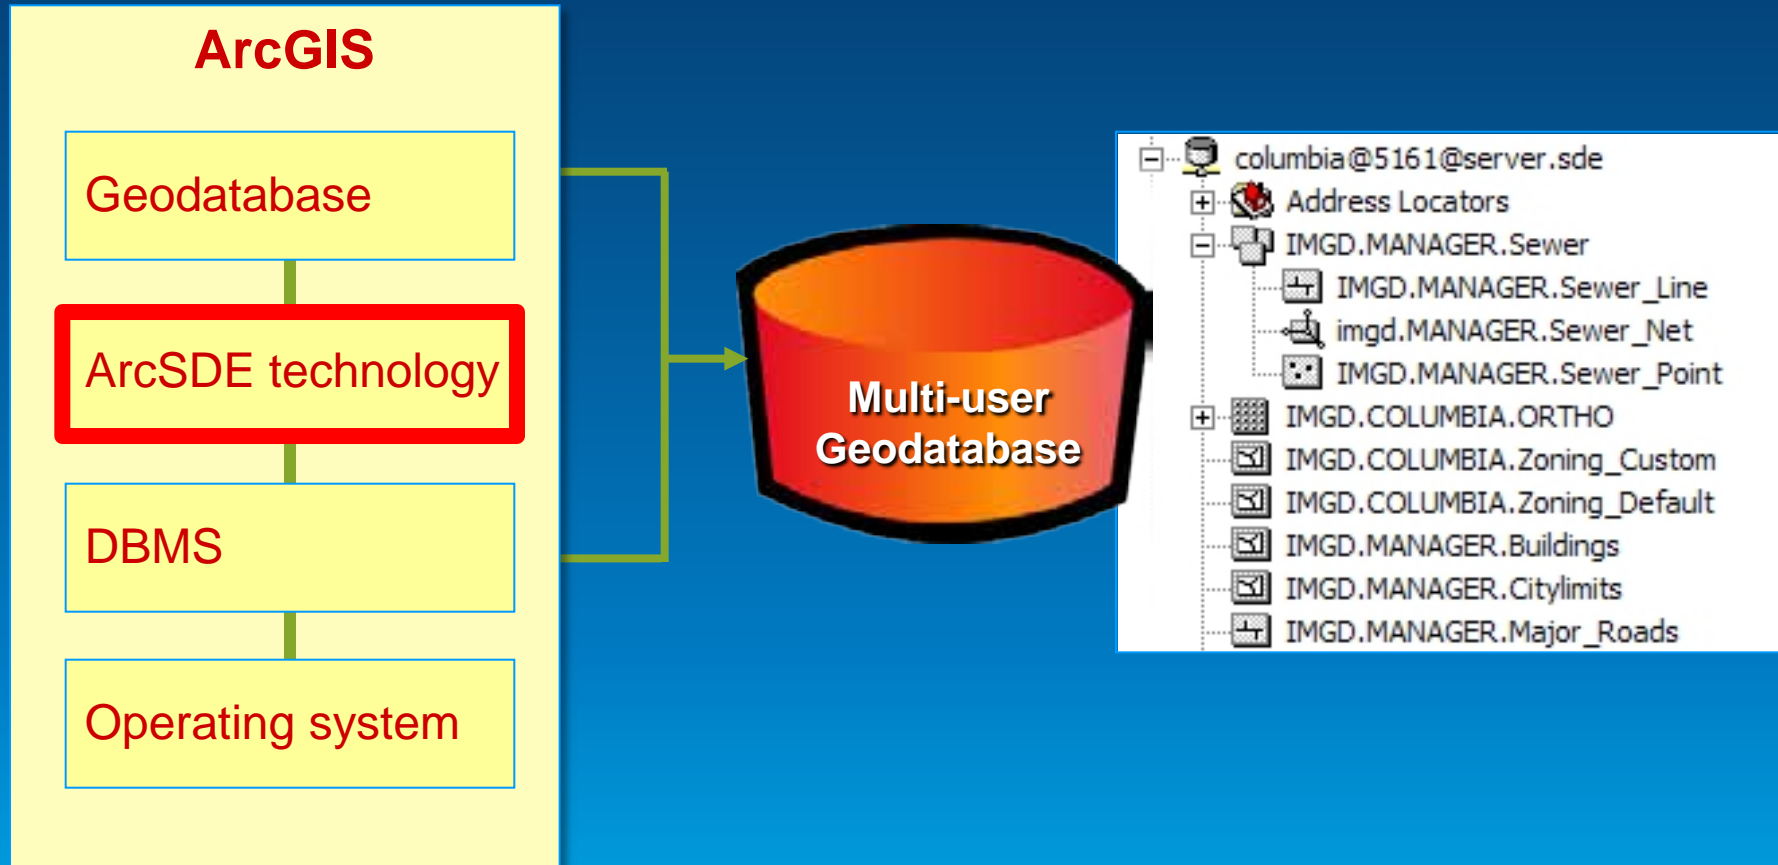

Multi-user Geodatabase Data Management Approach...

- **Versioning workflows**
 - Long transactions
 - Distributed data management
- **Robust, customizable framework**

What is a Multi-user Geodatabase?

- **Previously called an ArcSDE Geodatabase**
- **ESRI's geospatial technology**
- **Unique capabilities:**
 - **Many supported DBMSs**
 - **Full, open SQL access**
 - **Versioning**
 - **Archiving**
 - **Replication**

How is ArcSDE technology included in ArcGIS?

Three editions of Multi-user Geodatabase

	Desktop Geodatabase	Workgroup Geodatabase	Enterprise Geodatabase
ArcGIS Product	ArcGIS Desktop and Engine	ArcGIS Server Workgroup	ArcGIS Server Enterprise
Administration	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop, Geoprocessing tools

Scales from small, personal systems up to workgroups and very large enterprises

- Same functionalities

Which Multi-user Geodatabase edition?

