

# Building Java Apps with ArcGIS Runtime SDK

Mark Baird and Vijay Gandhi

Technical Workshop

# A step back in time...

- Map making 50 years ago

- <http://www.nls.uk/exhibitions/bartholomew/maps-engraver>
- <http://www.nls.uk/exhibitions/bartholomew/printing>

1960s

2014

# Outline

- **What's new in 10.2.3**
- **Developing an app**
  - **Map & Layers**
  - **Analysis**
  - **Offline**
    - **Taking data offline**
    - **Editing**
    - **Sync**
    - **Routing & Geocoding**
- **Deploying your app**
- **Road ahead**
- **Questions**

# What's new

- **10.2.3 release out now**
  - free download on [developers.arcgis.com](http://developers.arcgis.com)
- **10.2.4 release coming soon...**
- **Developers website**
  - download, documentation, samples
- **Offline functionality**
- **New licensing model**

## What's new - Offline

- **Tile cache**
  - Use as basemap
- **Cache features locally**
  - Local geodatabase
  - Query, Identify
  - Edit
  - Sync edits
- **Routing & Geocoding**

# Development & Deployment Workflow

1. Download and Install

2. Develop and Test

3. Deploy and Distribute

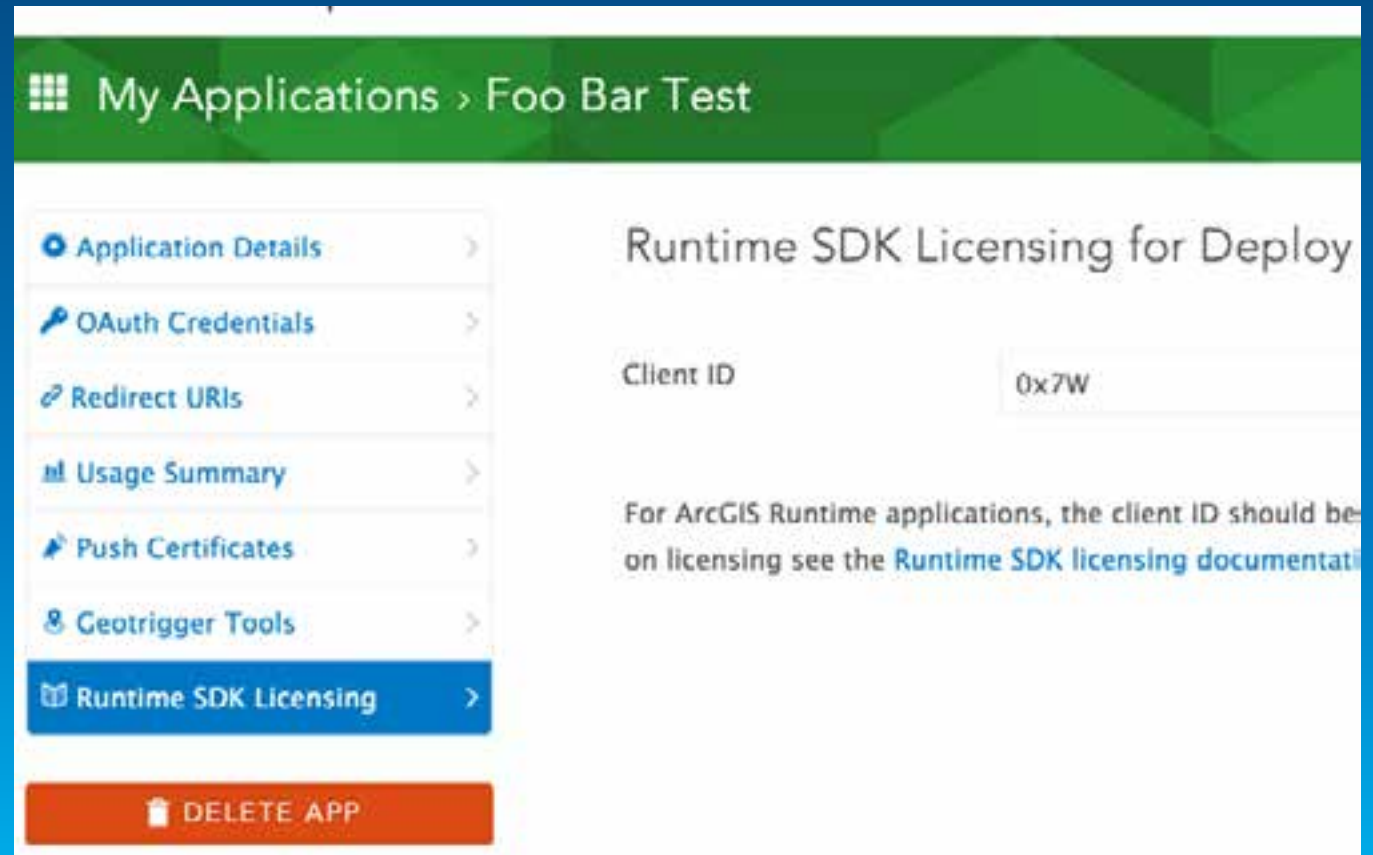

# License levels and functionality

License Level	Available functionality
Developer (development and testing only)	All functionality (watermarks and debug messages will be generated, nag screens with local server *)
Basic	Connected - all functionality Offline - map viewing only
Standard	Connected and offline - all functionality, includes: <ul style="list-style-type: none"><li>• Local locators (geocoding)</li><li>• Local routing</li><li>• Local geodatabase editing</li><li>• Local geodatabase sync operations</li><li>• Local server *</li></ul>

\* For those SDKs that support it

# How to license your app at the basic level

- <http://developers.arcgis.com>
- Under Application section, create a New Application (or select existing)
- Click on Runtime SDK Licensing
- Copy the Client ID and use it to set your clientId
  - `ArcGISRuntime.setClientID("0x7W");`

# How to license your app at the standard level

## You have 2 options:

- 1. Use an organization account (ArcGIS Online or Portal for ArcGIS)**
  - § Requires users of your app to log in with their account
- 2. Use a license string obtained from Customer Service or your international distributor**
  - § License burnt into the app
  - § Extensions can also be added with this option

**For more info speak to sales or product management**

## What's new - Functionality

- **Additional GeoProcessing Tools**
  - **Mosaic Dataset tools!**
- **New toolkit**
- **Performance optimizations for tile services**
- **Popup improvements**
- **See <https://developers.arcgis.com/java/guide/release-notes.htm>**

