Global Challenges

A Dynamic World Creates Complex Intelligence Challenges

Pandemics

Famine and Drought

Natural Disasters

Displaced Persons

Civil Unrest

Political Crisis

Organized Crime

Terrorism

Adversaries

... And Impacts National Security

First Age
1944-1962

- Rise of communism
- Human intelligence
- Single threat focus

First professional intelligence

Second Age 1962-2001

- Cold war; nation-states
- Technical collection
- Single threat focus

Stovepipe intelligence

Third Age 2001-2014

- Terrorism and regional conflict
- Info tech, UAV's and web tools
- Threats on the homeland

Distributed intelligence

Fourth Age
2014+

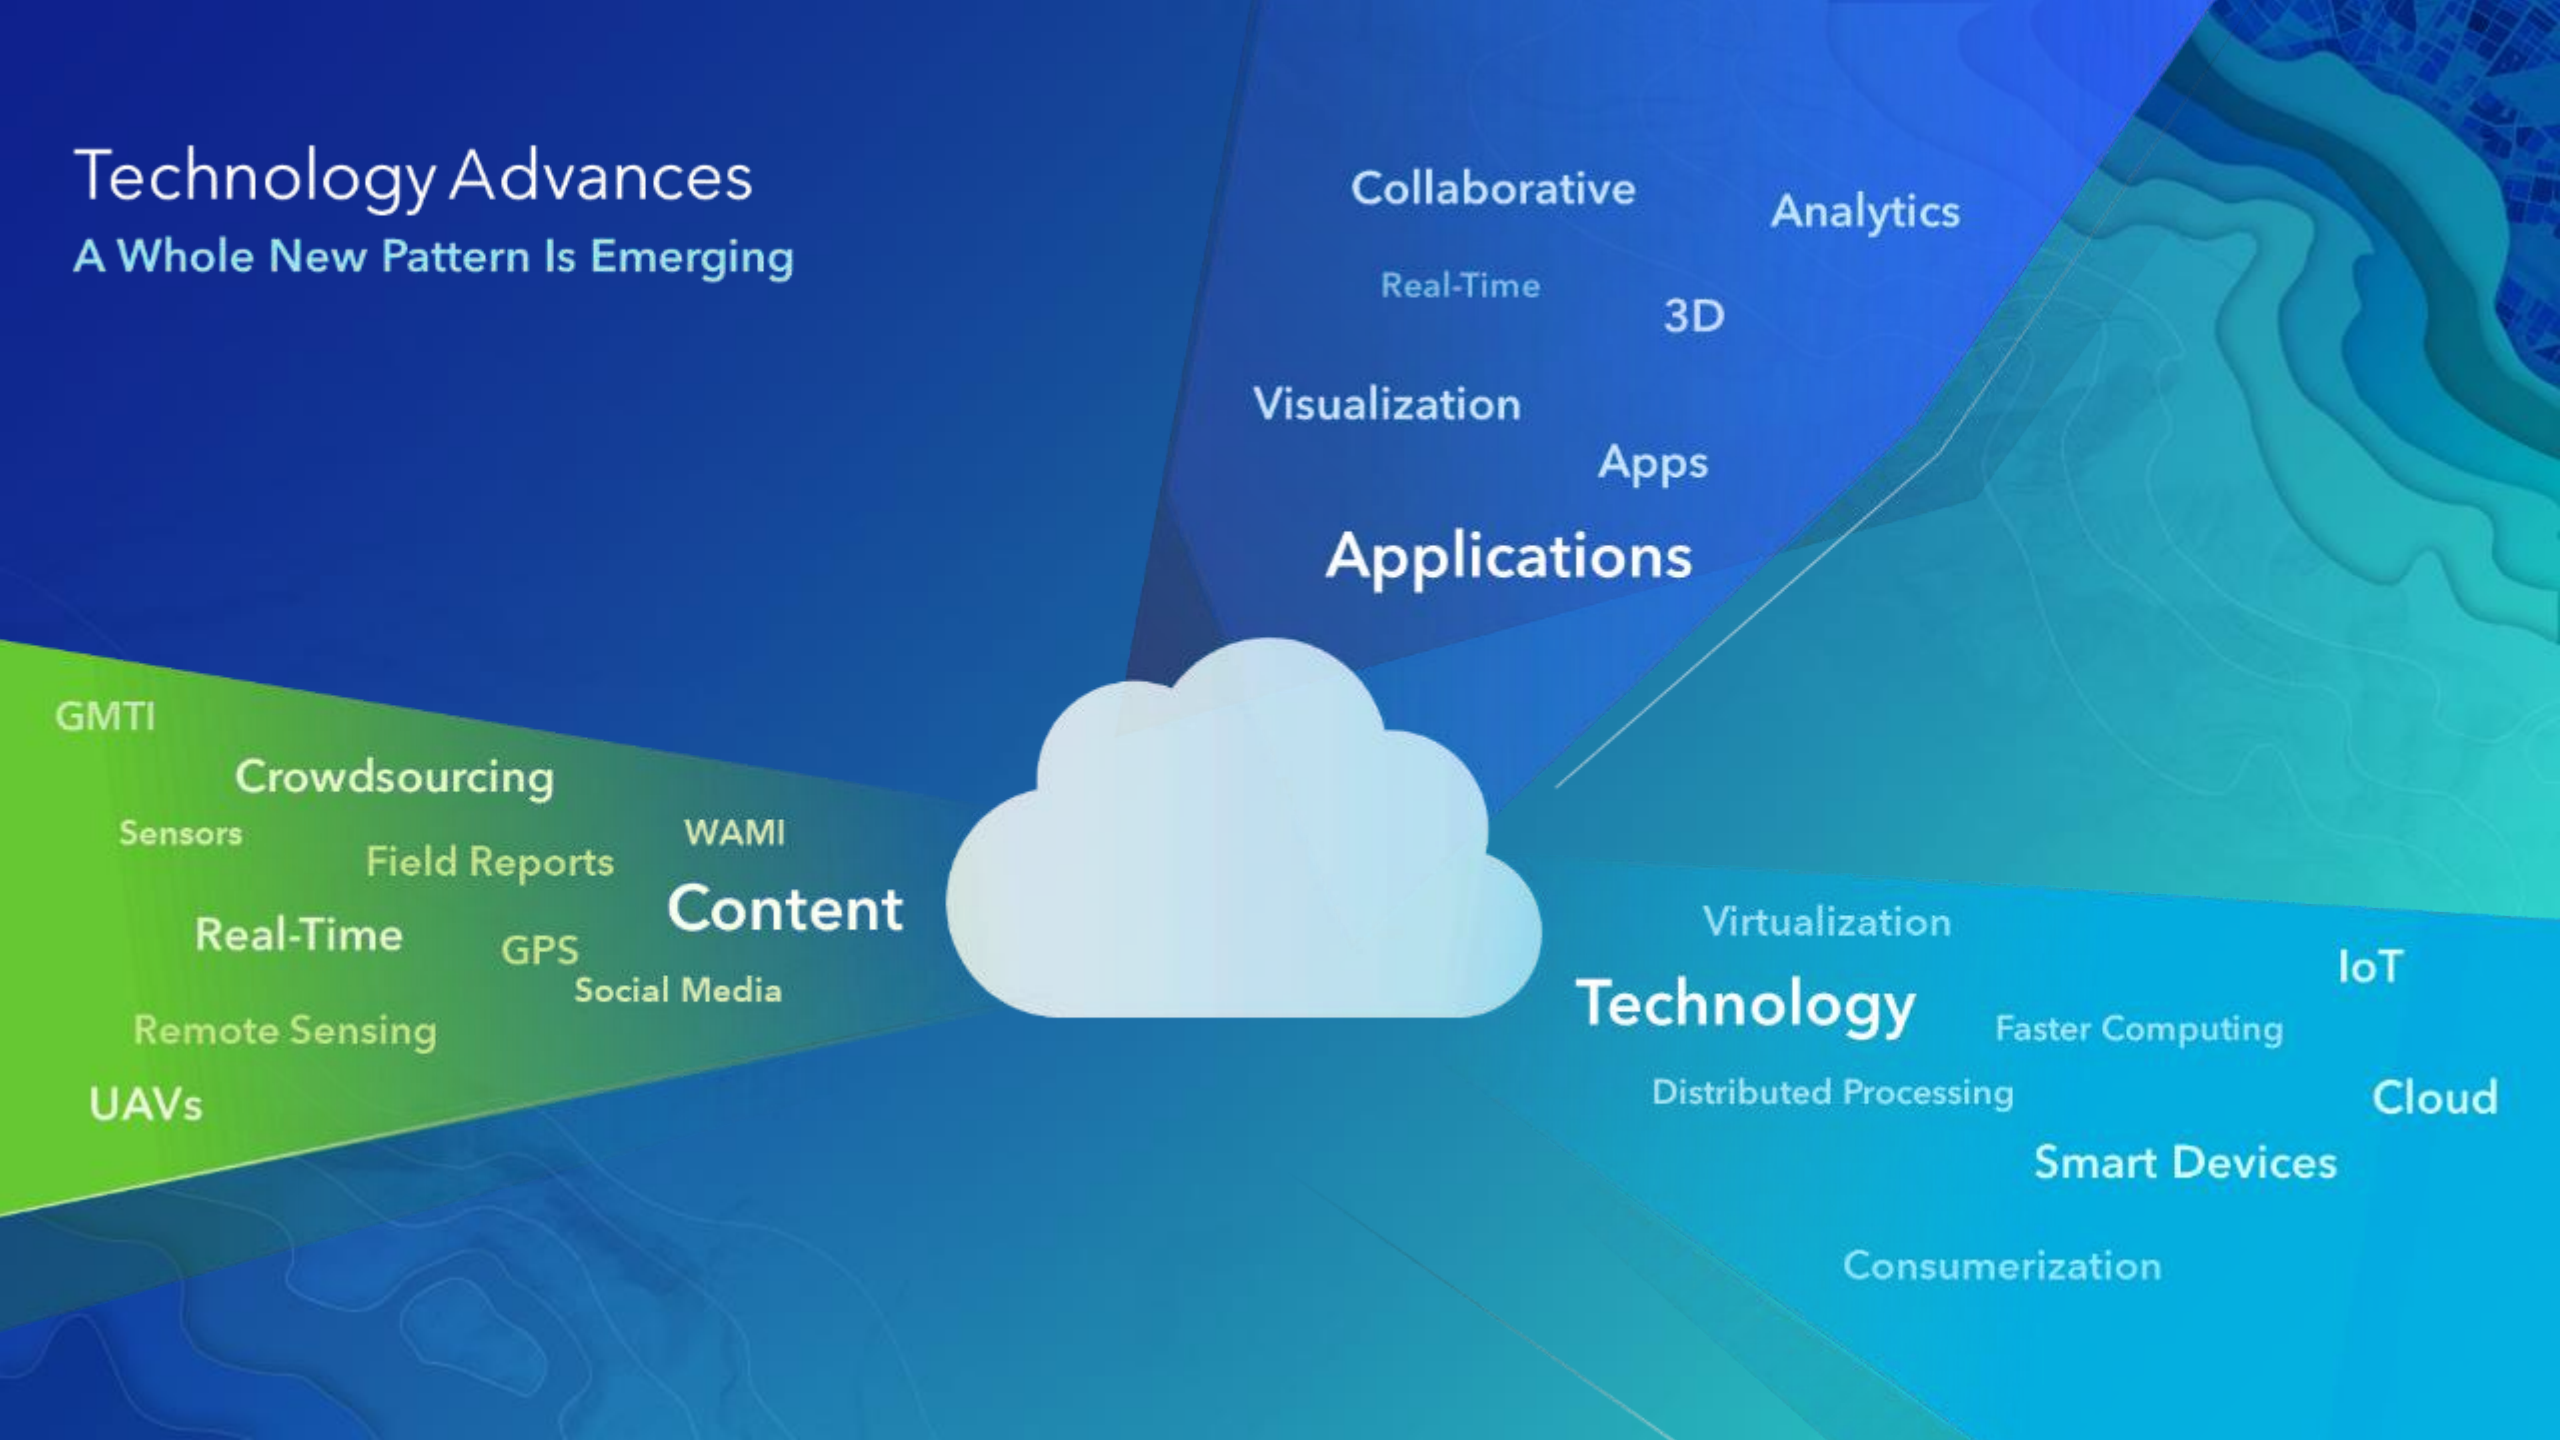

- Terror, cyber and WMD
- Multi-int & big data analytics
- Diverse distributed groups