	Desktop Geodatabase	Workgroup Geodatabase	Enterprise Geodatabase
ArcGIS Product	ArcGIS Desktop and Engine	ArcGIS Server Workgroup	ArcGIS Server Enterprise
Number of users	Max 3 users, 1 editor at any one time	Max 10 clients at one time No limit to the number of connections	Unlimited
Administration	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop, Geoprocessing tools

Which Multi-user Geodatabase edition?

	Desktop Geodatabase	Workgroup Geodatabase	Enterprise Geodatabase
ArcGIS Product	ArcGIS Desktop and Engine	ArcGIS Server Workgroup	ArcGIS Server Enterprise
Number of users	Max 3 users, 1 editor at any one time	Max 10 clients at one time No limit to the number of connections	Unlimited
Supported DBMS	SQL Server Express	SQL Server Express	Oracle, SQL Server, DB2, Informix, PostGreSQL
Administration	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop, Geoprocessing tools

Which Multi-user Geodatabase edition?

	Desktop Geodatabase	Workgroup Geodatabase	Enterprise Geodatabase
ArcGIS Product	ArcGIS Desktop and Engine	ArcGIS Server Workgroup	ArcGIS Server Enterprise
Number of users	Max 3 users, 1 editor at any one time	Max 10 clients at one time No limit to the number of connections	Unlimited
Supported DBMS	SQL Server Express	SQL Server Express	Oracle, SQL Server, DB2, Informix, PostGreSQL
Resource limits	Max database size 4 Gig 1 GB RAM on a single cpu	Max database size 4 Gig 1 GB RAM on a single cpu	No limits
Administration	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop (ArcCatalog)	ArcGIS Desktop, Geoprocessing tools

Session Path

- Introduction to the Multi-user Geodatabases
- **Versioning**
 - **What is it?**
 - **Why Use Versioning?**
- Types of Editing
- Archiving
- Geodatabase Replication
- Q & A

Versioning: What is it?

- Multi-user Technology

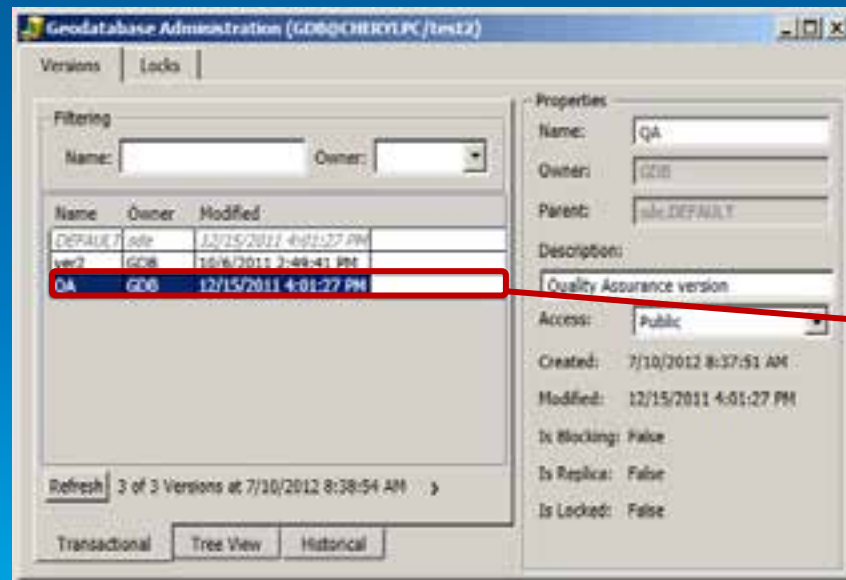

Version:

- An alternative view of the Geodatabase
- Edits independent of other versions

Version:

- An alternative view of the Geodatabase
- Edits independent of other versions

Why Use Versioning?

- **Multiple Editors**
- **Different Views of the Data**
- **Editing Complex Data (e.g. Geometric Networks)**
- **Replication**

Why Use Versioning?...

- **Editing with long transactions**
 - Isolate work across multiple sessions
 - Edits do not impact others

- **Model what-if scenarios**

Session Path

- Introduction to the Multi-user Geodatabase
- Versioning
- **Types of Multi-user Geodatabase Editing**
 - **Versioned Editing**
 - **Non-Versioned Editing**
 - **Editing through SQL**
- Archiving
- Geodatabase Replication
- Q & A

Editing Multi-user Geodatabases

- **Short Transactions**

- E.g., ATM transactions, Library records, Timecards

- **Long Transactions**

- E.g., Parcel updates
- General geographic editing

- **GIS editors need both short and long transactions**

Three ways to edit Multi-user Geodatabases

- **Versioned Editing (Long Transactions)**
- **Non-Versioned Editing (Short Transactions)**
- **Editing through SQL (Short Transactions)**

Versioned Editing

- **Versioned Edit Sessions**
 - Through a version
 - Concurrent editing
 - Long transactions (hours/days)
 - Undo/Redo