EXIT

# Map & Layers

Vijay Gandhi

## Cloud

- Ø ArcGIS Online
- Ø ArcGIS for Server
- Ø OGC (WMS)
- Ø OpenStreetMap

## Local Packages

- Ø Tiled Map
- Ø Dynamic Map
- Ø Geocoding
- Ø Geoprocessing

## Application

- Ø Graphics

## 10.2.3

- Ø Tiled Cache
- Ø Geodatabase

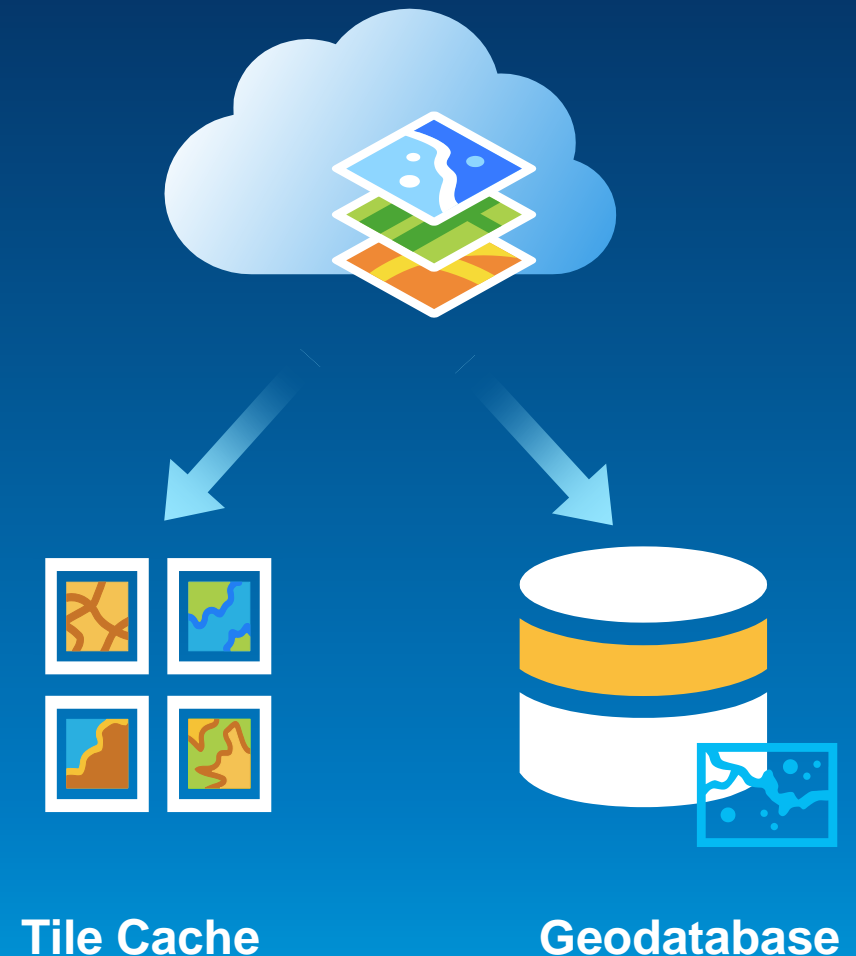

## Device

- Ø GPS

# New Layers in 10.2.3

- **Tile cache**
  - Download tiles from server
  - Display in LocalTiledLayer
  
- **Geodatabase**
  - Download features from server
    - Editable
    - Searchable
    - Sync enabled
  - Display in FeatureLayer
  - Toolkits

Shortest Distance

Line Length

Geodesic

# Analysis - Features

- Query
- Find
- Identify
- Geocoding
  
- Task based framework

- Attributes, geometry, etc
- Multiple spatial references

- Online or Offline source

- Sync or Async

# Analysis - Geoprocessing

- User-defined analysis