**Integrated
intelligence**

Smarter Decisions

► Integrating Real-time Information Feeds & Analysis

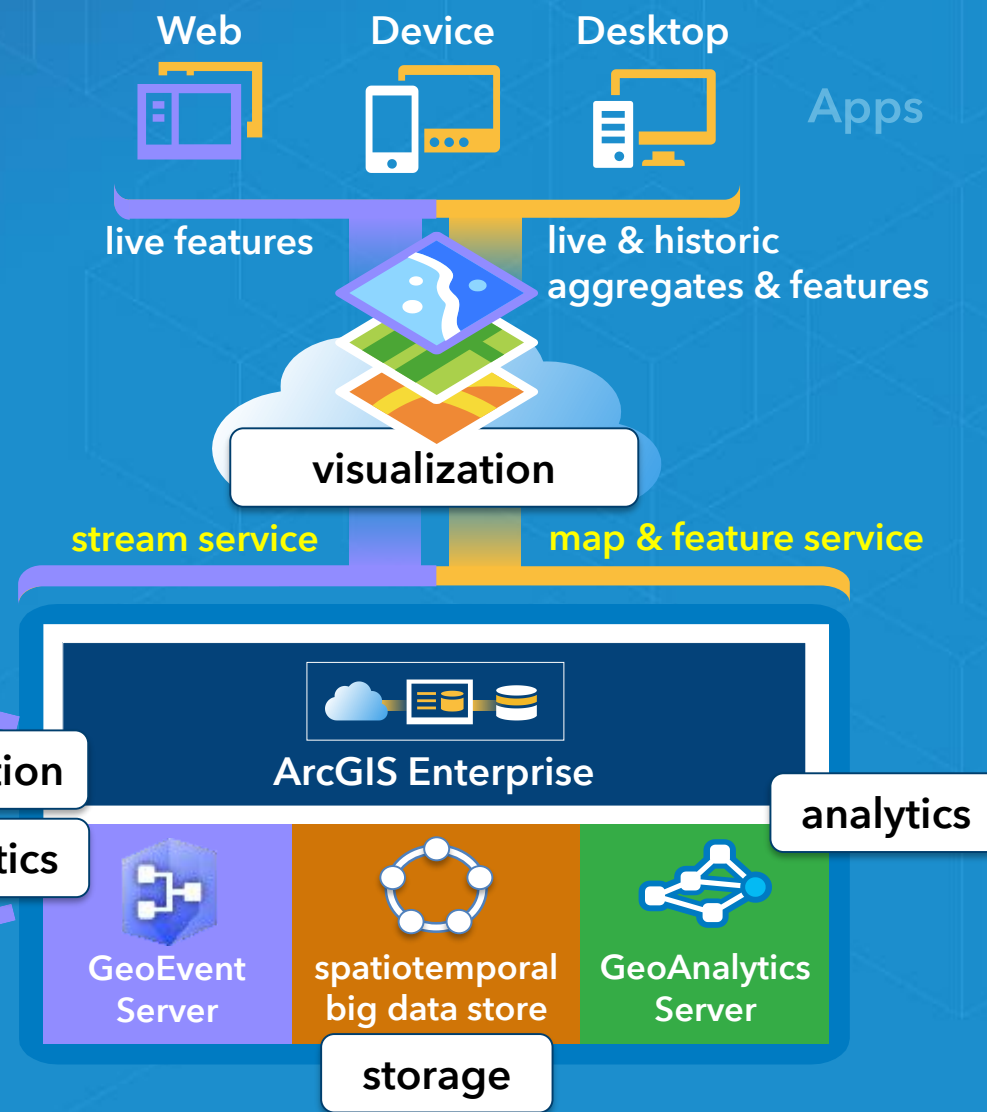

Connect to, Store and Analyze feeds

real-time & big data capabilities

- Ingest high velocity real-time data into ArcGIS
- Perform continuous analytics on events as they are received
- Store observations in a spatiotemporal big data store
- Run analytics on stored observations
- Visualize high velocity & volume data:
 - as an aggregation
 - as discrete features
- Notify those who need to know about patterns of interest