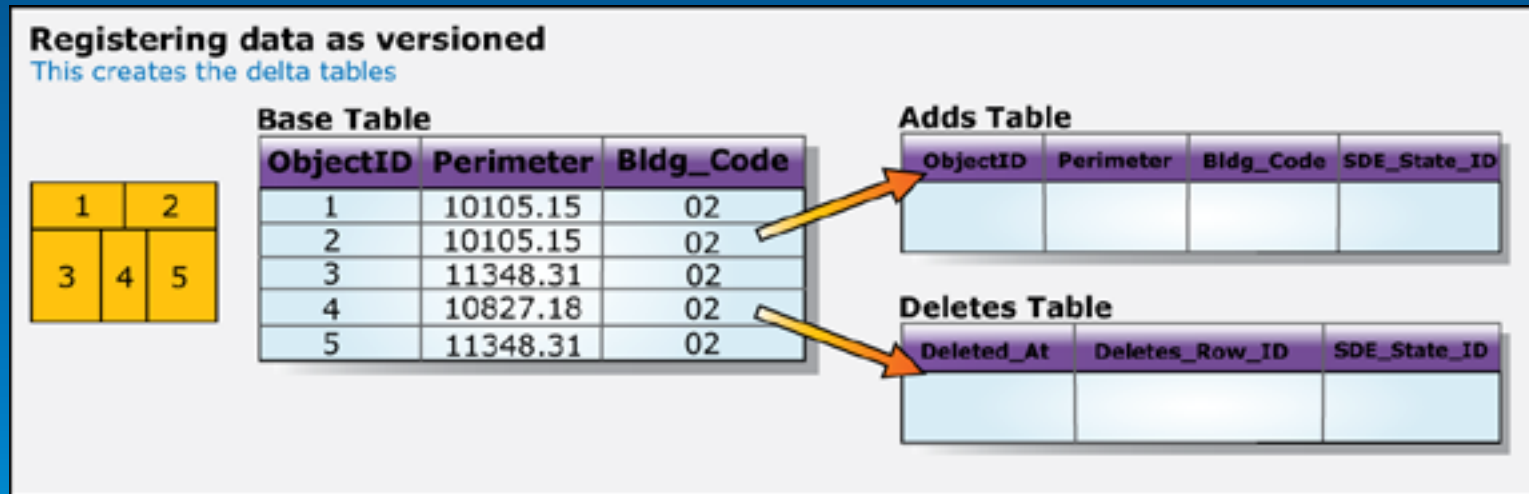

How Versioning Works

-Register as Versioned

How Versioning Works

- Registered as Versioned
 - Creates Adds and Deletes tables for tracking edits

How Versioning Works

- Adding Features
 - Record added to the Adds Table
 - Version will be referenced (SDE_State_ID Field)

Adding a Feature
Inserts a row in the Adds table

ObjectID	Perimeter	Bldg_Code
1	10105.15	02
2	10105.15	02
3	11348.31	02
4	10827.18	02
5	11348.31	02

ObjectID	Perimeter	Bldg_Code	SDE_State_ID
6	10105.15	02	27505

Deleted_At	Deletes_Row_ID	SDE_State_ID

How Versioning Works

- **Deleting Features**
 - Record added to Deletes Table
 - Version will be referenced (Deleted_At field)

Deleting a Feature
Inserts a row in the Deletes table

ObjectID	Perimeter	Bldg_Code
1	10105.15	02
2	10105.15	02
3	11348.31	02
4	10827.18	02
5	11348.31	02

ObjectID	Perimeter	Bldg_Code	SDE_State_ID
6	10105.15	02	27505

Deleted_At	Deletes_Row_ID	SDE_State_ID
27506	5	0

How Versioning Works

- **Updating Features**
 - Record added to both Adds and Deletes table
 - Version will be referenced (SDE_State_ID Field)

Updating a Feature
Inserts a row in both the Adds and Deletes tables

Base Table

ObjectID	Perimeter	Bldg_Code
1	10105.15	02
2	10105.15	02
3	11348.31	02
4	10827.18	02
5	11348.31	02

Adds Table

ObjectID	Perimeter	Bldg_Code	SDE_State_ID
6	10105.15	02	27505
2	20210.30	02	27507