- Example – Project & Clip

# Analysis - Geoprocessing

- **Pre-built tools included in the ArcGIS System**
- **Examples**
  - **Proximity Analysis**
  - **Spatial Statistics**
  - **Viewshed**
- **Create your own using ModelBuilder or Python**
- **Available**
  - **Online - hosted as a geoprocessing service by ArcGIS server**
  - **Offline - local geoprocessing packages (GPK)**
- **Execute the service as a task using the API**

DEMO

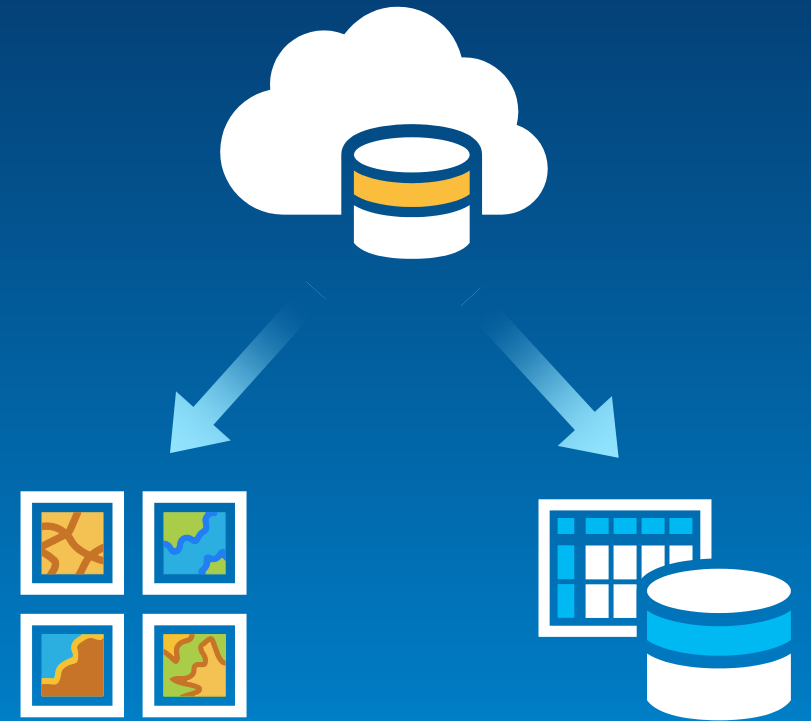

# Analysis

Vijay Gandhi

# Getting Offline Data

Mark Baird

# Offline

## Services Pattern

## Desktop Pattern

# Getting an offline geodatabase

- **Simple coding steps:**
  - **Make a task : a geodatabase task**
  - **Create some parameters**
  - **Request the geodatabase using the task and parameters**
  - **Use asynchronous code to monitor progress and completion.**