10.5

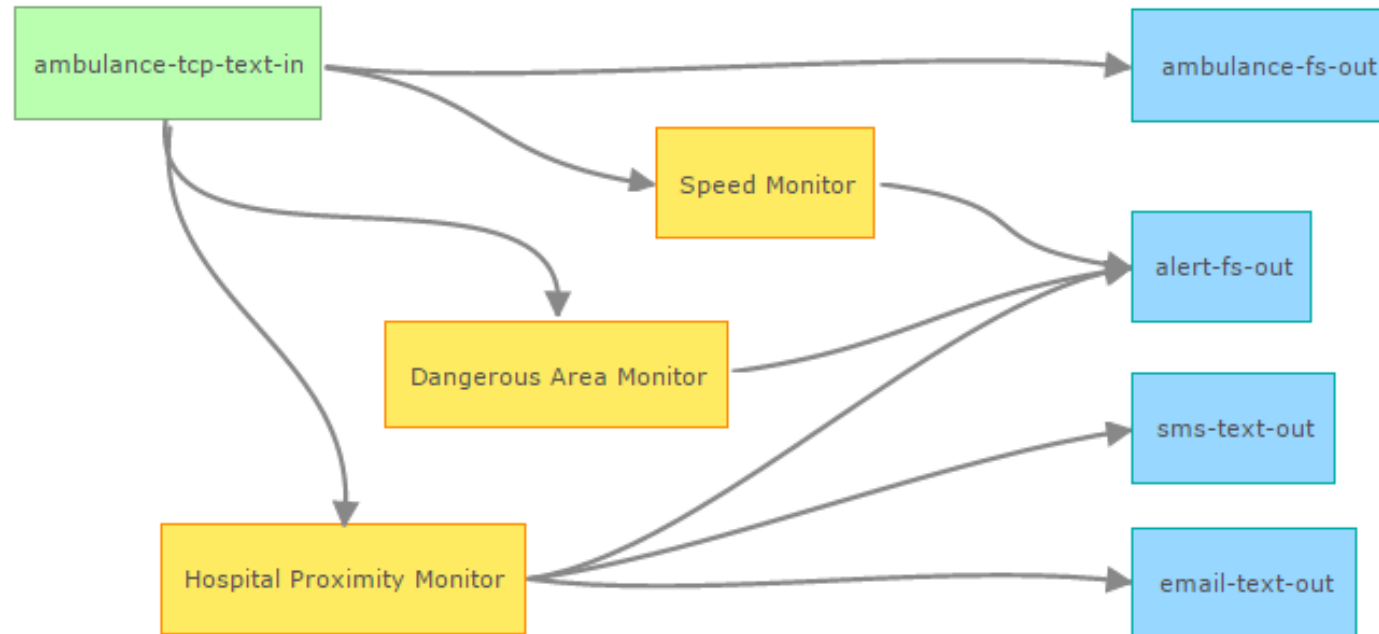

Analytics on the Fly

apply continuous analytics by defining a GeoEvent Service

- A **GeoEvent Service** defines the flow of GeoEvents
 - The **Filtering** and **Processing** steps to perform
 - what input(s) to apply them to
 - and what output(s) to send the results to