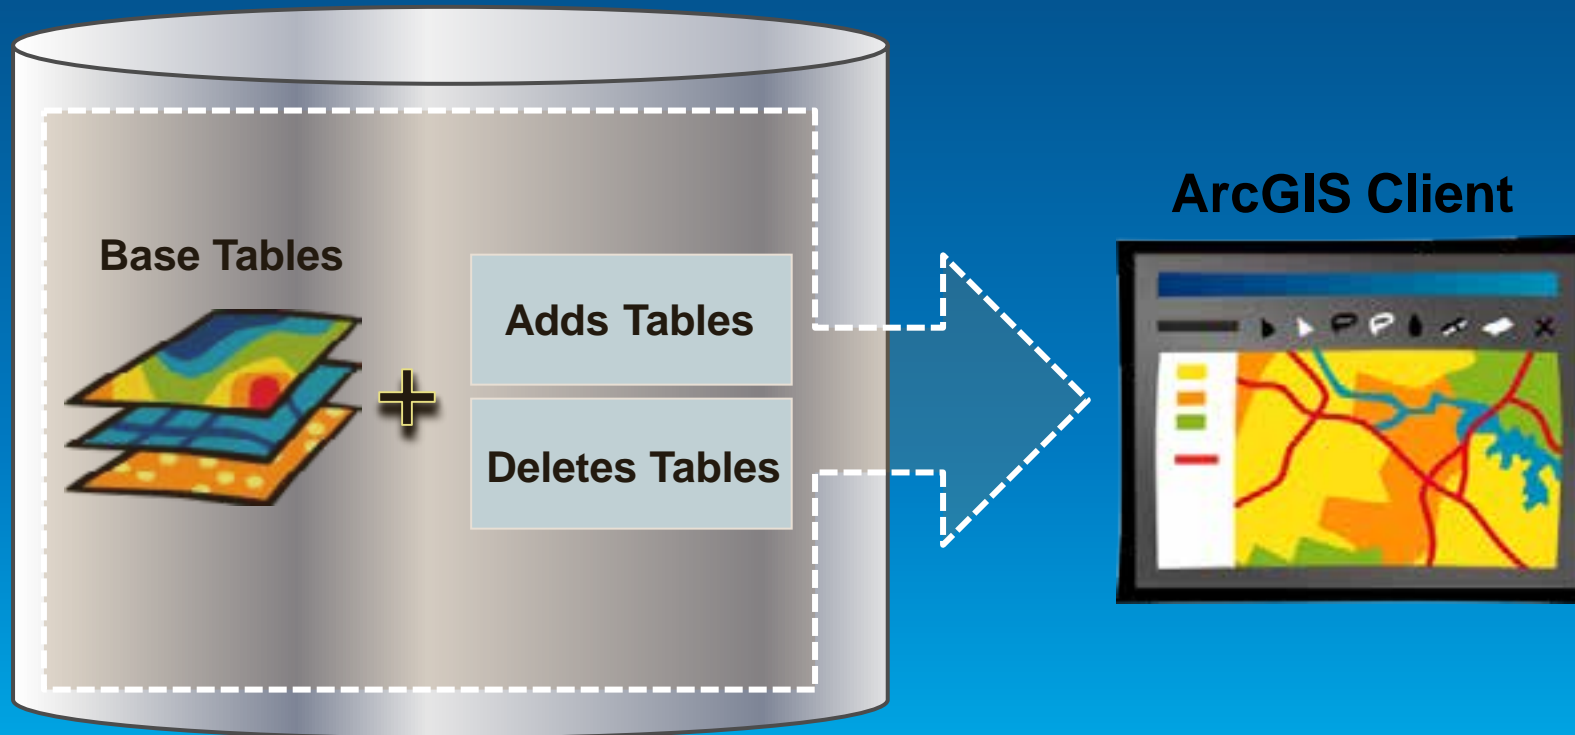

Deletes Table

Deleted_At	Deleter_Row_ID	SDE_State_ID
27506	5	0
27507	2	0

A red arrow points from the row in the Deletes Table (Deleted_At: 27507, Deleter_Row_ID: 2) to the row in the Adds Table (ObjectID: 2, SDE_State_ID: 27507).

How Versioning Works

- **Versioned feature classes:**
 - **Base Tables, Adds Tables & Deletes Tables**

Versioned Editing Demo

Shawn Thorne

Versioned Editing – Reconcile and Post

- How can versions be consolidated?

Versioned Editing – Reconcile

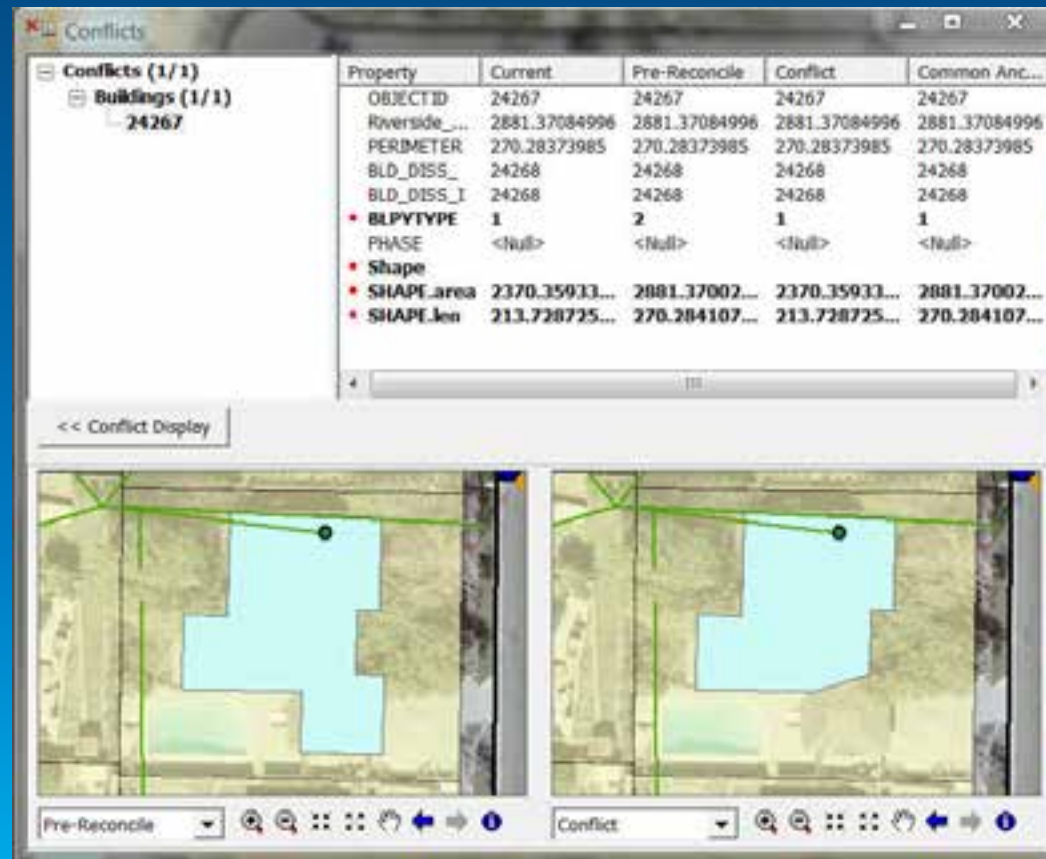

- Incorporate changes from the target version

No locks on edit

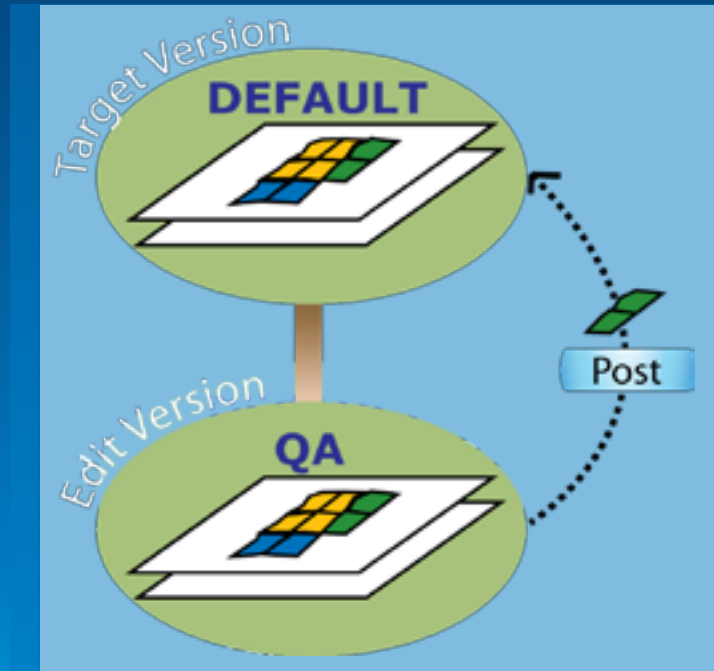

Reconcile and Conflicts

- No locks on edit
 - Data overwritten?
 - Conflict detection
- Conflict Resolution Dialog