# Getting Offline Data

Mark Baird

# Offline Routing and Geocoding

Mark Baird

# Offline - Routing & Geocoding

- **Routing**

- Create & Share route data from ArcGIS for Desktop
- Option to set stops, preserve order, add barriers

- **Geocoding**

- Create & Share locator data from ArcGIS for Desktop
- Geocoding & Reverse geocoding

DEMO

# Routing

Mark Baird

# Editing

Vijay Gandhi

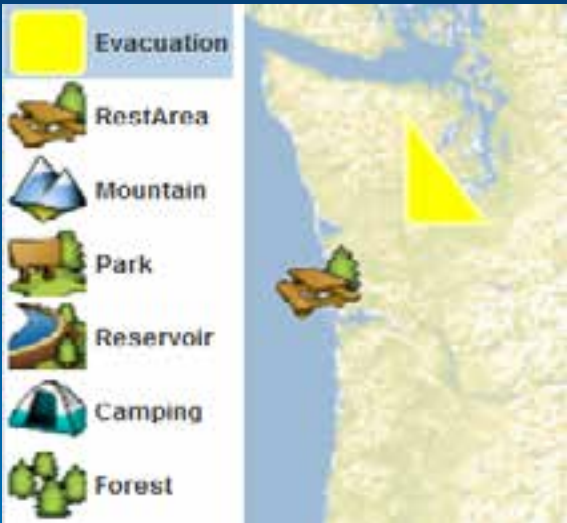

# Offline - Editing

- **Create, Edit, Delete Features**
- **Attributes, geometry & attachments**
- **Edit using**
  - **API – for fine-grained control**
  - **Toolkit – for rapid development**
- **Also works for online services**

# Offline – Toolkit for Editing

## Template Picker

- List all feature types
- Create feature

## Editing Toolbar

- Highlight feature
- Create, Delete feature
- Create, Edit geometries

## Drawing Overlay

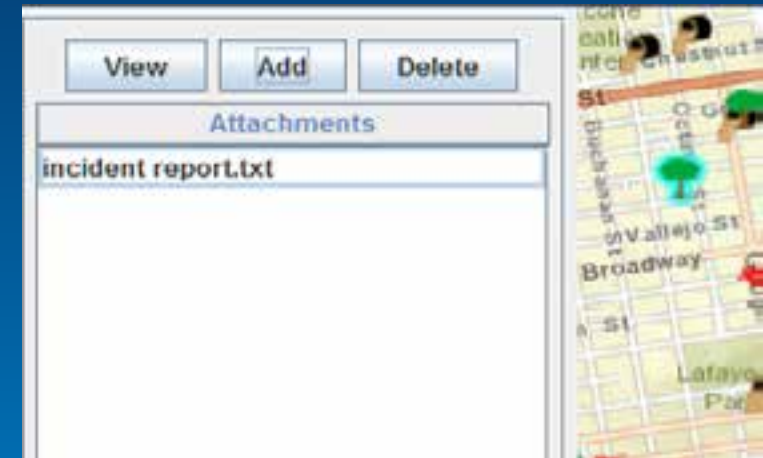

- Create, Edit geometries

# Offline – Toolkit for Editing

## Popup

- Dialog with attributes of a feature
- Read-only and Editable

## AttachmentEditor

- View, Add, Delete attachments

DEMO

# Editing

Vijay Gandhi

# Sync

Mark Baird

# Synchronization

- 2 way process
  - Upload your edits
  - Download other changes

Alternatively you can:

Upload only

- Download only

- Familiar development patterns
  - Task
  - Parameters
  - Call method on task to Sync.