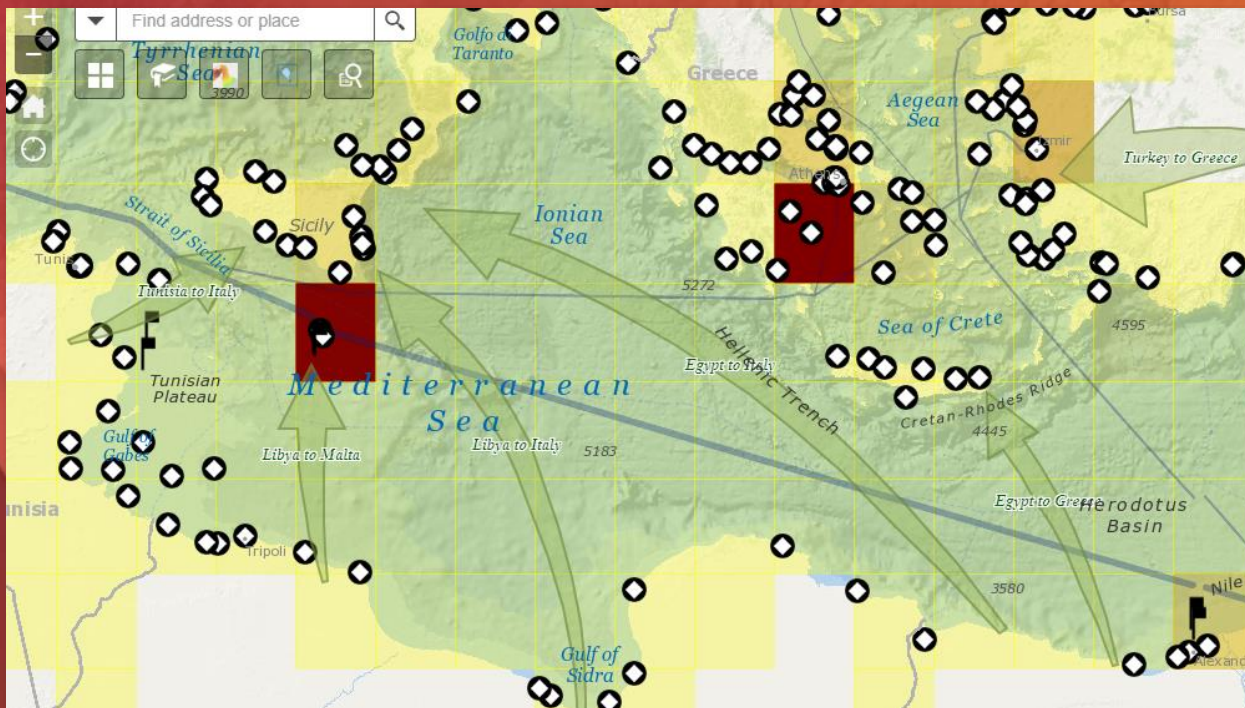

Ambulance Monitor

Monitors vehicles by updating a vehicle feature layer with current information including, alerting when speeding violations are detected, when vehicles enter dangerous areas, and when vehicles are in close proximity to an item of interest.