Versioned Editing – Post

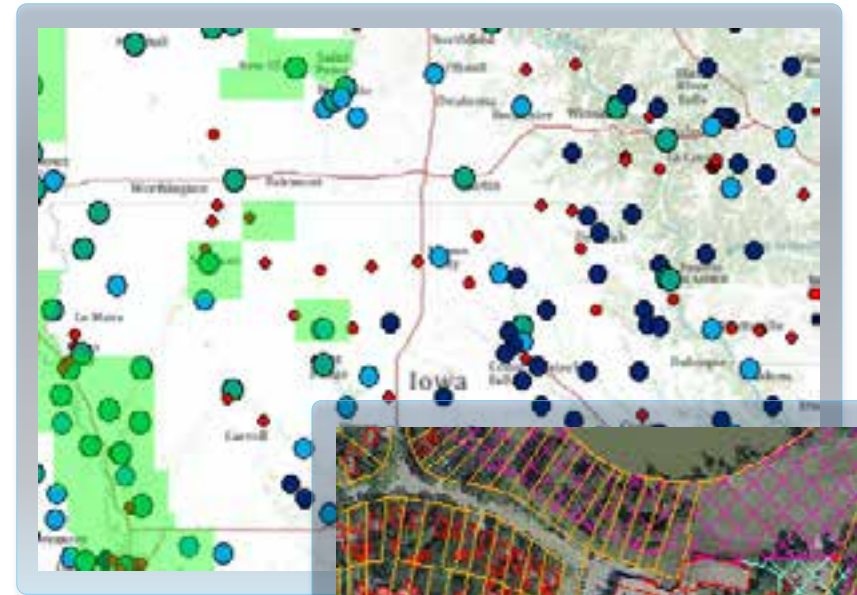

- Incorporate with target version

- After a post versions are identical

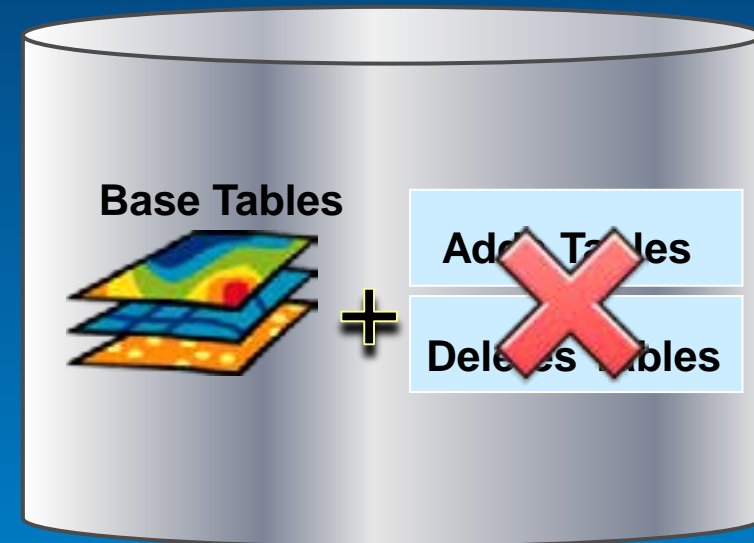

Reconcile & Post Demo

Shawn Thorne

Non-Versioned Editing

- **Directly editing the base tables**
- **Benefits IT integration**
- **Database integrity rules**
- **Simple data only (Points, Lines, Polygons)**
- **No Undo/Redo**

But I want both...

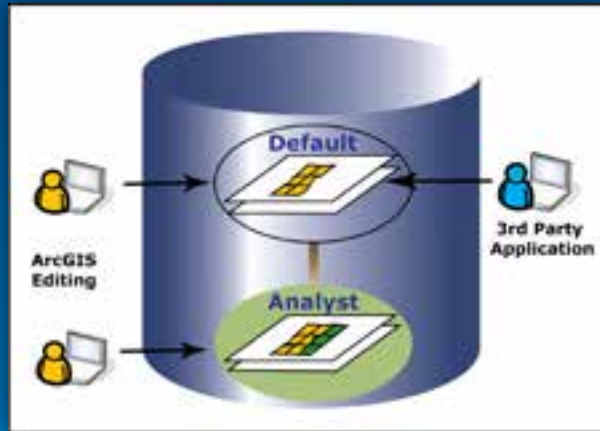

Versioned

Non-versioned

Versioned Editing - Move to Base Option

- **Hybrid**
 - versioned and non-versioned

IT integration

Database constraints

- **Simple data only**
 - Points, lines, polygons, annotation, relationship classes

SQL Editing

- **Attributes**
- **Geometry**
 - **Spatial Types**
 - **Non-ArcGIS Client**
 - **SQL access to geometries**
- **Versions**
- **No geodatabase functionality**

Multi-user Geodatabase Editing Summary

- **Three ways to edit data**
 1. **Versioned Editing**
 2. **Non-Versioned Editing**
 3. **SQL Editing**

- **Which one do I use?**
- **Depends:**
 - > **Short vs. Long Transactions?**
 - > **non-ArcGIS clients?**
 - > **Multi-editor requirement?**

Session Path

- Introduction to the Multi-user Geodatabases
- Versioning
- Types of Editing
- **Archiving**
 - **What is it?**
 - **How is it used?**
- Geodatabase Replication
- Q & A

Geodatabase Archiving: What is it?