DEMO

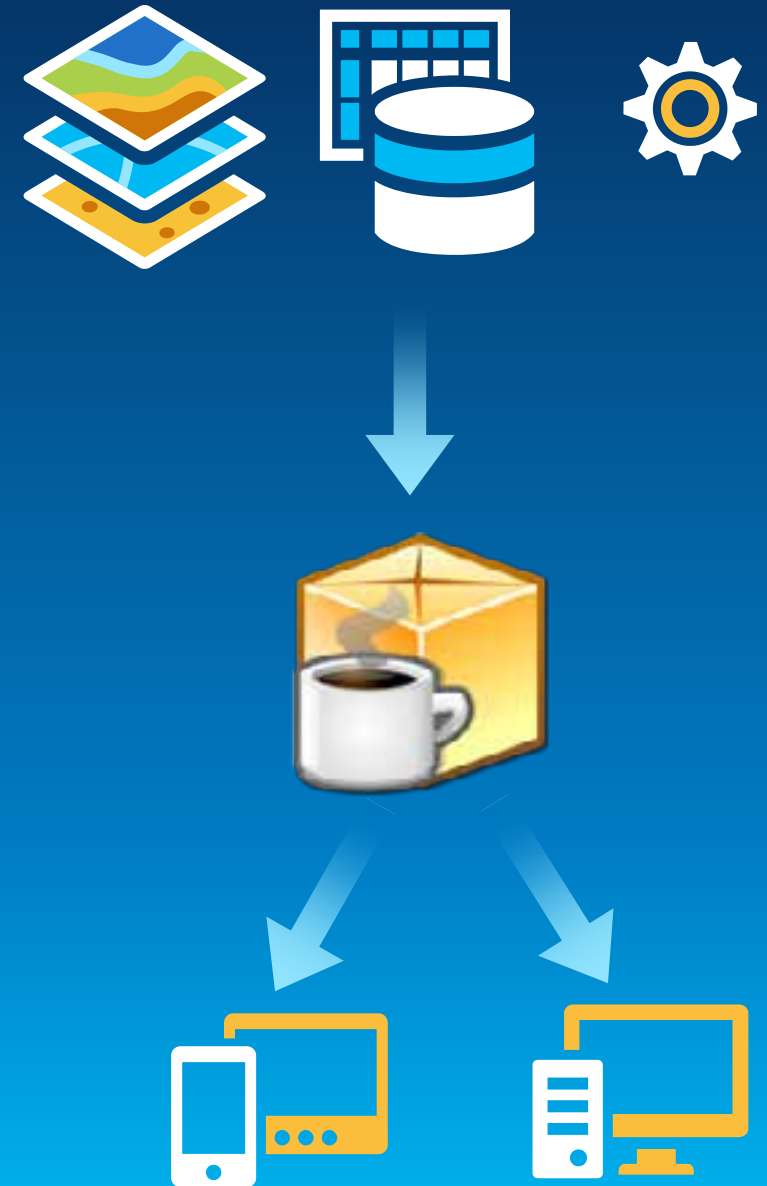

# Sync

Mark Baird

# Deployment

Vijay Gandhi

# Road Ahead 10.2.4 and 10.3

- **10.2.4 (Summer)**
  - **Direct read of data**
    - Raster data
    - Shapefiles
    - GeoPackage
    - KML
  - **Samples and toolkit code on GitHub**
  - **Java FX control (Beta)**
- **10.3 (Early 2015)**
  - **3D**
  - **GPU based analysis**

# ArcGIS Runtime SDK sessions Wednesday

Session Name	Time	Location
ArcGIS Runtime SDK for Qt: Tips and Tricks	9:30am – 10:00am	Developer Island (demo theatre)
Building .NET Apps with ArcGIS Runtime SDK: Tips and Tricks	11:30am – 12:00pm	Developer Island (demo theatre)
Offline Routing and Geocoding in ArcGIS Runtime SDK	3:00pm – 3:30pm	General Theater 2 (demo theatre)
Developing Windows Desktop Apps with ArcGIS Runtime SDK for .NET	8:30am – 9:45am	Room 09

# ArcGIS Runtime SDK sessions Thursday

Session Name	Time	Location
Create your own Android App Tools Using ArcGIS Runtime SDKs	9:30am – 10:00am	Developer Island (demo theatre)
Dive Deep into the Performance of the ArcGIS Runtime SDKs Core Display Architecture	10:30am – 11:00am	Developer Island (demo theatre)
10 Things you Didn't Know You Can Do with ArcGIS Runtime SDK for iOS	11:30am – 12:00pm	Developer Island (demo theatre)
Animating Thousands of Graphics and Features with ArcGIS Runtime SDK for Java SE	12:30pm – 1:00pm	Developer Island (demo theatre)
Developing Mobile Apps with ArcGIS Runtime SDK for .NET	10:15am – 11:30am	Room 05 A
ArcGIS Runtime SDKs: The Road Ahead	1:30pm – 2:45pm	Room 07 A/B

**Thank you...**

- **Please fill out the session survey:**

**Offering ID: 1222**

**Online – [www.esri.com/ucsessionsurveys](http://www.esri.com/ucsessionsurveys)**

**Paper – pick up and put in drop box**

# Questions?

Understanding our world.