David Attaway

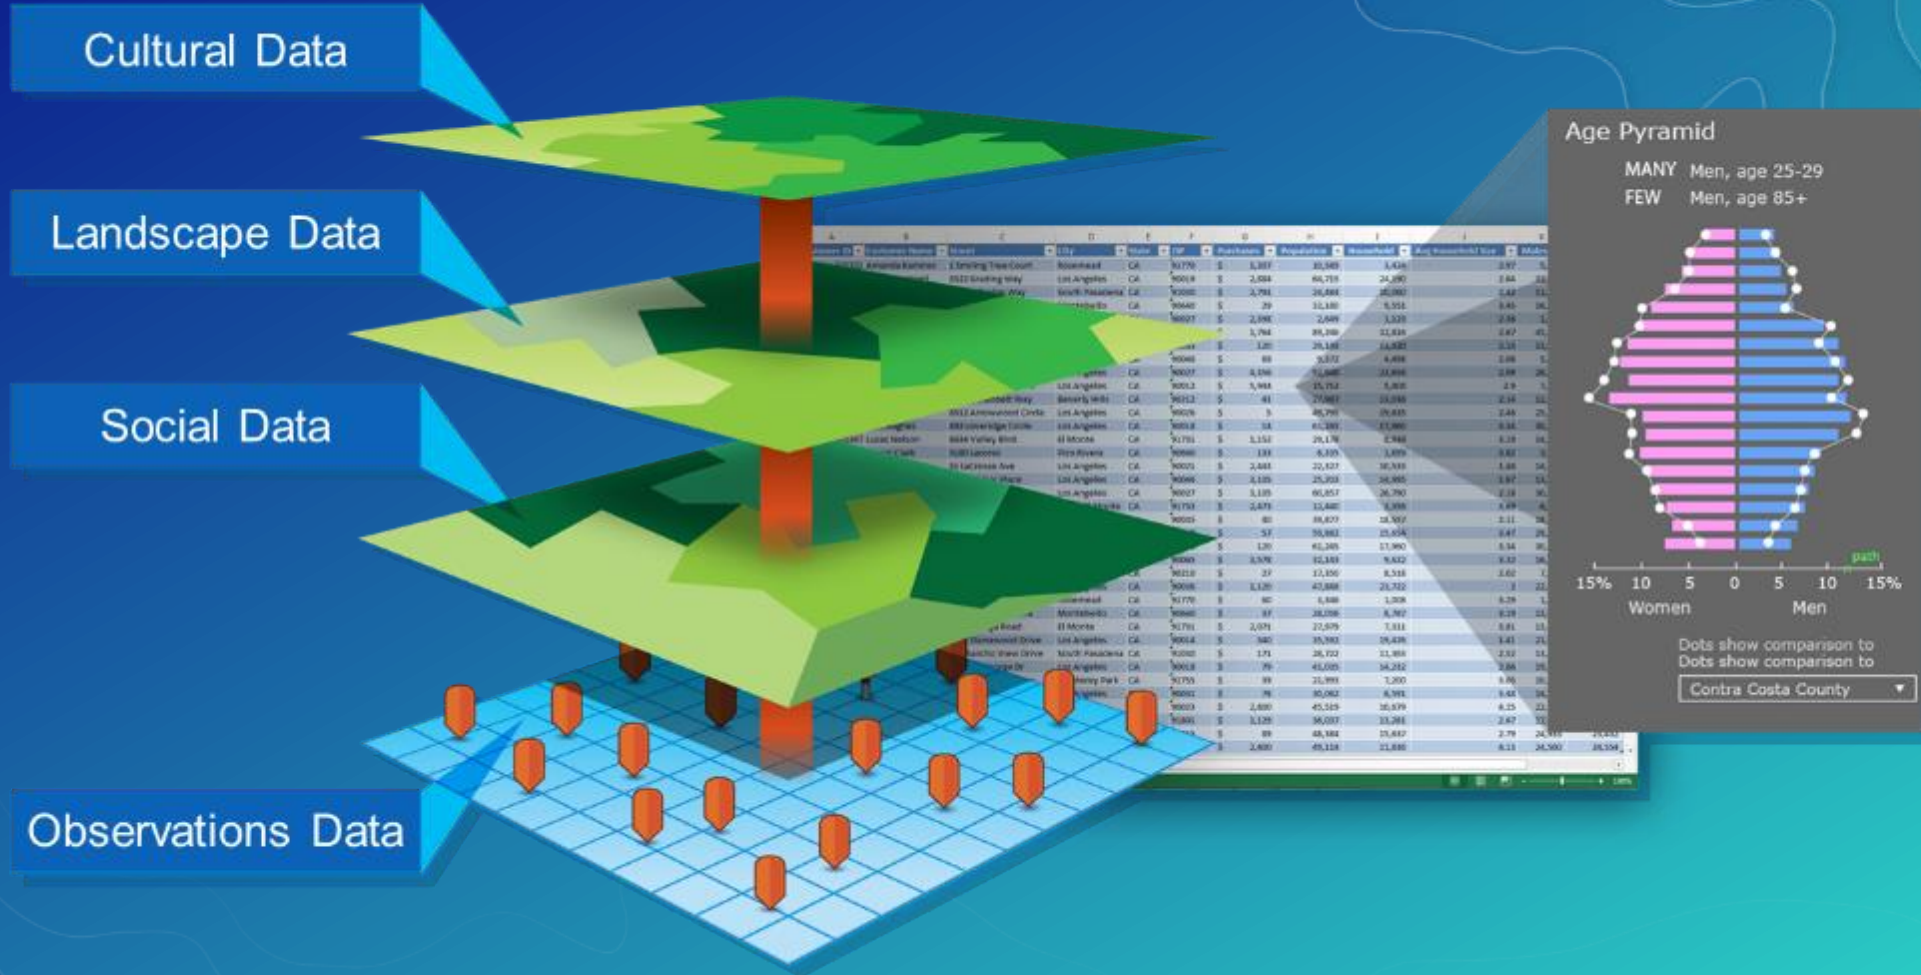

A Platform for the GEOINT Community

60,000 Users across the U.S. Intelligence Community

"One of our really great approaches is the use of ArcGIS as a geospatial framework...the IC GIS Portal is a platform for analytics, collaboration, and data sharing that is used throughout the Intelligence Community." -Sue Gordon, Deputy Director, NGA