- **Edit history**
 - Versioned data
 - Non-versioned data

- **Temporal queries**

Versioned Archiving: How it works

- **Extends versioning**

1. **Register as Versioned**

2. **Enable Archiving**

Versioned Archiving: How it works

- Save edits on the Default version
 - changes added to archive table

Base Table

Delta Tables

Adds

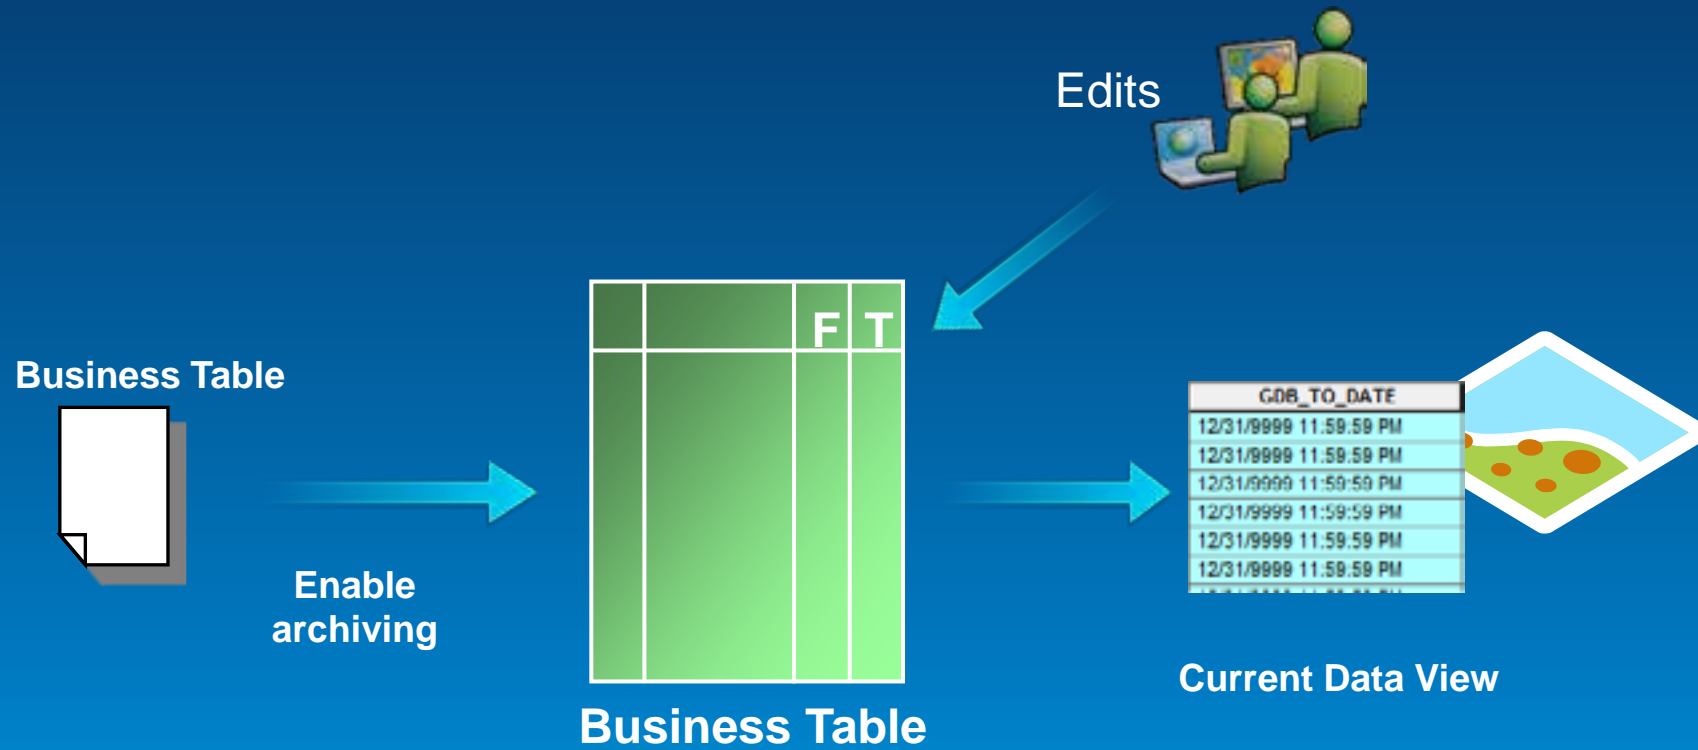

Deletes

Archive Table

		F	T

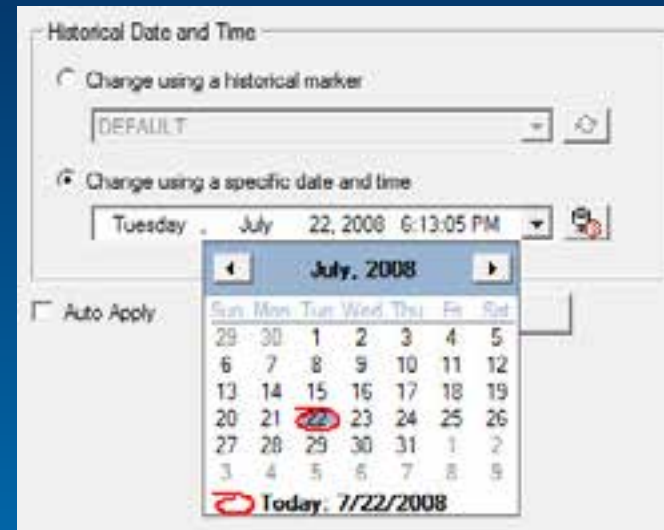

Non-versioned Archiving: How it works

Geodatabase Archiving: usage

- Two query methods
 - specific date and time

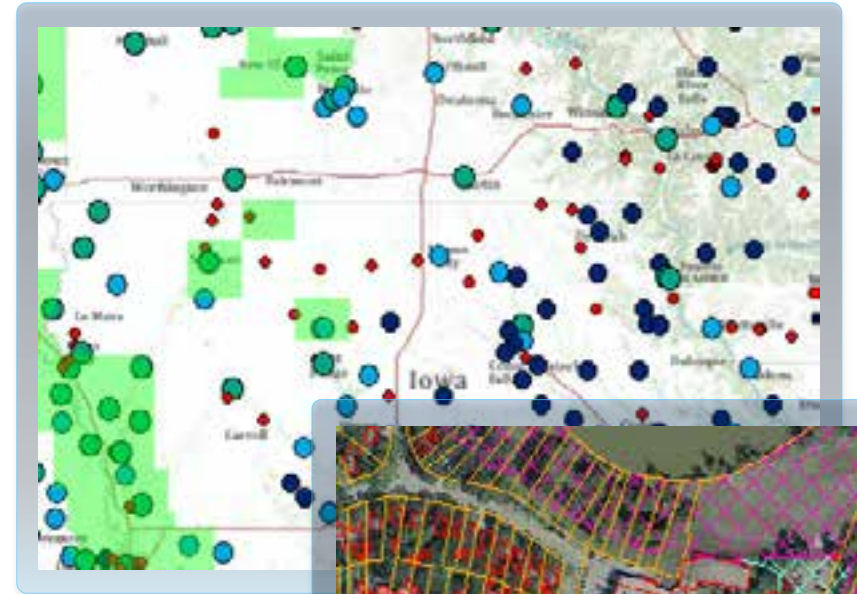

- historical marker

Geodatabase Archiving Demo

Shawn Thorne

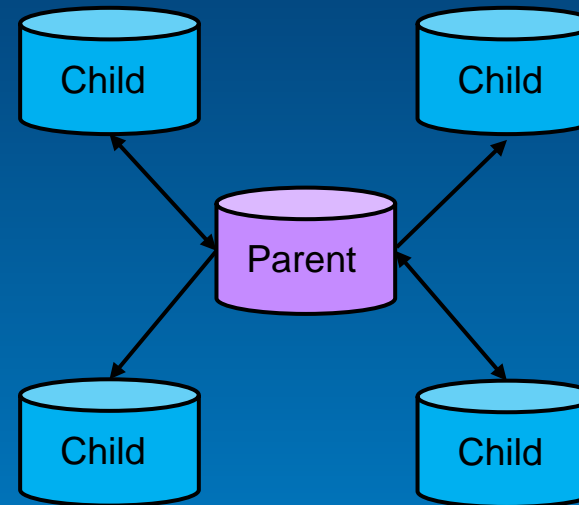

Session Path

- Introduction to Multi-user Geodatabases
- Versioning
- Types of Editing
- Archiving
- **Geodatabase Replication**
- **Q & A**

Geodatabase Replication

- **Distribute subsets of data**
 - Platform independent

- **Data edited independently**
 - synchronized when needed

Distributed Geodatabase Use Cases

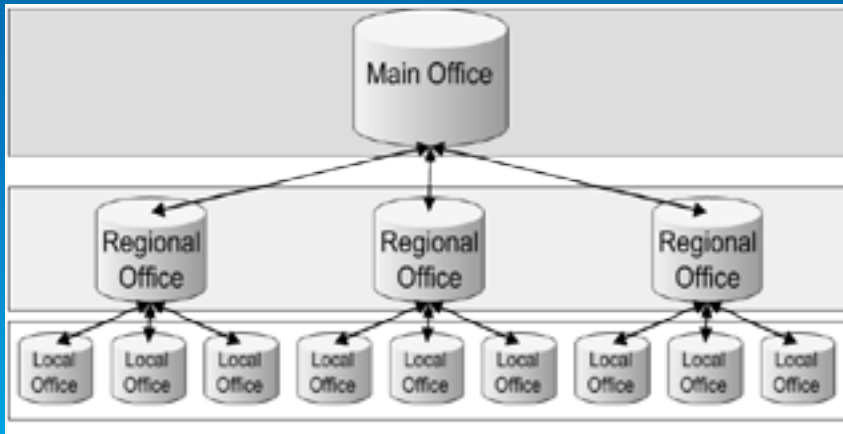

Central Hub

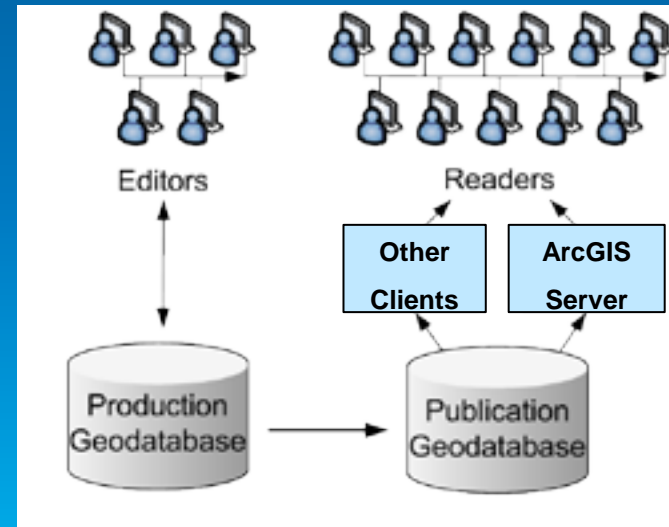

Mobile Users

Multiple Levels / Replica Tree

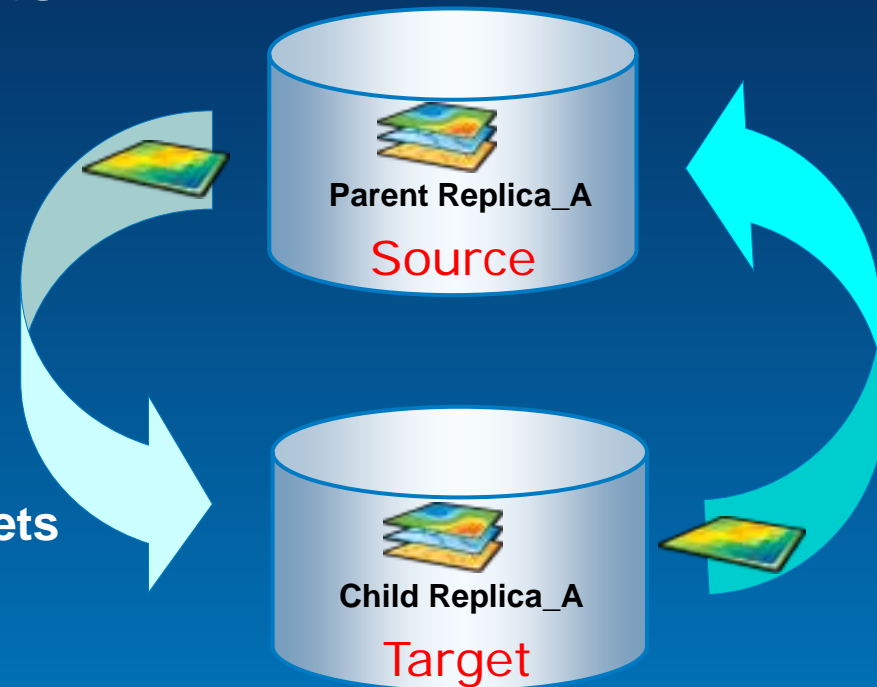

Production / Publication

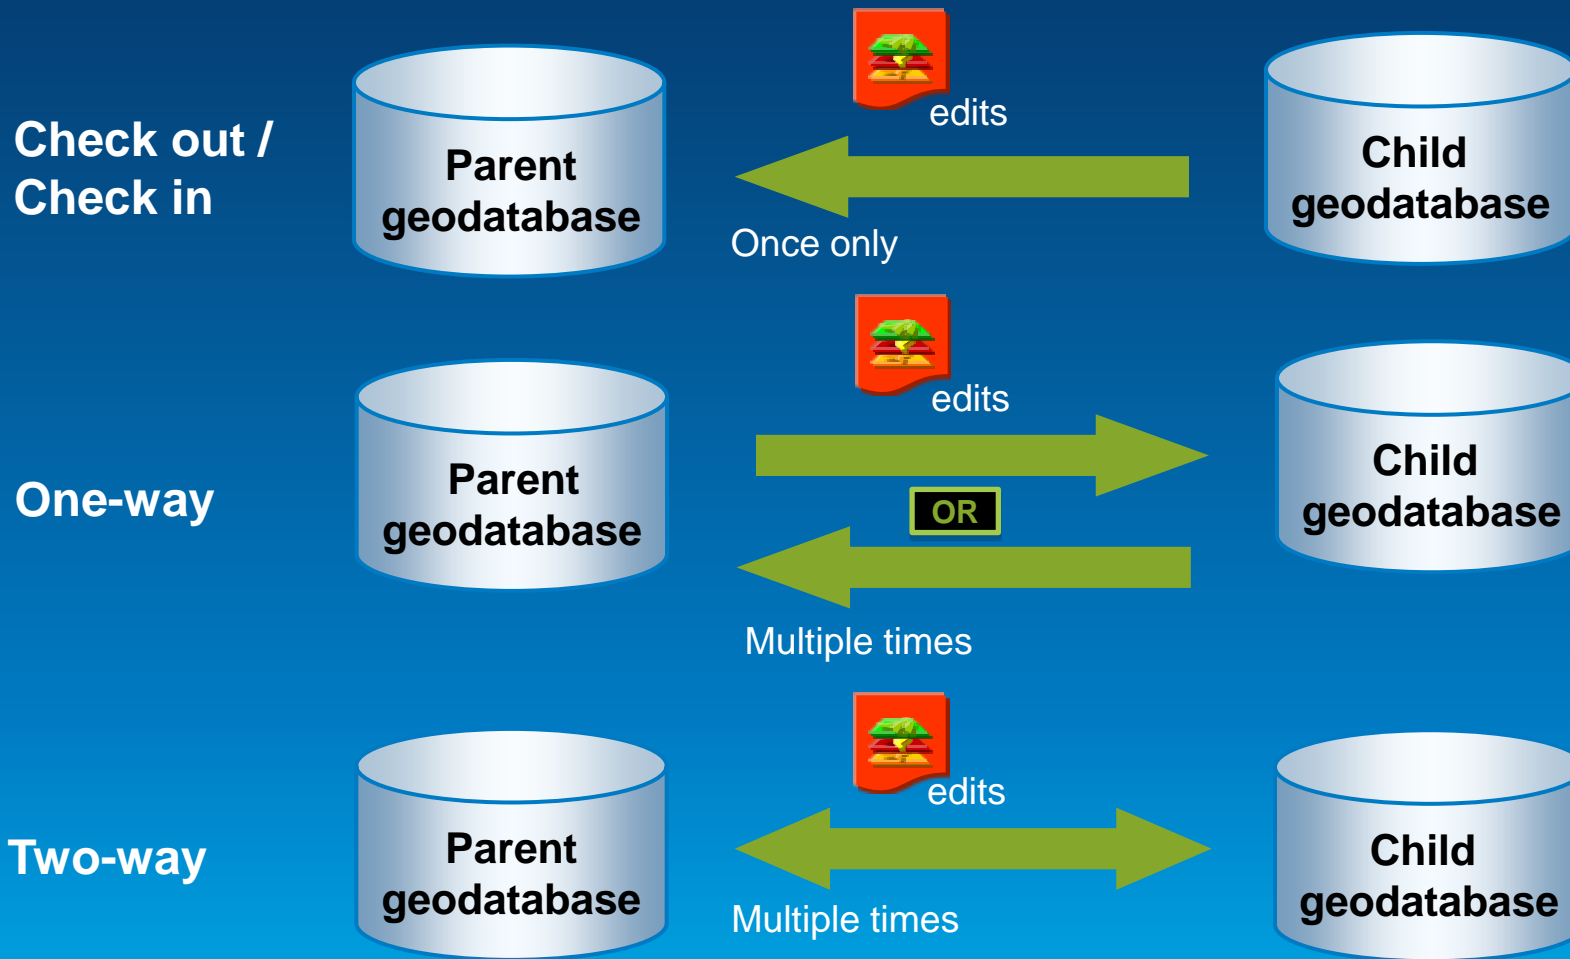

Geodatabase Replication - Concepts

- You can replicate :
 - Any version
 - Specific datasets
 - A subset of features in the chosen datasets

Three Types of Replicas

Geodatabase Replication Demo

Shawn Thorne

Geodatabase Replication - Summary

- **Distribute data across Geodatabases**
- **Different Replication workflows**
 - Check out / Check in
 - One-way
 - Two-way

Session Path - Summary

- **Introduction to the Multi-user Geodatabases**
- **Versioning**
- **Types of Editing**
- **Archiving**
- **Geodatabase Replication**
